

PREVALENCE OF PSYCHIATRIC EMERGENCIES

- Between 1992 and 2001 there were 53 million mental health-related emergency department contacts in the United States,
- An increase from 4.9% to 6.3% of all emergency department visits, and an upswing from 17.1-23.6 visits per 1,000 of the US population during this period.
- One study estimated that 135,000 emergency psychiatric assessments are made each year in New York State hospitals alone.
- Due to frequently inadequate alternatives, emergency departments and psychiatric emergency services (PESs) have become the primary acute care settings where patients seek mental health care in the US.
