Political Ecologies of Cattle Ranching in Northern Mexico Eric P. Perramond, 2010-04-15 Private ranchers survived the Mexican Revolution and the era of agrarian reforms and they continue to play key roles in the ecology and economy of northern Mexico In this study of the Rio Sonora region of northern Mexico where ranchers own anywhere from several hundred to tens of thousands of acres Eric Perramond evaluates management techniques labor expenditures gender roles and decision making on private ranches of varying size By examining the economic and ecological dimensions of daily decisions made on and off the ranch he shows that contrary to prevailing notions ranchers rarely collude as a class unless land titles are at issue and that their decision making is as varied as the landscapes they oversee Through first hand observation field measurements and intimate ethnographies Perramond sheds light on a complex set of decisions made avoided and confronted by these land managers and their families He particularly shows that ranching has endured because of its extended kinship network its reliance on all household members and its close ties to local politics Perramond follows ranchers caught between debt drought and declining returns to demonstrate the novel approaches they have developed to adapt to changing economies and ecologies alike such as strategically marketing the ranches for wild game hunting or establishing small businesses that subsidize their lifestyles and livelihoods Even more importantly he reveals the false dichotomy between private and communal ranching Political Ecologies of Cattle Ranching in Northern Mexico is essential reading for anyone interested in the future of ranching in western North America

passion into a profitable enterprise The Limits of Labour David Bright, 2011-11-01 In a few short decades before the First World War Calgary was transformed from a frontier outpost into a complex industrial metropolis. With industrialization there emerged a diverse and equally complex working class. David Bright explores the various levels of class formation and class identity in the city to argue that Calgary's reputation as a prewar centre of labour conservatism is in need of revision. Bright also delineates the trials of the Calgary labour movement in the 1920s. Internal divisions and dissent prevented the movement from realizing the potential strength of the working class. Instead, even as local capitalism restructured itself, political and industrial labour organizations wilfully fragmented their own base of support. In particular, they failed to address the concerns and needs of the growing number of unemployed in the city, a neglect that foreshadowed events of the 1930s. This failure left the labour movement unable to meet the challenge of the Great Depression. In part, at least, the demise of labour as a viable political alternative in Calgary paved the way for the rise of Social Credit. Using Calgary as a model, The Limits of Labour reasserts the need to place class formation at the heart of the development of western Canada and provides an historical context to the renewed struggle of labour for social justice in the 1990s.
