Rational Consumer Theory And Evidence:

The Rational Consumer Robert Ernest Hall, 1990 The Rational Consumer brings together eight articles that represent key points in the development of Robert Hall's ideas on consumption over the past two decades. Since the late 1960s, Robert Hall's research has had a significant impact on the macroeconomic study of consumer behavior. The Rational Consumer brings together eight articles that represent key points in the development of Hall's ideas on consumption over the past two decades. In his introduction, Hall puts this work into perspective, tying together his ideas and pointing to how consumer behavior should work in the future given what he has discovered. Working within the standard intertemporal models of consumption, the overlapping generations model, and the infinite lifetime model, Hall's contributions to methodology have been especially important. Particularly noteworthy was his challenge to the prevalent model in which current consumption was seen as deriving from expected future income. Hall argued that consumption was instead based upon the actual present discounted value of future income.

Contents: Introduction, The Allocation of Wealth among the Generations of a Family that Lasts Forever, A Theory of Inheritance, The Dynamic Effects of Fiscal Policy in an Economy with Foresight Consumption Taxes versus Income Taxes, Implications for Economic Growth, Stochastic Implications of the Life Cycle Permanent Income Hypothesis, Theory and Evidence, The Sensitivity of Consumption to Transitory Income, Estimates from Panel Data on Households with Frederic S. Mishkin, Intertemporal Substitution in Consumption, Survey of Research on the Random Walk of Consumption, The Role of Consumption in Economic Fluctuations.

The Persuasion Industries Steven McKevitt, 2018-08-09 At the end of the twentieth century, Britain was a consumer society. Commerce, intoxicating and addictive, had almost entirely colonized modern life. People were immersed in and ultimately defined by promotional culture. The things they consumed had overtaken class, religion, geography, or occupation as the primary form of self-identity and self-expression. For much of the twentieth century, all forms of brand communication, from political campaigning to product advertising, were based on the theory of rational appeals to rational consumers. There was only one problem with this theory: it was wrong.

The Persuasion Industries: The Making of Modern Britain examines developments in marketing, advertising, public relations, and branding. It explores the role they played in the emergence of the consumer society. New ideas from fields of behavioural psychology and economics, together with internal developments such as planning, positioning, and corporate branding, allowed persuasion to become the driving force within many commercial enterprises. Together, these changes led to the emergence of an alternative, emotional model of brand communication. A simple idea that proved so compelling, it changed the world we live in.

Consumer Casualties J. Wan, 2014-11-06 Junmin Wan takes a

two prong approach to analysing this pressure in Japan in his new volume *Consumer Casualties* He first clarifies the consumer preference for habit to identify useful approaches toward solving a number of economic issues such as gambling and other addictive practices

Consumer Theories of Harm Paolo Siciliani,Christine Riefa,Harriet Gamper,2019-09-19 It has long been thought that fairness in European Consumer Law would be achieved by relying on information as a remedy and expecting the average consumer to keep businesses in check by voting with their feet This monograph argues that the way consumer law operates today promises a lot but does not deliver enough It struggles to avoid harm being caused to consumers and it struggles to repair the harm after the event To achieve fairness solutions need to be found elsewhere *Consumer Theories of Harm* offers an alternative model to assess where and how consumer detriment may occur and solutions to prevent it It shows that a more confident use of economic theory will allow practitioners to demonstrate how a poor standard of professional diligence lies at the heart of consumer harm The book provides both theoretical and practical examples of how to combine existing law with economic theory to improve case outcomes The book shows how public enforcers can move beyond the dominant transparency paradigm to an approach where firms have a positive duty to treat consumers fairly and shape their commercial offers in a way that prevents consumers from making mistakes Over time this fairness by design approach will emerge as the only acceptable way to compete

The Present State of Consumer Theory Timothy P. Roth,1998 The neoclassical theory of choice is an integral part of a large and growing literature Its elegance simplicity and apparent generality appear increasingly to influence the thinking of psychologists sociologists and political scientists At the same time the theory is subject to robust attack The theme of the book is that the critics have it right Account must be taken of the endogeneity of preference and value structures of decision makers cognitive limitations of information asymmetries of opportunistic behavior and of positive transaction and decision costs Yet these considerations militate against the specification of both the efficiency frontier and the Social Welfare Function This in turn suggests that Social Welfare Theory is an inappropriate guide for the formulation of distributional and other economic policies A corollary is that economists and others attention should center less on getting the prices right and more on getting the institutions right

The Limits of Rationality Karen Schweers Cook,Margaret Levi,2008-10-03 Prevailing economic theory presumes that agents act rationally when they make decisions striving to maximize the efficient use of their resources Psychology has repeatedly challenged the rational choice paradigm with persuasive evidence that people do not always make the optimal choice Yet the paradigm has proven so successful a predictor that its use continues to flourish fueled by debate across the social sciences over why it works so well Intended to introduce novices to rational choice theory this accessible interdisciplinary book collects writings

by leading researchers The Limits of Rationality illuminates the rational choice paradigm of social and political behavior itself identifies its limitations clarifies the nature of current controversies and offers suggestions for improving current models In the first section of the book contributors consider the theoretical foundations of rational choice Models of rational choice play an important role in providing a standard of human action and the bases for constitutional design but do they also succeed as explanatory models of behavior Do empirical failures of these explanatory models constitute a telling condemnation of rational choice theory or do they open new avenues of investigation and theorizing Emphasizing analyses of norms and institutions the second and third sections of the book investigate areas in which rational choice theory might be extended in order to provide better models The contributors evaluate the adequacy of analyses based on neoclassical economics the potential contributions of game theory and cognitive science and the consequences for the basic framework when unequal bargaining power and hierarchy are introduced

Influence of Marketing on Tobacco Consumption Behavior in Rural and Urban Areas of the Southwestern Region of Nigeria Oluwole O. Iyiola, 2008-10-02 The tobacco industry has always shown much interest in marketing their line of products and have been very successful in portraying smoking as a socially acceptable behavior to billions of people throughout the world Studies have shown in developed nations that tobacco marketing leads to the onset of smoking among adolescents in Nigeria no such study has been done The purpose of this research is to assess the potential influence of tobacco marketing on tobacco consumption among rural and urban residents in the southwestern region of Nigeria The survey was designed by the researcher thirty six items self administered by paper instrument using a cross sectional design were distributed to six hundred people in southwestern Nigeria The study involved 436 males 72.7% and 164 females 27.3% Of these 336 came from rural areas and 264 came from urban areas respectively Some 337 respondents 56.2% indicated that they were influenced by tobacco marketing to smoke while 263 43.8% indicated that they were not influenced The chi square statistic was used to test the null hypotheses The result shows a positive significant relationship that supports the notion that tobacco marketing has a positive influence on tobacco consumption in the study areas This study also revealed that more males in the urban area are being influenced by tobacco marketing to smoke
