Sandals From Coahuilo Caves Studies In Precolumbian Art And Archaeology:

Sandals from Coahuila Caves Walter Willard Taylor, 2003 **Sandals of the Basketmaker and Pueblo Peoples**

Lynn Shuler Teague, Dorothy Koster Washburn, 2013-06-01 The decorated sandals worn by prehistoric southwesterners with their complex fiber structures and designs have been dissected described and interpreted for a century Nevertheless these artifacts remain mysterious in many respects Teague and Washburn examine these sandals as sources of information on the history of the people known as the Basketmakers The unique sandals of early southwestern farmers appear in Basketmaker II and reach their greatest elaboration with the complex fabric structures and colorbanded designs of Basketmaker III The appearance of this footwear coincides with the transition to fully sedentary maize agriculture The authors address the origins of these sandals and what they may reveal about population movements onto and around the Colorado Plateau and about the cosmology of early farmers

Archaeological Anthropology James M. Skibo, Michael W. Graves, Miriam T. Stark, 2007 For centuries the goal of archaeologists was to document and describe material artifacts and at best to make inferences about the origins and evolution of human culture and about prehistoric and historic societies During the 1960s however a number of young primarily American archaeologists including William Longacre rebelled against this simplistic approach Wanting to do more than just describe Longacre and others believed that genuine explanations could be achieved by changing the direction scope and methodology of the field What resulted was the New Archaeology which blended scientific method and anthropology It urged those working in the field to formulate hypotheses derive conclusions deductively and most important to test them While over time the New Archaeology has had its critics one point remains irrefutable archaeology will never return to what has since been called its state of innocence In this collection of twelve new chapters four generations of Longacre protégés show how they are building upon and developing but also modifying the theoretical paradigm that remains at the core of Americanist archaeology The contributions focus on six themes prominent in Longacre's career the intellectual history of the field in the late twentieth century archaeological methodology analogical inference ethnoarchaeology cultural evolution and reconstructing ancient society More than a comprehensive overview of the ideas developed by one of the most influential scholars in the field however Archaeological Anthropology makes stimulating contributions to contemporary research The contributors do not unequivocally endorse Longacre's ideas they challenge them and expand beyond them making this volume a fitting tribute to a man whose robust research and teaching career continues to resonate

Basketry Technology J. M. Adovasio, 2016-09-16 Basketry Technology first published in 1977 is the only comprehensive guide for archaeologists anthropologists art historians and collectors for identifying and analyzing ancient baskets and basket fragments Long out of print this volume is again available with an extensive new introduction by the original author that summarizes the extensive work done in this area over the past 35 years The volume describes proper field and lab techniques for recovery of specimens and offers a systematic methodology for identifying and interpreting twined coiled and plaited

basket samples It then uses Canyon de Chelly as an example of how to process a large basketry assemblage properly In addition to 200 illustrations the book includes a variety of sample forms to use in describing and analyzing ancient baskets

Taube, Dumbarton Oaks, 2004 *Olmec Art at Dumbarton Oaks* presents the Olmec portion of the Robert Woods Bliss Collection of Pre Columbian Art It illustrates all thirty nine Olmec art objects in color plates and includes many complementary and comparative black and white illustrations and drawings The body of Pre Columbian art that Robert Bliss carefully assembled over a half century between 1912 and 1963 amplified only slightly since his death is a remarkably significant collection In addition to their aesthetic quality and artistic significance the objects hold much information regarding the social worlds and religious and symbolic views of the people who made and used them before the arrival of Europeans in the New World This volume is the second in a series of catalogues that will treat objects in the Bliss Pre Columbian Collection The majority of the Olmec objects in the collection are made of jade the most precious material for the peoples of ancient Mesoamerica from early times through the sixteenth

century Various items such as masks statuettes jewelry and replicas of weapons and tools were used for ceremonial purposes and served as offerings Karl Taube brings his expertise on the lifeways and beliefs of ancient Mesoamerican peoples to his study of the Olmec objects in the Bliss collection His understanding of jade covers a broad range of knowledge from chemical compositions to geological sources to craft technology to the symbolic power of the green stone Throughout the book the author emphasizes the role of jade as a powerful symbol of water fertility and particularly of the maize plant which was the fundamental source of life and sustenance for the Olmec The shiny green of the stone was analogous to the green growth of maize This fundamental concept was elaborated in specific religious beliefs many of which were continued and elaborated by later Mesoamerican peoples such as the Maya Karl Taube employs his substantial knowledge of Pre Columbian cultures to explore and explicate Olmec symbolism in this catalogue

Prophet, Pariah, and Pioneer Allan Maca, Jonathan Reyman, William Folan, 2010 Taylor made enemies and had difficulty implementing his research agenda for reasons the contributors to this volume explore in detail but the fact is that the shortcomings of early twentieth century approaches continue to haunt archaeology Many perspectives that are seen as innovative today owe an intellectual debt to Taylor Linda Cordell From The Foreword
