Bridging the River of Hatred Mary M. Stolberg,2002 Bridging the River of Hatred portrays the career of George Clifton Edwards Jr Detroit s visionary police commissioner whose efforts to bring racial equality minority recruiting and community policing to Detroit s police department in the early 1960s met with much controversy within the city s administration At a crucial time when the Civil Rights movement was gaining momentum and hostility between urban police forces and African Americans was close to eruption Edwards chose solving racial and urban problems as his mission Incorporating material from a manuscript that Edwards wrote before his death supplemented by historical research Stolberg provides a rare case study of problems in policing the impoverishment of American cities and the evolution of race relations during the turbulent 1960s Edwards vision and hope for Detroit gives depth to the national view of Detroit as a symbol of urban decline and offers lessons to be applied to current social and urban problems Architectural Missionary Steven C. Brisson,2021-09-01 The first and most prolific professional architect to reside permanently in Michigan s Upper Peninsula D Fred Charlton used the local Lake Superior sandstone to craft the distinctive style found in buildings throughout Michigan s Upper Peninsula Born in England and trained there as a civil engineer Charlton came to Detroit in the late 1870s seeking work as a draftsman Much like his peers of the time he had no formal training as an architect and learned his trade by working at several prominent firms The last Scott Company sent him to Marquette in 1887 to open a branch office Three years later Charlton opened his own firm and over the next twenty eight years he designed more than four hundred buildings including residences commercial structures schools courthouses and churches throughout the region which offer an invaluable insight into the tastes of Americans before the World War I and provide a unique vantage point for studying the evolution of the architectural profession Deftly adapting national trends he provided the communities of the Upper Peninsula with modern structures worthy of any place in the nation Many of his buildings remain to this day monuments to the skill of this English born architect who made a place for himself upon the shores of Lake Superior Anyone interested in architecture

and in the history of the upper Midwest will find this read both fascinating and informative

Company Suburbs Sarah Fayen Scarlett, 2023-08-18 Winner of the 2022 Fred B Kniffen Book Award from the International Society Landscape Place and Material Culture and the 2023 Abbott Lowell Cummings Award from the Vernacular Architecture Forum Michigan's Keweenaw Peninsula juts into Lake Superior pointing from the western Upper Peninsula toward Canada Native peoples mined copper there for at least five thousand years but the industrial heyday of the Copper Country began in the late nineteenth century as immigrants from Cornwall Italy Finland and elsewhere came to work in mines largely run from faraway cities such as New York and Boston In those cities suburbs had developed to allow wealthier classes to escape the dirt and grime of the industrial center In the Copper Country however the suburbs sprang up nearly adjacent to mines mills and coal docks Sarah Fayen Scarlett contrasts two types of neighborhoods that transformed Michigan's mining frontier between 1875 and 1920 paternalistic company towns built for the workers and elite suburbs created by the region's network of business leaders Richly illustrated with drawings maps and photographs *Company Suburbs* details the development of these understudied cultural landscapes that arose when elites began to build housing that was architecturally distinct from that of the multiethnic workers within the old company towns They followed national trends and created social hierarchies in the process but also uniquely incorporated pre-existing mining features and adapted company housing practices This idiosyncratic form of suburbanization belies the assumption that suburbs and industry were independent developments Built environments evince interrelationships among landscapes people and power Scarlett's work offers new perspectives on emerging national attitudes linking domestic architecture with class and gender identity *Company Suburbs* complements scholarship on both industrial communities and early suburban growth increasing our understanding of the ways hierarchies associated with industrial capitalism have been built into the shared environments of urban areas as well as seemingly peripheral American towns

Magnaghi, 2017 Get ready to discover the rich history of the Upper Peninsula of Michigan From its earliest days it has evoked words of love beauty mystery and legend Drawing on oral histories newspapers census data archives and libraries Russell M Magnaghi has written the seminal history of a very special place as seen through the eyes of the men and women who have lived here the famous and not so famous For the first time in over a century a complete history of the U P from prehistoric origins to the

present is available The Upper Peninsula of Michigan A History is an extraordinary book celebrating this unique sense of place Back cover **Angels in the Architecture** Heidi Johnson,2004-02-20 An intimate photographic journey into 115 years of history inside a nineteenth century asylum In the nineteenth century perhaps no approach to mental illness was more compassionate than that of hospital administrator Thomas Story Kirkbride whose asylum designs integrated beauty and nature as a method to treat patients The Northern Michigan Asylum in Traverse City Michigan was one of the last of nearly two hundred such architecturally intriguing asylums Founded in 1885 under the principle beauty is therapy the Northern Michigan Asylum closed in 1989 and today stands as a haunting reminder of this lost era Angels in the Architecture is a photographic study of this institution s one hundred year history Heidi Johnson s photographs of the building today are juxtaposed with rare images from private collections and state archives Johnson has captured Kirkbride s spirit of compassion of angels in the architecture in a book that conveys the human element of mental illness with beauty and integrity Park Science ,2012 **A Storied Wilderness** James W. Feldman,2011-07-01 The Apostle Islands are a solitary place of natural beauty with red sandstone cliffs secluded beaches and a rich and unique forest surrounded by the cold blue waters of Lake Superior But this seemingly pristine wilderness has been shaped and reshaped by humans The people who lived and worked in the Apostles built homes cleared fields and cut timber in the island forests The consequences of human choices made more than a century ago can still be read in today s wild landscapes A Storied Wilderness traces the complex history of human interaction with the Apostle Islands In the 1930s resource extraction made it seem like the islands natural beauty had been lost forever But as the island forests regenerated the ways that people used and valued the islands changed human and natural processes together led to the rewilding of the Apostles In 1970 the Apostles were included in the national park system and ultimately designated as the Gaylord Nelson Wilderness How should we understand and value wild places with human pasts James Feldman argues convincingly that such places provide the opportunity to rethink the human place in nature The Apostle Islands are an ideal setting for telling the national story of how we came to equate human activity with the loss of wilderness characteristics when in reality all of our cherished wild places are the products of the complicated interactions between human and natural history Watch the book trailer <https://www.youtube.com/watch?v=fREcWkA6oHs>
