

Second Language Acquisition

Language Acquisition vs. Language Learning

Language Acquisition	Language Learning
Children acquire a language that is normally spoken in the surrounding community	Adults learn a language that is NOT normally spoken in the surrounding community
Acquisition takes place naturally in communicative situations with others who know the language	Learning is a more conscious process of accumulating knowledge of language in an institutional setting
Acquisition is relatively faster; it takes place with no language system in the background	Learning is slower; it takes place against an already acquired language system
