Shanghai Revolution And Development In An Asian Metropolis:

Shanghai Christopher Howe,1981-05-07 This book is a comprehensive study of the way in which old Shanghai was transformed and developed by the Communist Party between 1949 and the later 1970s **China's Urban Future and the Quest for Stability** Rebecca Clothey,Richardson Dilworth,2020-04-16 In recent decades China has used urbanization as an economic development tool to reconstruct the country s traditional institutions culture and society The downside of these many changes is that they have presented the country s government with a massive challenge how can it maintain basic stability China s Urban Future and the Quest for Stability examines the complexities of Chinese cities Together the essays in this book explore how the relatively recent onset of urbanization has altered the country and how that experience is similar to and distinct from developments in other times and places Each chapter analyzes one facet of China s transformation focusing on three main themes urbanization and the rapid growth of Chinese cities mobility in both the abstract and the literal sense and marginalization evidenced by growing residential segregation in cities and diminishing access to education health care and jobs Underlying these themes is the issue of governance the systems by which a state attempts to maintain control and achieve its ends often in ways that differ significantly from what one might expect An up to date concise and multidisciplinary collection China s Urban Future and the Quest for Stability discusses the social economic and political forces at work in the urbanization of a modern superpower **Cultures of Uneven and Combined Development**

China and the Global Economy Since 1840 L. Aiguo,2016-04-30 This is a study of the long run evolution of the relationship between China and the world economy The book presents an original interpretation of the country s socio economic processes in the past 150 years focusing on China s interaction with the expanding capitalist world economy The author argues that the general thrust of China s quest for development or modernization has been to catch up with the wealthy nations of the West and goes on to explain the changing paths and outcomes The book proceeds chronologically from China s mid nineteenth century incorporation to the world economy starting from a semi colonial state to the Maoist state led industrialization after 1949 and to the post Mao liberalization and reintegration By carefully examining the patterns of development in these three major periods of the nation s history it addresses fundamental issues pertaining to the making of

Chapman,Ashok K. Dutt,2019-01-15 First published in 1999 this volume begins with a panoramic survey by Nigel Harris of the drama of Asian Urbanization based on the inaugural plenary lecture he gave to the 5th Asian Urbanization Conference held in London In the following chapters many experts and practitioners from different countries and cities provide a stimulating portrayal of the processes and outcomes of one of the greatest shifts of population not just absolutely but proportionately as well ever to have occurred in human history Asia includes more than half the world s population but apart from the Tiger economies and Japan it is still overwhelmingly rural In the last decade or so urbanization has really begun to take off and the shift of population to the cities represents one of the greatest population movements the planet has ever seen By 2030 more than 50% of Asia s population will be urban and between now and then more than 500 million people in Asia will have moved looking for jobs housing food and water They will be both part of a problem and most of the solution building around them the cities they will live in **Remaking the Chinese City** Joseph W. Esherick,2001-10-31 In China today skyscrapers tower over ancient temples freeways deliver lines of cars and tour buses to imperial palaces cinema houses compete with old theaters featuring Peking Opera The disparity evidenced in the contemporary Chinese cityscape can be traced to the early decades of the twentieth century when government elites sought to transform cities into a new world that would be at once modern and distinctly Chinese Remaking the Chinese City aims to capture the full diversity of recent Chinese urbanism by examining the modernist transformations of China s cities in the first half of the twentieth century Collecting in one place some of the most interesting and exciting new work on Chinese urban history this volume presents thirteen essays discussing ten Chinese cities the commercial and industrial center of Shanghai the old capital Beijing the southern coastal city of Canton the interior s Chengdu the tourist city of Hangzhou the utopian New Capital built in

Manchuria during the Japanese occupation the treaty port of Tianjin the Nationalists capital in Nanjing and temporary wartime capitals of Wuhan and Chongqing Unlike past treatments of early twentieth century China which characterize the period as one of failure and decay the contributors to this volume describe an exciting world in constant and fundamental change During this time the Chinese city was remade to accommodate parks and police paved roads and public spaces Rickshaws trolleys and buses allowed the growth of new downtowns Department stores theaters newspapers and modern advertising nourished a new urban identity Sanitary regulations and traffic laws were enforced and modern media and transport permitted unprecedented freedoms Yet despite their fondness for things Western and modern early urban planners envisioned cities that would lead the Chinese nation and preserve Chinese tradition The very desire for modernity led to the construction of a visible and accessible national past and the imagining of a distinctive national future In their investigation of the national capitals of the period the essays show how cities were reshaped to represent and serve the nation To promote tourism traditions were invented and recycled for the pleasure and edification of new middle class and foreign consumers of culture Abundantly illustrated with maps and photographs *Remaking the Chinese City* presents the best and most current scholarship on modern Chinese cities Its thoroughness and detailed scholarship will appeal to the specialist while its clarity and scope will engage the general reader Contributors Michael Tsin on Canton Ruth Rogaski and Brett Sheehan on Tianjin David Buck on Changchun Kristin Stapleton on Chengdu Liping Wang on Hangzhou Madeleine Dong on Beijing Charles Musgrove on Nanjing Stephen MacKinnon on Wuhan Lee MacIsaac on Chongqing and Jeffrey Wasserstrom and David Strand with concluding essays

Britain in China Robert Bickers, 2017-03-01 This is a study of Britain's presence in China both at its peak and during its inter war dissolution in the face of assertive Chinese nationalism and declining British diplomatic support Using archival materials from China and records in Britain and the United States the author paints a portrait of the traders missionaries businessmen diplomats and settlers who constituted Britain in China challenging our understanding of British imperialism there Bickers argues that the British presence in China was dominated by urban settlers whose primary allegiance lay not with any grand imperial design but with their own communities and precarious livelihoods This brought them into conflict not only with the Chinese population but with the British imperial government The book also analyzes the formation and maintenance of settler identities and then investigates how the British state and its allies brought an end to the reign of freelance settler imperialism on the China coast At the same time other British sectors missionary and business renegotiated their own relationship with their Chinese markets and the Chinese state and distanced themselves from the settler British

Shanghai Yue-man Yeung, 1996 As China's largest city best known for its pre eminent achievements in the early part of the twentieth century Shanghai grew modestly in comparison with southern China after the adoption of China's open policy in 1978 With the 1990 announcement of Pudong as an area for special development Shanghai has raced ahead seemingly on its way to an economic and cultural resurgence that is likely to accelerate development and modernization in

In the Images of Development Tridib

Banerjee,2021-06-08 The urban legacy of the Global South since the colonial era and how sustainable development and environmental and social justice can be achieved Remarkably little of the expansive literature on development and globalization considers actual urban form and the physical design of cities as outcomes of these phenomena The development that has shaped historic transformations in urban form and urbanism and the consequent human experiences remains largely unexplored In this book Tridib Banerjee fills this void by linking the idea of development with those of urbanism urban form and urban design focusing primarily on the contemporary cities in the developing world the Global South and their intrinsic prospects in city design Further he examines the endogenous possibilities for the future design of these cities that may address growing inequality and the environmental crisis Banerjee deftly traces the urban legacy of the Global South from the beginning of the colonial era closely examining the economic political and ideological forces that influenced colonial and postcolonial development drawing from relevant experiences of different cities in the developing world and discussing the arguments for the historic parity of these cities with their Western counterparts Finally Banerjee considers essential notions of future city design that are grounded in the critical challenges of sustainable development equity environmental and social justice and diversity and how such outcomes can be achieved This book serves as the opening of a long overdue conversation among design development and planning scholars and practitioners and those interested in the urban development of the Global South

Unstately Power: Local causes of China's economic reforms Lynn T.

White,1998 China s dramatic reforms are usually said to have been caused by the policies of state leaders under Deng Xiaoping This fascinating new study by one of the West s leading authorities on contemporary China shows however that reforms began and are maintained by local networks They emerged first in the economy partly as unintended results of previous policies Agricultural extension in Mao Zedong s time freed so much labor from the land in rich areas such as the Shanghai delta that peasant leaders set up rural industries to employ clients Many of these leaders were avowed state cadres but they acted for local constituencies more than for Beijing Their initiatives can be documented in the early 1970s long before the 1978 proclamation of new enterprises which the central bureaucracy could not monitor taking materials and markets away from state industries This caused socialist control of input prices and commodity flows to collapse by the mid

1980s As a result shortages and inflation bedeviled the economy the state ran deficits management decentralized local banks proliferated and immigration to cities soared **China Watching** Robert Ash,David Shambaugh,Seiichiro Takagi,2007-01-24 An international team of contributors analyzes the state of European Japanese and American scholarship on China over the last decade exploring in depth the main subjects and trends in research being done on contemporary Chinese politics economy foreign affairs and security studies *The Cambridge History of China* Roderick MacFarquhar,John King Fairbank,1987 Mao's China and After Maurice Meisner,1999-04 Presents a revised account of the revolution of 1966 1969 Examines the social and political consequences of the upheaval Deng Xiaoping Democracy movement Tienanmen Incident Mao Zedong The hundred flowers Great Leap Forward **Hong Kong as an International Financial Centre** Dr Catherine Schenk,2001-03-15 Based on previously unpublished archival records this book studies the origins of Hong Kong s post war rise to global prominence It explores the expansion of the gold market stock market banking system foreign exchange market and insurance in the years 1945 1965 This book makes a significant contribution to our understanding of the developme **International Handbook of Globalization and World Cities** Ben Derudder,2012-02-01 This Handbook offers an unrivalled overview of current research into how globalization is affecting the external relations and internal structures of major cities in the world By treating cities at a global scale it focuses on the stretching of urban functions beyond specific place locations without losing sight of the multiple divisions in contemporary world cities The book firmly bases city networks in their historical context critically discusses contemporary concepts and key empirical measures and analyses major issues relating to world city infrastructures economies governance and divisions The variety of urban outcomes in contemporary globalization is explored through detailed case studies Edited by leading scholars of the Globalization and World Cities GaWC Research Network and written by over 60 experts in the field the Handbook is a unique resource for students researchers and academics in urban and globalization studies as well as for city professionals in planning and policy **Urban Development in China under the Institution of Land Rights** Jieming Zhu,2019-09-17 How have the development and redevelopment of China s cities since the early 1950s transformed the settlements and fortunes of a fifth of the world s population Rapid urbanization since the 1980s has changed the nation from a rural society to an urban one marking it as one of the most significant transformations in history As a country with severe land scarcity land resources are intensively contested for during urbanization under the new regime of marketization This book focuses on the impact of the institution of land rights that have transitioned from private ownership to socialist state ownership and subsequently to public land leasing in the urban domain and to collective ownership in rural areas In the context of defining the relationship between the state and the market the gradualist transition of land rights gives rise to intriguing processes of place making The elaboration of these processes will engage several revealing conceptual notions land as a means of production land commodification ambiguous land rights incomplete land rights trading land use rights for

land development rights institutional uncertainty land rent seeking and dissipating local developmental state danwei enterprises and more The newly created landed interests are embedded intricately within the urban spatial structure This book would especially be of interest to scholars interested in developmental economics urban planning geography public policies public management and sociology and also practitioners focusing on development and planning

China's Urban Space Terry McGee, George C.S. Lin, Mark Wang, Andrew Marton, Jiaping Wu, 2007-10-18 China's urban growth is unparalleled in the history of global urbanization and will undoubtedly create huge challenges to China as it modernizes its society Adopting an interdisciplinary approach this book presents an overview of the radical transformation of China's urban space since the 1970s arguing that to study the Chinese urbanization process one must recognize the distinctive political economy of China After a long period as a planned socialist economy China's rapid entry into the global economy has raised suggestions that modernization in China will inevitably result in urban patterns and features like those of cities in developed market economies This book argues that this is unlikely in the short term because processes of urban transition in China must be interpreted through the lens of a unique and unprecedented juxtaposition of socialism and the market economy which is leading to distinctive patterns of Chinese urbanization Richly illustrated with maps diagrams and in depth case studies this book will be an invaluable resource to students and scholars of urban economics and policy geography and the development of China
