## **Shaping China's Future In World Affairs The Role Of The United States:**

**Shaping China's Future In World Affairs** Robert G Sutter, 2019-06-26 This book considers Chinese foreign policy and China's future role in world affairs in the context of the country's recent past. Robert Sutter shows that although it appears to be in U.S. interests for post-Mao leaders to continue moving toward international norms, a post-Deng leadership backed by growing economic and military power and reflecting profound changes in China's economy and society could move in markedly different directions. Most foreign powers appear willing to accommodate China, avoiding actions that could prompt a sharp shift in Chinese foreign policy, but Sutter argues that current U.S. policy intrudes on so many issues that are particularly sensitive for Beijing and for China's future that it represents perhaps the most critical variable determining how China will position itself in world affairs. Concluding that there is no guarantee the United States will use this influence wisely, Sutter examines the uncertainty and unpredictability of U.S. foreign policy in the post-Cold War environment that work against the creation of an effective U.S. policy toward China.

**Shaping China's Future in World Affairs: The U.S. Role**, 1996 The author analyzes the key factors that shape China's domestic and international policies. He outlines a regime that is pragmatic in its international political and economic relations but highly protective on territorial and sovereignty issues, noting that it is a regime in transition and giving interpretations of where that transition might be headed. The author reviews U.S. objectives and courses of action and suggests that Chinese leaders will have as much difficulty predicting the future course of American policy as the other way around. He concludes with several useful guidelines for those charged with formulating policy with respect to China.

**Shaping China's Future in World Affairs** ROBERT G. SUTTER, 2019-06-30 This book considers Chinese foreign policy and China's future role in world affairs in the context of the country's recent past. [Shaping China's Future in World Affairs: the U. S. Role](#) Robert G. Sutter, 2013-01-31 In April 1996 the Army War College's Strategic Studies Institute held its Seventh Annual Strategy Conference. This year's theme was China Into the 21st Century: Strategic Partner and or Peer Competitor. Robert G. Sutter, a Senior Specialist in International Policy with the Congressional Research Service of the Library of Congress, sets the scene for his discussion of the U.S. role in China's future by providing a

comprehensive analysis of the key factors that shape China's domestic and international policies. He outlines a mixed picture of a regime today that is pragmatic in its international political and economic relations but highly protective on territorial and sovereignty issues. He also notes that it is a regime in transition and articulates the various interpretations of where that transition might be headed. But if understanding China is vital to effective U.S. policy, so too are achieving consensus on U.S. objectives and framing coherent courses of action. On this count, Dr. Sutter finds several competing outlooks at work both within and outside the U.S. Government. His review of these suggests that Chinese leaders will have as much difficulty predicting the future course of American policy as the other way around. Dr. Sutter concludes his paper with several useful guidelines for those charged with formulating instrumental policy with respect to China. These insights complete a thorough survey of the major issues, interactions, and choices which will shape the U.S.-China strategic relationship.

**China's Foreign Aid and Investment Diplomacy, Volume II** John F. Copper, 2016-04-29 Today, by many accounts, China is the world's foremost purveyor of foreign aid and foreign investment to developing countries. This is the product of China's miracle economic growth over a period of more than three decades, together with China's drive to become a major player in world affairs and accomplish this through economic rather than military means. This three-volume work is the first comprehensive study of China's aid and investment strategy to trace how it has evolved since Beijing launched its foreign aid diplomacy at the time of the founding of the People's Republic of China in 1949. Volume II provides an analysis of China's foreign aid and investment to countries and regional organizations on the Asian continent, covering all of its major sub-regions during the period from 1950 to the present day. Copper considers motivating factors such as the Korean War, the Vietnam War, and China's desire to challenge the West, and later the Soviet Union. Also important to China and driving its aid and investment was China's pursuit of Communist Bloc solidarity, a search for secure borders, and competition with India for influence in the Third World. Securing its imports of energy and raw materials and markets for its products came later. Marginalizing Taiwan and defeating it diplomatically constituted another goal of China's foreign aid and foreign investment analyzed here.

**The US Policy Making Process for Post Cold War China** Wenzhao Tao, 2017-07-13 Combining a study of American Think Tanks and a study of American diplomatic policy on China following the Cold War, this book explores in detail the policy making process, procedures, and mechanisms, as well as the roles of various interest groups in the policy making process for China-related policies. Further, it dissects the policy making process with regard to selected sensitive policies such as the US diplomatic policy on Taiwan, China-US trade policy on China, US human rights policy on China, and US environmental and energy policy on China, and analyzes the function and influence of the American Think Tanks in the policy debates. Characterized by its high theoretical value, wealth of historical materials, and painstaking analysis, the book is not only of important academic value but also offers a valuable reference guide to support the practical work of related departments in the Chinese government.

**Mao Zedong & China's Foreign Policy** Amrita Jash, 2025-07-22 This book analyses China's foreign policy from 1949 to

1976 through a cognitive perceptual lens emphasise Mao Zedong's central role as the primary decision making authority. Moving beyond realist frameworks it highlights how Mao's ideological worldview shaped by his theory of contradictions, revolutionary zeal and use of historical analogies drove China's foreign policy particularly in relation to Vietnam. His subjective interpretation of global affairs reinforced by Marxist Leninist principles and China's historical identity guided key strategic decisions. The study underscores the importance of individual leaders' beliefs, perceptions and psychological traits in shaping foreign policy, offering broader implications for understanding international relations through cognitive and psychological approaches.

**China's Economic Future** Joint Economic Committee Congress of the United States, 2016-12-05. This is the latest Joint Economic Committee volume on the Chinese economy. With the current state of US-China relations and Hong Kong's accession in 1997, the study should provide policy makers in the USA with a useful tool in guiding economic policy toward China.

**China And The World** Samuel S Kim, 2018-02-02. As the postwar international system continues its dramatic transformation, the fundamental question of what role China will play is becoming increasingly central. Contributors to the volume focus on the developments of the post Tiananmen years, addressing the issues raised by China's expanding and increasingly complex relationships with a rapidly changing global environment. They consider such questions as: What is the principal challenge of post Tiananmen foreign policy? How will China cope with the call for a more peaceful, equitable, democratic and ecological world order? How has the nexus between China and the world changed in this transition period and why? What are the implications for China's future and for the future of the rest of the world? Combining a broad theoretical framework with specific case studies, this text tackles themes that have long puzzled Westerners. Seeking the often elusive sources of Chinese foreign policy, the contributors assess the relative influences of domestic and foreign factors in shaping policy goals. They also examine the changes and continuities that have characterized Chinese foreign relations over the years, identifying the patterns underlying China's interactions with the major global actors and its policies on specific international issues. Special attention is paid to the word-deed and at times word-word disjuncture in Chinese foreign relations, with several chapters probing the discrepancies between rhetoric and reality, policy pronouncements and policy performance, and intent and outcome. The human rights component of China's foreign policy and China's foreign policy options for the last decade of the century are also discussed. New to this revised and updated edition of *China and the World* are discussions concerning Chinese foreign policies and international relations theories, the relationship between China and the Third World, and China's environmental diplomacy.

**China's Foreign Aid and Investment Diplomacy, Volume III** John F. Copper, 2016-04-29. Today, by many accounts, China is the world's foremost purveyor of foreign aid and foreign investment to developing countries. This is the product of China's miracle economic growth over a period of more than three decades, together with China's drive to become a major player in world affairs and accomplish this through economic rather than military means. This three-volume work is the first comprehensive study of China's aid and investment strategy to trace how it

has evolved since Beijing launched its foreign aid diplomacy at the time of the founding of the People's Republic of China in 1949. Volume III offers an analysis of China's foreign aid and investment to countries outside of Asia in Africa, Europe, the Middle East, Latin America, and Oceania. Africa was and is the most important of these regions and it is given special treatment. In the concluding chapter, Copper reviews the findings of previous volumes, delineates China's most important victories and setbacks, and notes opposition to and criticism of China's aid and investment diplomacy. Copper gives evidence that will be shocking to some of the reality that China's financial help to developing countries is one of the most salient trends in international politics and constitutes a formidable challenge to the United States, Japan, and Europe, as well as international financial institutions. *China's Economic Future*, 1996. *China's Foreign Relations*, Denny Roy, 1998. In this timely text, Denny Roy shows how the drive for security and power underlying Chinese foreign policy is reinforced by other important factors, including China's internal political struggles and unique historically driven perceptions of international affairs. Providing a wide-ranging assessment of China's foreign policy, the author explores the PRC's relationships with key international organizations and countries, including the United States, Japan, Russia, Korea, India, and the Southeast Asian states.

**China's Foreign Aid and Investment Diplomacy, Volume I** John F. Copper, 2016-04-29. Today, by many accounts, China is the world's foremost purveyor of foreign aid and foreign investment to developing countries. This is the product of China's miracle economic growth over a period of more than three decades, together with China's drive to become a major player in world affairs and accomplish this through economic rather than military means. This three-volume work is the first comprehensive study of China's aid and investment strategy to trace how it has evolved since Beijing launched its foreign aid diplomacy at the time of the founding of the People's Republic of China in 1949. Volume I examines the definitions, origins, nature, and scope of foreign aid and investment by other countries. Using that background, John F. Copper then traces China's financial assistance to developing countries from the Mao period, when China gave meaningful foreign aid despite its own economic struggles, through the beginning of China's post-1978 economic boom and during subsequent decades of rapid economic growth. Copper shows that China has a more salient history in giving foreign assistance than any other country in the world, while China's objectives in giving foreign assistance have changed markedly over time. China has always been driven by efforts to realize its foreign policy objectives and expand China's external influence.

**Taiwan's Security in the Post-Deng Xiaoping Era** Martin L. Lasater, Peter Kien-Hong Yu, 2023-09-01. Originally published in 2000, *Taiwan's Security in the Post-Deng Xiaoping Era* analyses the many domestic and international factors comprising Taiwan's security situation in the late 1990s and early 21st Century. The security of Taiwan remains of international strategic concern, and the military situation in the Taiwan Strait is increasingly volatile. Nearly 25 years after this book was first published, this detailed study concludes that Taiwan's overall security will become increasingly dependent on external factors and that the most important contribution Taipei can make to its own security, other than military preparation, is political astuteness.

**China's Rise in**

**Asia** Robert G. Sutter, 2005-04-14 China's rapid military and economic growth has fuelled a steady stream of analysis and debate about the PRC's motivations and objectives regarding the United States. Yet until now there has not been a sustained single authored assessment in English of China's expanding influence in Asia in the post Cold War period. Respected analyst Robert G. Sutter draws on his extensive experience in the region to explore the current debate on China's rise and its meaning for U.S. interests by examining in detail China's current and historical relations with the key countries of Asia. He finds a range of motivations underlying China's recent initiatives. Some incline Chinese policy to be cooperative with the United States, others to be competitive and confrontational. Sutter's nuanced study shows that U.S. power and influence continue to dominate Asia and play a critical role in determining China's cooperative or confrontational approach. He argues that the Bush administration's policies of firmness and cooperation have encouraged China to stay on a generally constructive track in the region.

**Taiwan Conundrum** Martin L. Lasater, 2019-06-18 The Taiwan issue in Sino-American relations remains one of the most complex, controversial, and even dangerous policy dilemmas facing the United States in the post Cold War period. In an era of growing nationalism on mainland China, Taiwan tremendous strain is being placed on relations across the Taiwan Strait. As demonstrated by the 1996 Taiwan Strait Crisis.

**U.S. Army War College Guide to Strategy**, *In the Eyes of the Dragon* Yong Deng, Fei-Ling Wang, 2000-01-01 Presenting new and invaluable Chinese perspectives on international relations in general and Beijing's foreign policy in particular, this work offers the first balanced and thoroughly researched analysis by Chinese scholars. Drawing on original Chinese sources and interviews, *In the Eyes of the Dragon* explores Chinese views on sovereignty, national interest, security, multilateralism, international human rights, nuclear nonproliferation, Taiwan, and the United States. Illuminating how China views the post Cold War world and its place therein, the contributors enhance our understanding of the nationalist sentiments driving the PRC's foreign policy and elevate the debate over China to a higher, more sophisticated and productive level.

**The Future of China and Northeast Asia** Tae-Hwan Kwak, Melvin Gurtov, 1997 **Foreign Relations of the PRC** Robert G. Sutter, 2018-07-12 Now in a fully updated edition, this cogent but comprehensive book examines the international relations of the People's Republic of China since its founding in 1949. Noted scholar Robert G. Sutter provides a balanced assessment of the country's recent successes and advances as well as the important legacies and constraints that hamper it, especially in nearby Asia, long the focus of China's foreign policy attention. Sutter demonstrates how Beijing has carefully created an image of a China that follows consistent policies based on morally correct principles, but its record shows repeated episodes of sometime surprising change and frequent use of violence, intimidation, and coercion. China's leaders, he argues, still fail to manage the desire for productive foreign relations with their aspirations to build Chinese security and sovereignty interests. Image building efforts condition Chinese public and elite opinion to be extraordinarily sensitive, self-righteous, and often alarmist in dealing with the many disputes China has with its Asian neighbors and the United States. Advances that the PRC has made in other parts of the

world focus mainly on commercial interests limiting its actual impact on world affairs Sutter shows readers how to use China's rise in nearby Asia as a reliable barometer of how important and effective the country will actually become internationally
