## Sharing And Helping:

**Sharing** ,1981      Intergroup Helping Esther van Leeuwen,Hanna Zagefka,2017-05-17 The aim of this volume is to provide an overview of research from different psychological domains with regards to intergroup helping arguing for intergroup helping as a research area in and of itself Historically research on intergroup relations has largely overlooked helping between groups which combined with the fact that most of the research on altruism and helping has focused on individuals meant that intergroup helping was primarily looked at as deriving from negative intergroup interactions such as ingroup bias or discrimination However over the last decade a small but growing group of researchers started to investigate intergroup helping as a positive social act occurring between and amongst groups With contributions from these expert researchers this volume makes the case that intergroup helping should be studied as a phenomenon in and of itself not as a mere expression of negative intergroup behaviour To advance this argument the first section covers traditional research approaches in which the willingness to help other groups is construed as a form of discrimination Then the second section looks at the reasons why people may be motivated to help other groups Finally the last section explores intergroup helping in real world settings looking at natural disaster responses and the role of morality among other topics demonstrating that intergroup relations can be truly positive Thus Intergroup Helping The Positive Side of Intergroup Behavior informs researchers in positive and group relations psychology about the current state of affairs of research on intergroup cooperation and helping and sets out an agenda for further exploration Tapping into a current trend towards positive psychology it moves away from the traditional view within intergroup relations research of the group as a source of trouble and instead focuses on truly positive intergroup relations with the ultimate goal of promoting real positive behaviour that breaches the intergroup divide      Sharing Experience, Strength & Hope (SESH) Nar-Anon Family Groups,2009-06-09 Nar Anon members share their experience strength and hope in writing This daily reader carries the message of Nar Anon recovery to those who suffer the effects of another s addiction The Nar Anon Family Groups are a worldwide fellowship for those affected by someone else s addiction As a Twelve Step Program we offer our help by sharing our experience strength and hope      Teaching Social Behaviour David Warden,Donald Christie,2013-11-26 First Published in 1998 This book is about the development of children s social behaviour about their abilities to engage in social interactions and to form social relationships More specifically it is about the development of good and bad or prosocial and antisocial behaviours Its aim is to contribute to children s social education by providing teachers with a set of classroom tasks and activities which will foster children s prosocial behaviour by encouraging them on a regular basis to discuss interpersonal feelings and behaviours and to consider the feelings and points of view of other children      Successful Group Care Martin Wolins,2017-07-12 Edited by one of the leading authorities in international child care this sourcebook provides valuable insights from international experiments in group child care The selections written by distinguished international child care experts explore a broad

range of successful group care settings in Austria Great Britain Israel Mexico Poland the Soviet Union the United States and Yugoslavia Much of the material was previously unknown to American professionals at the time of the original publication who for the most part held group care in disrepute Today there is a growing interest in group programs for children of various ages and in settings ranging from day care programs to institutions and schools of various types Successful Group Care is divided into six major parts The first of which is a general review of successful group care drawing upon material that appears later in the book Subsequent sections present historical and philosophical issues in group care including boarding schools in the former Soviet Union and the Israeli Kibbutz Research studies analyzing the negative and positive effects of group care for young children and several teenage group environments are discussed particularly with regard to their peer effect on values and moral character The project also deals with group care of disturbed children The book ends with the most complete bibliography on the subject including some of the most significant works in Polish Russian German and Hebrew This book will be invaluable to all those interested in and involved in group child care social workers particularly in child welfare developmental child psychologists early childhood educators child psychiatrists family sociologists child care workers day care personnel and students in social work courses in childhood and adolescence early childhood education developmental psychology and in training courses for day care personnel and child care work **Publication** ,1991

novel and surprising findings particularly on the early development and ontogenetic origins of prosocial behavior Research in this area is important as by understanding what influences prosocial behavior we may be better able to sustain and support the development of prosociality Further a richer understanding may help us to be better able to mediate factors that impede or negatively influence positive social behaviors as well as negate triggers that may lead to negative social behaviors Many theoretical views guide different streams of developmental research in this field Here we will bring together scholars from various theoretical backgrounds to collectively explore the development of early prosocial behaviors from early infancy to early school aged children Contributors will offer insights using a variety of methodologies from various resource allocation paradigms derived from economist game theorists to looking time paradigms and more Together we seek to broadly explore questions pertaining to prosocial development for example at what age do prosocial behaviors moral understanding or social selectivity emerge Contributors will individually address unique research questions across a spectrum of topics For example how prosocial behaviors are influenced by underlying mechanisms such as moral emotions e g guilt and sympathy will be explored as will how children s expectations may shape their behaviors and how they come to care about others Questions surrounding different contexts will also be investigated For example how does empathy influence prosociality Do children treat partners differently depending on their past behaviors wealth or other characteristics Does whether there is a cost associated with behaving prosocially influence decision making By incorporating the work of numerous researchers in the field of prosocial development who contribute comprehensive reviews of past research unique theoretical perspectives and empirical approaches the proposed research topic endeavors to provide new insights into a breadth of prosocial behaviors In sum the proposed research topic will contribute to our understanding of prosocial development in the early years by highlighting the relevant factors and contexts under which prosocial behavior emerges

**The Violence Continuum** Elizabeth C. Manvell, 2012-01-31 We expect schools to be a safe haven but after more than a decade of targeted school violence prevention laws and safety plans students are still marginalized and bullied to the point of despondence retaliation and even suicide This thoughtful exploration of what makes a school a safe place is based on the understanding that violence is a continuum of acts and attitudes subtle to overt that have a negative effect on how students feel and learn A school's climate how it feels to be a member of the learning community depends on how each student is treated We are challenged to recognize the often overlooked yet pervasive forms of emotional and physical violence that students face every day After conducting an honest assessment of our own school's climate we learn how to nurture supportive relationships between students and adults and embed pro social skills and respect for diversity in everything we do When done we are equipped with the understandings tools and commitment necessary to create a safe positive school climate that is systemic and lasting
