The International Handbook of Educational Research in the Asia-Pacific Region

J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

James Hall, Ariel Lindorff, Pamela Sammons, 2020-08-10 This edited volume explores questions about what works how for whom when and why in education and considers how and to what extent such knowledge can be understood and extended across countries and different educational systems The book starts by presenting an overview of the history of educational effectiveness research and offers examples of current theories of educational effectiveness Next it provides exemplars of effectiveness studies that report on educational systems policies and practices from across six continents These studies vary in their research methods and outcomes illustrating a field of research that is conscious of its origins its agenda and its ambition to understand and improve the functioning of schools networks and education systems around the world The book brings these threads together within the final chapter and uses them to signpost directions for future research International Perspectives in Educational Effectiveness Research is an excellent and timely addition to the educational effectiveness literature It offers a rigorous and insightful range of international perspectives that will be of interest to researchers policy makers and students of the field Professor Christopher Chapman University of Glasgow UK President Elect of the International Congress for School Effectiveness and Improvement This important new volume brings up to date the contributions of educational effectiveness research to the development of policy and practice in the field over the last 50 years Drawing together the ideas of many of the major researchers in the field it provides a comprehensive analysis of these earlier contributions leading to critical commentaries that point to areas for future attention The editors make use of expertise from a range of disciplines to strengthen the themes that are addressed Most importantly the book emphasises the need to pay greater attention to the challenge of equity arguably the most significant challenge facing education systems internationally In this respect a particular strength of the book is the accounts provided from many different parts of the world These underline the importance of context a factor often previously overlooked in this field of research Given all of this I have no doubt that International Perspectives in Educational Effectiveness Research will become a major source for practitioners policy makers and researchers Professor Mel Ainscow Emeritus Professor of Education University of Manchester Professor of Education University of Glasgow UK **Disparate Ladders** Arnold Heidenheimer, 2018-02-06 This study breaks new ground in examining how political factors helped lead three countries with highly regarded education systems to evolve quite different structures and processes in their secondary and higher education sectors Their educational ladders are disparate because the techniques and timing for selecting students for further educational opportunities vary both among the three nations and within the German and Swiss federal systems The comparative analysis seeks to place the

Japanese trajectory with reference to European developments and to account for some of its unique aspects Building on an extensive record of publication on comparative education policies and welfare state development Heidenheimer places special emphasis on exploring the network of relationships between the various levels of the educational system and tiers of government Following a strategy of integrated comparative analysis the various national school and university types are directly compared as to their permeability nature of administrative supervision curricula and examination practices Contrasting the ways in which political parties and bureaucracies have made and adapted policies helps clarify how and why specific innovations became political issues at the national and regional levels Through close contextual case analysis the study probes why despite great differences in political institutions some secondary school policies became especially embattled in all three countries Heidenheimer explains why the German Lander have maintained a monopoly in the university sector whereas in both centralized Japan and decentralized Switzerland national governments operate and finance key parts of the university sector Also analyzed is the impact of post unification developments on East German university expansion Whereas many Swiss schools have no principal German courts have ruled that principals have tenure in their jobs This comparative treatment by a political scientist complements studies of education by sociologists and economists analyzing how differences in political institutions have helped shape some distinctive policy emphases Based on original research and a broad command of the literature Disparate Ladders will appeal to school administrators educators political scientists social historians sociologists and multiculturalists
