Making History Agency Structure And Change In Social Theory Historical Materialism Series 3:

Making History Alex Callinicos, 2004-07-01 Making History is about the question central to social theory of how human agents draw their powers from the social structures they are involved in Drawing on classical Marxism analytical philosophy and a wide range of historical writing Alex Callinicos seeks to avoid two unacceptable extremes dissolving the subject into an impersonal flux as poststructuralists tend to and treating social structures as the mere effects of individual action for example rational choice theory Among those discussed are Althusser Anderson Benjamin Brenner Cohen Elster Foucault Giddens Habermas and Mann Callinicos has written an extended introduction to this new edition that reviews developments since Making History was first published in 1987 This republication gives a new generation of readers access to an important intervention in Marxism and social theory

Making History Alex Callinicos, 2004-01-01 Making History seeks systematically to address the problem widely discussed by social scientists and historians of the relative roles played by social structures and human agency in social change Alex Callinicos has added an introduction to this new edition updating the argument of this influential book first published in 1987

Global Political Economy and New World Disorder Sean Creaven, 2025-04-24 Drawing upon a range of resources of critique including critical realist social theory realist international relations theory the sociology of globalization the Marxist critique of imperialism and dependency theory this book is an essential contribution to the critical understanding of nationalism and imperialism in the global age It conducts a sustained and in depth analysis of the relations between the asymmetry in the distribution of economic resources and powers of command and the recent play of political events involving imperialist wars including the Russo Ukrainian and Israeli Hamas wars Crucially the author argues that establishing these connections requires theorizing political economy in the so called global age as comprised of neoimperial and neoliberal orders As such the book offers a new interpretation of the relations between neoliberalism and neoimperialism and between modes of organizing social relations and resulting global disorders and instabilities This will therefore be of interest to researchers scholars and students working at the intersection of global political economy international relations and the sociology of globalization

The German Revolution, 1917-1923 Pierre Brou  , 2005 This volume provides an English translation of Brou  's La revolution en Allemagne complete with an updated Bibliography and a new Introduction

Class, States and International Relations Adrian Budd, 2013-06-19 This book provides an outline and a critique of neo Gramscian international relations theory from a Marxist perspective Focusing on the pioneering work of Robert Cox but also drawing on the wider neo Gramscian literature this book presents a comprehensive account of neo Gramscian international relations theory It highlights the neo Gramscian critique of mainstream Realist theory and the theoretical innovations that resulted from the mobilisation of Gramsci's ideas and Cox's emphasis on the social forces underpinning forms of state and world orders The author explains how this is especially relevant in the current period of war and crisis when the international dimensions of social existence continue to exercise a major influence over

domestic politics and economics and when the interest in Marxism can be expected to grow The book continues to provide a critique of the neo Gramscians and of what the author argues is their one sided reading of Gramsci Placing coercion at the centre of a mode of production analysis of world order the author elaborates a Marxist alternative to neo Gramscianism that provides more robust explanations of world order dynamics and change Using a combination of IR theory and historical explanation including of contemporary world order dynamics and US power this book will appeal to both students and scholars of International Relations international studies and international history

Blogging My Religion Giulia Evolvi, 2018-10-09 Religion in Europe is currently undergoing changes that are reconfiguring physical and virtual spaces of practice and belief and these changes need to be understood with regards to the proliferation of digital media discourses This book explores religious change in Europe through a comparative approach that analyzes Atheist Catholic and Muslim blogs as spaces for articulating narratives about religion that symbolically challenge the power of religious institutions The book adds theoretical complexity to the study of religion and digital media with the concept of hypermediated religious spaces The theory of hypermediation helps to critically discuss the theory of secularization and to contextualize religious change as the result of multiple entangled phenomena It considers religion as being connected with secular and post secular spaces and media as embedding material forms institutions and technologies A spatial perspective contextualizes hypermediated religious spaces as existing at the interstice of alternative and mainstream private and public imaginary and real venues By offering the innovative perspective of hypermediated religious spaces this book will be of significant interest to scholars of religious studies the sociology of religion and digital media

The State and the Tributary Mode of Production John F. Haldon, 1993 In this groundbreaking critique of both traditional and Marxist notions of feudalism and of the pre capitalist state John Haldon considers the configuration of state and social relations in medieval Europe and Mughal India as well as in Byzantium and the Ottoman Empire He argues that a Marxist reading of the pre capitalist state can take account of the autonomy of power relations and avoid economic reductionism while still focusing on the forms of tribute which sustained the ruling power Haldon explores the conflicts to which these gave rise and shows the Ottoman state elite often held to be a clear example of independence from underlying social relations to be deeply enmeshed in economic relationships and the extraction of tribute Haldon argues that feudalism was the specifically European form of a much more widely diffused tributary mode whose characteristic social relations and structural constraints can be seen at work in the Byzantine Ottoman and Mughal empires as well While acknowledging the range of ideological and cultural variation within and between these examples of the tributary mode Haldon denies the thesis that such superstructural variations themselves yielded fundamentally contrasting social relations

Marx on Capitalism James Furner, 2018-09-24 In Marx on Capitalism James Furner offers a new answer to the fundamental question of Marxism can a thesis connecting capital the state and classes with the desirability of socialism be developed from an analysis of the commodity The Interaction Recognition Antinomy

Thesis is anchored in a systematic retranslation of Marx's writings. It provides an antinomy-based strategy for grounding the value of social humanity in working class agency, facilitates a dialectical derivation of political representation and condemns capitalism as unjust without appeal to rights. *Marxist History and Postwar Japanese Nationalism* Curtis Anderson Gayle, 2003-08-29. This book explores the historical writings of postwar Japanese Marxists who were and who continue to be surprisingly numerous in the Japanese academic world. It shows how they developed in their historical writing ideas of radical nationalism which accepted presupposed ideas of Japan's ethnic homogeneity but which they saw as a revolutionary subject creating a sphere of radical political action against the state, the American Occupation and global capital. It compares this approach in both prewar and postwar Marxist historiography showing that in the postwar period ideas were more elaborate and put much more emphasis on national education and social mobilization. It also shows how these early postwar discourses have made their way into contemporary ethnic nationalism and revisionism in Japan today. The book's rich and interesting analysis will appeal not just to historians of Japan but also to those interested in nationalism and Marxism more generally.

Totalitarian Capitalism and Beyond Giōrgos K. Lioukakēs, 2010. Anchored in contemporary debates on capitalism and political economy, this study reconsiders the major trends which are shaping a new stage of capitalism. It constructs a politico-economic approach on contemporary capitalism from within a classical Marxist framework of political economy. Getting Past Capitalism Cynthia Kaufman, 2012-08-25. Getting Past Capitalism begins with a critique of the impacts of capitalism on human society and the environment. It looks in new ways at what capitalism is and at how it is reproduced. That investigation opens the door to fresh ways of looking at how to challenge it. Cynthia Kaufman looks at some fundamental questions about how capitalism comes to look like a system that is unbeatable and how people come to have desires that work to reinforce capitalism. Kaufman uses this analysis to develop ideas about how to challenge capitalism. She argues that rather than looking for the fulcrum point in a system that will make it able to be overthrown, we should try to understand what kinds of practices open more spaces for stopping the reproduction of capitalist processes and what kinds of structures need to be developed to make capitalism a less important part of our world. Getting Past Capitalism includes a critique of capitalism and presentation of alternatives to capitalism, many of which already exist. It explores strategies for developing and strengthening those alternatives. *Race, Time, and Utopia* William M. Paris, 2024. Racial injustice at its core is the domination of time. Utopia has been one response to this domination. The racially dominated are not free to define what counts as progress; they are not free from the accumulation of past injustices and most importantly they are not free from the arbitrary organization of work in capitalist labor markets. Racially unjust societies are forms of life where the justifications for how to organize time around life labor and leisure are out of the hands of the dominated. In *Race, Time, and Utopia* William Paris provides a theoretical account of utopia as the critical analysis of the sources of time domination and the struggle to create emancipatory forms of life. Rather than focusing on inclusion and equality before the law as found in liberal theories of racial injustice, Paris analyses the

neglected utopian tradition of justice in black political thought that insists justice can only be secured through the transformation of society as a whole This transformation is nothing less than the democratic transformation of how organize and narrate our shared time Bringing into conversation the work W E B Du Bois Martin Delany Marcus Garvey Frantz Fanon and James Boggs with the critical theory of Karl Marx Ernst Bloch Rahel Jaeggi and Rainer Forst Paris reconstructs a social theory and normative account of forms of life as the struggle over how time will be organized asking Can there be freedom without a new order of time

Mute Compulsion Søren Mau, 2023-01-31 Despite insoluble contradictions intense volatility and fierce resistance the crisis ridden capitalism of the 21st century lingers on To understand capital's paradoxical expansion and entrenchment amidst crisis and unrest Mute Compulsion offers a novel theory of the historically unique forms of abstract and impersonal power set in motion by the subjection of social life to the profit imperative Building on a critical reconstruction of Karl Marx's unfinished critique of political economy and a wide range of contemporary Marxist theory philosopher Søren Mau sets out to explain how the logic of capital tightens its stranglehold on the life of society by constantly remoulding the material conditions of social reproduction In the course of doing so Mau intervenes in classical and contemporary debates about the value form crisis theory biopolitics social reproduction humanism logistics agriculture metabolism the body competition technology and relative surplus populations

Crichtlow, Patricia Northover, Juan Giusti-Cordero, 2018-09-26 Issues of migration environment rurality and the visceral politics of place and space have occupied center stage in recent electoral political struggles in the United States and Europe suffused by an antiglobalization discourse that has come to resonate with Euro American peoples Race and Rurality in the Global Economy suggests that this present fractious global politics begs for closer attention to be paid to the deep rooted conditions and outcomes of globalization and development From multiple viewpoints the contributors to this volume propose ways of understanding the ongoing processes of globalization that configure peoples and places via a politics of rurality in a capitalist world economy and through an optics of raciality that intersects with class gender identity land and environment In tackling the dynamics of space and place their essays address matters such as the heightened risks and multiple states of insecurity in the global economy the new logics of expulsion and primitive accumulation dynamics shaping a new savage sorting patterns of resistance and transformation in the face of globalization's political and environmental changes the steady decline in the livelihoods of people of color globally and their deepened vulnerabilities and the complex reconstitution of systemic and lived racialization within these processes This book is an invitation to ask whether our dystopia in present politics can be disentangled from the deepening sense of white fragility in the context of the historical power of globalization's raced effects This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org>

Liodakis, 2016-02-24 Anchored in contemporary debates on capitalism and political economy this study reconsiders the major trends which are currently shaping a new stage of capitalism With chapters examining globalization the role of technology and environmental degradation George Liodakis constructs a politico economic approach on contemporary capitalism from within a classical Marxist framework of political economy The volume provides a fitting balance between theory and empirical evidence and significantly enriches the existing scholarship on contemporary capitalism and the potential for social change This is an important contribution to those interested in international political economy in particular with developing a new political strategy for going beyond capitalism a reinvention of a communist perspective Modernity and the Pandemic

Sean Creaven, 2023-12-01 Modernity and the Pandemic Decivilization Imperialism and COVID 19 applies the tools of critical social theory to make sense of the COVID 19 crisis and presents a critical sociological analysis of aspects of the political and community response to the pandemic The book focuses on key themes integral to a sociology of pandemics in the global age Firstly Creaven argues that cultures of individualism and consumerism and of pervasive and deeply entrenched social inequalities that is decivilization significantly weaken the cause of public health by weakening the compliance of people with state mandated non pharmaceutical interventions including and especially physical distancing rules and encouraging vaccine hesitancy Secondly Creaven examines how interstate competition and imperial politics have undermined an effective global policy response to the COVID 19 pandemic Policy failure with regard to the management of the pandemic is interpreted as being rooted in the dominance of neoliberal ideology and governance in the politics of international relations particularly in the politics of the leading state actors by protecting corporate interests at the expense of public health and in the constraints imposed on state actors by the competitive dynamic of multinational capitalism in the global age Modernity and the Pandemic will appeal to scholars in the humanities and social sciences with interests in neoliberalism and its social cultural and epidemiological impacts **The Struggle for the State in Jordan** Jamie Allinson, 2015-01-05 Why do the states of the

Arab world seem so unstable Why do alliances between them and with outside powers change Jamie Allinson argues that the

answer lies in the expansion of global capitalism in the Middle East Drawing out the unexpected way in which Jordan's Bedouin tribes became allied to the British Empire in the twentieth century and the legacy of this for the international politics of the Middle East he challenges the existing views of the region Using the example of Jordan this book traces the social bases of the struggles that produced the country's foreign relations in the latter half of the twentieth century to the reforms carried out under the Ottoman Empire and the processes of land settlement and state formation experienced under the British Mandate By examining the attempts of Jordan to create foreign alliances during a time of upheaval and instability in the region Allinson offers wider conclusions concerning the nature of the interaction between state and society in the wider Middle East

How Revolutionary Were the Bourgeois Revolutions? Neil Davidson, 2012-07-24 An impressive contribution both to the history of ideas and to political philosophy Alasdair MacIntyre author of *After Virtue* Once of central importance to left historians and activists alike recently the concept of the bourgeois revolution has come in for sustained criticism from both Marxists and conservatives In this magisterial work Neil Davidson offers theoretical and historical insights about the nature of revolutions Through extensive research and comprehensive analysis Davidson demonstrates that what's at stake is far from a stale issue for the history books understanding that these struggles of the past offer far reaching lessons for today's radicals A monumental work Neil Davidson has given us what is easily the most comprehensive account yet of the life and times of the concept of bourgeois revolution and has also provided us with a refined set of theoretical tools for understanding the often complex interactions between political revolutions which overturn state institutions and social revolutions which involve a more thoroughgoing transformation of social relations Colin Mooers author of *The Making of Bourgeois Europe* Davidson's book is one of immense and impressive erudition His knowledge of the history of Marxist theory and historiography is as detailed as it is comprehensive and must be well nigh unrivalled The endless complex debates that characterize the Marxist tradition are distilled with clarity and illumination *Times Literary Supplement* A brilliant and fascinating book wide ranging and lucidly written Jairus Banaji author of *Theory as History* [American Book Publishing Record](#), 2004
