Making It Happen Exploring The Creative Process Through The Sculptures Of David Adickes:

Making it Happen Linda Wiley, 1996 **Monumental** Michael H. Henderson, Melissa L. Mednicov, 2025-05-01 As the creator of the 67 foot tall Big Sam statue of Sam Houston that overlooks Interstate 45 just south of Huntsville Texas David Adickes is a pivotal if sometimes enigmatic figure in Texas art Though he made many contributions to the early development of the Houston art scene and to Texas Modernism which has experienced an upsurge in interest of late Adickes's life and work have had no thorough examination *Monumental* The Art of David Adickes tells the story of how a young artist from rural Texas studied with Fernand Leger in Paris traveled the world and returned to Texas to become one of the founders of a thriving art scene Consideration of his monumental sculptures of Sam Houston the Beatles and various US presidents affords readers the opportunity to reflect on the challenges of making public art and navigating its political cultural and bureaucratic restrictions *Monumental* considers the artistic implications of history popular culture kitsch and even social media while exploring the dichotomy between the frequent academic skepticism and the ongoing mass appeal of Adickes's oeuvre Scholars and students of contemporary Texas art as well as general readers interested in Adickes's well known public works will enjoy this first ever comprehensive look at a popular Texas artist **Books in Print**, 1991 **Subject Guide to Books in Print**, 1991 **Forthcoming Books** Rose Arny, 2001 *Sculpting Basics* Karin Hessenberg, 2005 This book is a basic introduction to making sculptures Step by step photographs and clear instructions guide the novice through the techniques for modelling casting carving and direct building and fifteen inspiring projects allow the reader to explore his creativity and put his skills into practice Chapters teach how to work with a range of materials including clay plaster of Paris soapstone concrete and wood Progressive projects teach a broad range of skills from modelling mouldmaking and firing to sawing building armatures and finishing techniques A wide range of sculptural forms and themes are explored including a traditional figure a symbolic composition or an abstract relief based on land *David Smith, Drawing + Sculpting* Steven A. Nash, Candida N. Smith, David Smith, 2005 David Smith is arguably the most important American sculptor of the twentieth century From his early development out of Surrealist and Cubist influences to the towering structures he made late in life Smith created a new language in iron and steel that embraced both symbolic figuration and pure abstraction Forty years after his death in 1965 the body of work he created still astonishes in its variety technical mastery and creative energy So powerful is Smith's legacy as a sculptor however that other highly important aspects of his art remain relatively neglected Such is the case with the thousands of drawings Smith produced throughout his artistic life *David Smith Drawing Sculpting* breaks new ground by focusing on his drawings and investigating specifically the important interactive role they played with his sculptures It illustrates many works drawn from the extensive holdings of the artist's estate that have never been exhibited previously and it contains the most thorough compendium published to date of David Smith's writings and statements on drawing Smith himself stressed repeatedly the connection in his work between drawing and sculpture noting

that all of his art flowed from one continuous evolving stream with no separate provision for two dimensional versus three dimensional expression Drawings tended to link to sculptures not in linear developmental sequences or one to one relationships but more often as clusters or constellations of graphic themes and notations exploring ideas forms and motifs that also circulated through his sculptures David Smith Drawing Sculpting illuminates this fundamental principle in his art
