Making Morality

Robert W. Kolb

Making Morality:

Making Morality Work Holly M. Smith, 2018 Moral theories are called on to play both a theoretical and a practical role In their theoretical role they provide accounts of what features make actions right or wrong In their practical role they provide a standard by which agents can guide their own conduct Although it is often assumed that a single theory can successfully serve both these roles in fact the limits on human knowledge often prevent people from using traditional normative theories to make decisions People suffer from a wealth of impediments to their grasp of facts morally relevant to their choices they labor under false beliefs or they are ignorant or uncertain about the circumstances and consequences of their possible actions An agent so hampered cannot successfully use her chosen moral theory as a decision guide Holly M Smith examines three major strategies for addressing this epistemic problem in morality One strategy argues that the epistemic limitations of agents are defects in them but not in the moral theories which are only required to play the theoretical role A second strategy holds that the main point of morality is to play the practical role so that any theory incapable of guiding decisions provides an unacceptable account of right making features and must be rejected in favour of a more usable theory The third strategy claims the correct theory can play both the theoretical and practical role by offering a two tier structure The top tier plays the theoretical role while the lower tier provides a coordinated set of user friendly decision guides that play the practical role Agents use the theoretical account indirectly to guide their choices by directly utilizing the supplementary decision guides Smith argues that the first two strategies should be rejected and develops a detailed novel version of the third strategy that positions us to understand its strengths and shortcomings *Making Morality Work* opens a path towards resolving a deep problem of moral life

Making Good Carolyn Strange, Tina Merrill Loo, 1997-01-01 Examines the official institutions which regulated moral conduct in Canada and analyses the ways in which different social groups had distinct relationships to legal modes of regulation

Making Morality Todd Lekan, 2003-02-01 In this new contribution to moral theory Todd Lekan argues for a pragmatist conception of morality as an evolving educational and fallible practice of everyday life Drawing on the work of John Dewey Lekan asserts that moral norms are neither timeless truths nor subjective whims but habits transmitted through practices Like the habits that make up medicine or engineering moral habits are subject to rational evaluation and change according to new challenges and circumstances This pragmatic interpretation of morality provides a way out of the conundrum of relativism and absolutism Building on classical American philosophy to address current philosophical concerns Lekan's theory revises our basic understanding of moral life and the place of theorizing within that life *Making Morality* will prove of great interest to ethical theorists as it enjoins them to measure theoretical inquiries by how well they produce intellectual tools for problem solving in dynamic complex communities

Morality as a Way of Life E. M. Conradie, 2006-01-01 Since the advent of democracy in 1994 there has been widespread concern over the disintegration of the moral fabric of South African society amongst politicians business leaders community leaders and

religious leaders alike Many have recognised the need to build the moral and religious foundations of society and have encouraged contributions towards the moral regeneration movement Ethics and Medical Decision-Making Michael Freeman,2017-10-05 This title was first published in 2001 Ethical thinking about medical decision making has roots deep in history This collection of contemporary essays by leading international scholars traces the development of modern bioethics and explores the theory and current issues surrounding this widely contested field *Morality in the Making* Helen Weinreich-Haste,Don Locke,1983 **War and Morality** Michael Cavanagh,2014-01-10 In democratic societies it is said that wars and military interventions are fought in the name of the citizens of the nation engaged in the conflict Yet ordinary citizens the major stakeholders in war are seldom provided with as much information for making and acting on their moral decisions about war as they are about many other national issues that affect them To fill the void this volume addresses the nature of conscience various moral norms a moral decision making process and the theoretical and practical issues involved in attempting to avoid war or at least to make it as moral as possible considering its nature By discussing how the morality of war differs from its political military economic and legal dimensions this unique work attempts to enable citizens to make informed decisions about declaring waging and ending war and to act on those decisions Instructors considering this book for use in a course may request an examination copy here *Growing in Christian Morality* Julia Ahlers,Barbara Allaire,Carl Koch,1996 A Christian morality course designed to be part of the religion curriculum within a Catholic high school The course focuses on character development *Contractualism and the Foundations of Morality* Nicholas Southwood,2013-11-07 Contractualism has a venerable history and considerable appeal Yet as an account of the foundations or ultimate grounds of morality it has been thought by many philosophers to be subject to fatal objections In this book Nicholas Southwood argues otherwise Beginning by detailing and diagnosing the shortcomings of the existing Hobbesian and Kantian models of contractualism he then proposes a novel deliberative model based on an interpersonal deliberative conception of practical reason He argues that the deliberative model of contractualism represents an attractive alternative to its more familiar rivals and that it has the resources to offer a more compelling account of morality s foundations one that does justice to the twin demands of moral accuracy and explanatory adequacy *The Making of Character* John MacCunn,1900 **The Wiley Blackwell Handbook of Judgment and Decision Making, 2 Volume Set** Gideon Keren,George Wu,2016-02-16 A comprehensive up to date examination of the most important theory concepts methodological approaches and applications in the burgeoning field of judgment and decision making JDM Emphasizes the growth of JDM applications with chapters devoted to medical decision making decision making and the law consumer behavior and more Addresses controversial topics from multiple perspectives such as choice from description versus choice from experience and contrasts between empirical methodologies employed in behavioral economics and psychology Brings together a multi disciplinary group of contributors from across the social sciences including psychology economics marketing finance public

Portrait of a Moral Agent Teacher Gillian R. Rosenberg, 2015-06-05

Teaching morally and teaching morality are understood as mutually dependent processes necessary for providing moral education or the communication of messages and lessons on what is right good and virtuous in a student's character. This comprehensive and contextualized volume offers anecdotes and experiences on how an elementary school teacher envisions, enacts, and reflects on the ethical teaching and learning of her students. By employing a personally developed form of moral education that is not defined by any particular philosophical or theoretical orientation, this volume relates that classroom-based moral education can therefore be conceived of and promoted as moral agency. Accentuated by the teacher's voice to offer the experience of being in the classroom, this volume enables others to transfer relevant practices to their own teaching contexts.

Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology, ecofeminism, ecological Marxism, ecoanarchism, and bioregionalism have attempted to link social issues to a concern for the environment, environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued. What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships. In this book, Evanoff aims to develop just such a philosophical framework, one in which ethical questions related to interactions between self, society, and nature can be discussed across disciplines and from a variety of different perspectives. The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs. ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments. Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs, a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both.

Why Be Moral? Beatrix Himmelmann, Robert

Louden, 2015-09-25 What reasons do we have to be moral and are these reasons more compelling than the reasons we have to pursue non-moral projects? Ever since the Sophists first raised this question, it has been a focal point of debate. *Why Be Moral?* is a collection of new essays on this fundamental philosophical problem written by an international team of leading scholars in the field.

Richard A. Posner, 2009-06-01 Ambitious legal thinkers have become mesmerized by moral philosophy believing that great figures in the philosophical tradition hold the keys to understanding and improving law and justice and even to resolving the most contentious issues of constitutional law They are wrong contends Richard Posner in this book Posner characterizes the current preoccupation with moral and constitutional theory as the latest form of legal mystification an evasion of the real need of American law which is for a greater understanding of the social economic and political facts out of which great legal controversies arise In pursuit of that understanding Posner advocates a rebuilding of the law on the pragmatic basis of open minded and systematic empirical inquiry and the rejection of cant and nostalgia the true professionalism foreseen by Oliver Wendell Holmes a century ago A bracing book that pulls no punches and leaves no pieties unpunctured or sacred cows unkicked *The Problematics of Moral and Legal Theory* offers a sweeping tour of the current scene in legal studies and a hopeful prospect for its future
