Making Of A Cook:

The New Making of a Cook Madeline Kamman, 1997-11-05 Filled with low fat cooking tips and hints along with hundreds of recipes that extract maximum flavor from the least required amount of fat this revised cookbook teaches every technique used in today's homes and professional kitchens

The Making of a Cook Madeleine Kamman, 1971 Cooks who believe that another French cookbook is just what we don't need can be assured that this is a book of a different kind. What we need to keep from French cuisine is the peerless techniques. With those techniques we can create countless new dishes based on American ingredients: corn, sweet potatoes, molasses, brown sugar, pine nuts, pecans, avocados, limes, American wines, Bourbon which are rarely used in France. No one has surpassed French cooking methods and so far they remain the foundation of most Western food preparation. Nevertheless, French cooking terms remain mysterious to many women. While I have used some of these specific terms I have translated them or explained them so that the particular process is quite clear. The techniques and recipes are part of what French food writer Robert Courtine calls *la cuisine des femmes* in contrast to the *grande cuisine* of chefs. Consequently, although there are some complicated dishes, there is nothing here that cannot be performed in the home kitchen. It is true that there are born cooks who can serve remarkable meals apparently without planning or recipes and without spending hours at the stove. Unfortunately, most of us need directions, practice, and time. In my opinion, the directions needed are not so much recipes as solid basic techniques that can be applied to countless preparations. Although this book has recipes for eggs, soups, meats, fish, etc. as most conventional cookbooks do, the internal arrangement is different. The information is organized according to methods or techniques. For each technique I have tried to give you an explanation of the chemical and physical changes that take place in the pot while you are at the stove. There are chemical reactions that can be critical for your results in the kitchen but do not worry; no chemical formulas are to be found in the book. By giving principles and proportions which you can apply to many different preparations, I hope to help you to make your own way to creative cookery. Taken from Introduction page ix x

The Making of a Chef Michael Ruhlman, 1997-12-15 The eye-opening book that was nominated for a 1998 James Beard Foundation award in the Writing on Food category. In the winter of 1996, Michael Ruhlman donned houndstooth check pants and a chef's jacket and entered the Culinary Institute of America in Hyde Park, New York, to learn the art of cooking. His vivid and energetic record of that experience, *The Making of a Chef*, takes us to the heart of this food knowledge mecca. Here we meet a coterie of talented chefs, an astonishing and driven breed. Ruhlman learns fundamental skills and information about the behavior of food that make cooking anything possible. Ultimately, he propels himself and his readers through a score of kitchens and classrooms from Asian and American regional cuisines to lunch cookery and even table waiting in search of the elusive, unnameable elements.
