Making Pilgrimages Meaning And Practice In Shikoku:

Making Pilgrimages Ian Reader, 2004-12-31 This study involves a fourteen hundred kilometer long pilgrimage around Japan's fourth largest island Shikoku. In traveling the circuit of the eighty-eight Buddhist temples that make up the route pilgrims make their journey together with Kobo Daishi 774-835 the holy miracle-working figure who is at the heart of the pilgrimage. Once seen as a marginal practice recent media portrayal of the pilgrimage as a symbol of Japanese cultural heritage has greatly increased the number of participants both Japanese and foreign. In this absorbing look at the nature of the pilgrimage Ian Reader examines contemporary practices and beliefs in the context of historical development taking into account theoretical considerations of pilgrimage as a mode of activity and revealing how pilgrimages such as Shikoku may change in nature over the centuries. This rich ethnographic work covers a wide range of pilgrimage activity and behavior drawing on accounts of pilgrims traveling by traditional means on foot as well as those taking advantage of the new package bus tours and exploring the pilgrimage's role in the everyday lives of participants and the people of Shikoku alike. It discusses the various ways in which the pilgrimage is made and the forces that have shaped it in the past and in the present including history and legend the island's landscape and residents the narratives and actions of the pilgrims and the priests who run the temples regional authorities and commercial tour operators and bus companies. In studying the Shikoku pilgrimage from anthropological historical and sociological perspectives Reader shows in vivid detail the ambivalence and complexity of pilgrimage as a phenomenon that is simultaneously local national and international and both marginal and integral to the lives of its participants. Critically astute yet highly accessible *Making Pilgrimages* will be welcomed by those with an interest in anthropology religious studies and Japanese studies and will be essential for anyone contemplating making the pilgrimage themselves.

Encyclopedia of Sacred Places Norbert C. Brockman, 2011-09-13. Now thoroughly revised and updated, this encyclopedia documents the diversity of shrines, temples, holy places, and pilgrimage sites sacred to the world's major religious traditions and illustrates their elemental place in human culture. As interest increases in the role of world religions in history and international affairs, the new edition of *Encyclopedia of Sacred Places*, which arrives 15 years after the publication of the original edition, provides new and updated information on site-specific religious practice and spiritually significant locations around the globe. While many of the entries describe specific places like the Erawan Shrine and the Rock of Cashel, others examine types of sacred sites, pilgrimages, and practices. With articles that describe both the places and their associated traditions and history, this reference book reveals the enormous diversity and cultural significance of religious practice worldwide. For students and teachers of classes ranging from high school geography to university level courses in religious studies, geography, anthropology, and sociology, this book provides essential reference on places of great significance to the world's various faith traditions.

The Formation of Regional Religious Systems in Greater China Jiang Wu, 2022-04-21. The rise of Spatial Humanities has spurred a digital revolution in the field of Chinese studies, especially in the study of religion. Based on years of data compilation and analysis of religious sites, this book explores the formation of Regional Religious Systems (RRS) in Greater China in unprecedented scope and depth. It addresses quantitatively the enduring historical and contemporary issues of China's deep-rooted regionalism and spatially variegated cultural and religious landscape. A range of topics are explored: theoretical discussions of the concept of RRS; case studies of regional and local religious institutions; the formation of local cults and pilgrimage networks; and the spread of religious networks to overseas Chinese communities and the Bon religion in Tibet. The book also considers long-standing challenges of researching with spatial data for humanities and social science research, such as data collection, integration, spatial analysis, and map creation. This book will be of interest to students and scholars in Religious Studies, Cultural Studies, Chinese Studies, Digital Humanities, Human Geography, and Sociology.

Sacred Sites and Sacred Stories Across Cultures David W. Kim, 2021-01-18. This book offers global perspectives from Mediterranean, Asian, Australian, and American cultures on sacred sites and their related stories in regional history. Contemporary society witnesses many travelers visiting sacred sites, temples, mountains, castles, churches, houses throughout the world. These visits often involve discovery of new historical facts through the origin stories of the associated tribe, region, or nation. The transmission of oral tradition and myth carries on the significant meaning of those religious sites. This volume unveils multi-angle perspectives of symbolic and mystical places. The contributors describe the religio-political experiences of each regional case and analyze the religiosity of local people as a lens through which readers can re-examine the concept of iconography, syncretism, and materialism. In addition, contributors interpret the

growth of new religions as the alternative perspectives of anti traditional religions This new approach offers significant insight into comprehending the practical agony and sorrow of regional people in the context of contemporary history
