

Niklas Vogt 1756 1836

Kevin Cramer

Niklas Vogt 1756 1836:

Niklas Vogt, 1756-1836 Steven A. Stargardt, 1986 **The Thirty Years' War and German Memory in the Nineteenth Century** Kevin Cramer, 2007-12-01 The nineteenth century witnessed the birth of German nationalism and the unification of Germany as a powerful nation state In this era the reading public's obsession with the most destructive and divisive war in its history the Thirty Years War resurrected old animosities and sparked a violent century long debate over the origins and aftermath of the war The core of this bitter argument was a clash between Protestant and Catholic historians over the cultural criteria determining authentic German identity and the territorial and political form of the future German nation This groundbreaking study of modern Germany's morbid fascination with the war explores the ideological uses of history writing commemoration and collective remembrance to show how the passionate argument over the meaning of the Thirty Years War shaped Germans' conception of their nation The first book in the extensive literature on German history writing to examine how modern German historians reinterpreted a specific event to define national identity and legitimate political and ideological agendas *The Thirty Years War and German Memory in the Nineteenth Century* is a bold intellectual history of the confluence of history writing religion culture and politics in nineteenth century Germany **Niklas Vogt, 1756 - 1836** Steven Allen Stargardt, 1988 **On the Road to Vatican II** Ulrich L. Lehner, 2016-07-01 In the present day there is widespread confusion regarding the theological achievements of the Catholic Enlightenment This book outlines such contributions in the fields of biblical exegesis church reform liturgical renewal and the move toward a more tolerant view of other churches and religions Since some of the most important Catholic Enlighteners lived in Germany this book concentrates on their endeavors but also frequently points to other European players Only an unpolemical historical assessment of the Catholic Enlightenment can help us to get out of the current gridlock of interpreting Vatican II was there a break with tradition or was there continuity By reviewing the historical debates that preceded Vatican II the unknown marginalized or deliberately forgotten roots of the conciliar debates come to light that can help us fine tune future hermeneutical endeavors This history is hitherto unknown to most researchers Indeed it is possibly the most neglected field of modern literary history *The Politics of Moderation in Modern European History* Ido de Haan, Matthijs Lok, 2019-09-04 This book charts the varieties of political moderation in modern European history from the French Revolution to the present day It explores the attempts to find a middle way between ideological extremes from the nineteenth century *Juste Milieu* and balance of power via the Third Ways between capitalism and socialism to the current calls for moderation beyond populism and religious radicalism The essays in this volume are inspired by the widely recognized need for a more nuanced political discourse The contributors demonstrate how the history of modern politics offers a range of experiences and examples of the search for a middle way that can help us to navigate the tensions of the current political climate At the same time the volume offers a diagnosis of the problems and pitfalls of Third Ways of finding the middle between extremes and of the weaknesses

of the moderate point of view Niklas Vogt, 1756-1836 : a Personality of the Late German Enlightenment and Early Romantic Movement Steven Allan Stargardter,1981 **Unity and Diversity in European Culture c.1800** Tim Blanning,Hagen Schulze,2006-10-19 This volume brings together two of the most popular innovative and controversial fields of historical study cultural history and the history of nationalism Eleven lively chapters discuss the public sphere music the visual arts political culture literature the role of the state and national languages of Europe *Discourses of Decline* ,2022-01-17 This volume explores the relevance of decline within the republican tradition While scholarship on republicanism thrives the idea of decline which has been prominent in republican theory since antiquity has received relatively little attention The essays in this volume take a broad cultural perspective and study a wide variety of authors and contexts to situate decline among the key concepts in the history of republicanism Most contributions focus on the Dutch Republic during the Age of Enlightenment and Revolutions the area of expertise of Wyger Velema to whom this volume is dedicated Other case studies include early modern Spain and Venice the German Enlightenment and the Weimar Republic Contributors are Remieg Aerts Hans Erich B deker Wiep van Bunge Lisa Kattenberg Wessel Krul Matthijs Lok Alessandro Metlica Ida Nijenhuis Ele de la Porte Jan Rotmans Niek van Sas Freya Sierhuis and Lina Weber , Europe Against Revolution Matthijs Lok,2023 Offers a radical new scholarly interpretation of the topics of Enlightenment legacies counter revolution and conservatism as well as the construction of the European Past and the international order Gives a historical perspective on the contemporary radical right as well as current expressions of European identity and memory Combines Enlightenment thought with counter revolution and memory studies historiography Draws on sources from seven languages to give a truly pan European perspective The Genesis of German Conservatism Klaus Epstein,2015-03-08 Although Conservative parties did not exist in Germany until after the Napoleonic Wars there did emerge around 1770 traceable organized political activity and intellectual currents of a clearly Conservative character The author argues that this movement developed as a response to the challenge of the Enlightenment in the fields of religion socioeconomic affairs and politics and that this response antedated the impact of the French Revolution Believing that Conservatism cannot be treated properly as a specialized phenomenon or simply as an intellectual movement Professor Epstein correlates it with the political and social forces of the time Originally published in 1966 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Eurocentrism in European History and Memory** Marjet Brolsma,Robin Bruin,Matthijs Lok,2025-10-01 Eurocentrism means seeing the world in Europe's terms and through European eyes This may not be unreasonable for Europeans but there are unforeseen consequences Eurocentric history

implies that a scientific modernity has diffused out from Europe to benefit the rest of the world through colonies and development aid. It involves the imposition of European norms on places and times where they are often quite inappropriate. In Eurocentrism in European History and Memory well known scholars explore and critically analyse manifestations of Eurocentrism in representations of the European past from different disciplines: history, literature, art, memory and cultural policy, as well as from different geographical perspectives. The book investigates the role imaginings of the European past since the eighteenth century played in the construction of a Europeanist worldview and the ways in which Europe was constructed in literature and art.

Companion to Literary Myths, Heroes and Archetypes Pierre Brunel, 2015-07-30. First published in French in 1988 and in English in 1992, this companion explores the nature of the literary myth in a collection of over 100 essays from Abraham to Zoroaster. Its coverage is international and draws on legends from prehistory to the modern age throughout literature, whether fiction, poetry or drama. Essays on classical figures as well as later myths explore the origin, development and various incarnations of their subjects. Alongside entries on western archetypes are analyses of non-European myths from across the world, including Africa, China, Japan, Latin America and India. This book will be indispensable for students and teachers of literature, history and cultural studies, as well as anyone interested in the fascinating world of mythology. A detailed bibliography and index are included. The Companion provides a fine interpretive road map to Western culture's use of archetypal stories. *Wilson Library Review*. It certainly is a comprehensive volume, extremely useful. *Times Higher Education Supplement*.

Absolute War Mark Hewitson, 2017-02-09. Wars have played a fundamental part in modern German history. Although infrequent, conflicts involving German states have usually been extensive and often catastrophic, constituting turning points for Europe as a whole. *Absolute War* is the first in a series of studies from Mark Hewitson that explore how such conflicts were experienced by soldiers and civilians during wartime and how they were subsequently imagined and understood during peacetime, from Clausewitz and Kleist to Jünger and Adorno. Without such an understanding, it is difficult to make sense of the dramatic shifts characterising the politics of Germany and Europe over the past two centuries. The studies argue that the ease or reluctance with which Germans went to war and the far-reaching consequences of such wars on domestic politics were related to soldiers' and civilians' attitudes to violence and death, as well as to long-term transformations in contemporary conceptualisation of conflict. *Absolute War* reassesses the meaning of military conflict for the millions of German subjects who were directly implicated in the Revolutionary and Napoleonic Wars. Based on a re-reading of contemporary diaries, letters, memoirs, official correspondence, press reports, pamphlets, treatises, plays and cartoons, this volume refocuses attention on combat and conscription as the central components of new forms of mass warfare. It concentrates in particular on the impact of violence, killing and death on many soldiers and some civilians' experiences and subsequent memories of conflict. War has often been conceived of as an act of violence pushed to its utmost bounds, as Clausewitz put it, but the relationship between military conflicts and violent acts remains a problematic one.

Public Law in Germany, 1800-1914 Michael Stolleis, 2001 He argues that the concept of family resemblances as that concept has been refined and extended in prototype theory in the contemporary cognitive sciences is the most plausible analytical strategy for resolving the central problem of the book In the solution proposed religion is conceptualized as an affair of more or less rather than a matter of yes or no and no sharp line is drawn between religion and non religion

BOOK JACKET Germany 1789-1919 Agatha Ramm, 2019-06-26 Originally published in 1967 this book discusses economic and constitutional developments and religious history in relation to their political consequences Political theory is treated in two sections one is devoted to the ideas current from 1789 to the revolutionary year of 1848 and another to those of the Bismarckian era The author used archival material to verify her analysis of such complicated questions as the operation of the Holy Roman Empire and Bismarckian foreign policy Investigating the disappearance of the old Germany in which medieval institutions still survived the book shows that the unification of Germany was not the final climax of German history it appeared at the time to be

Metternich Wolfram Siemann, 2019-11-01 Wolfram Siemann tells a new story of Clemens von Metternich the Austrian at the center of nineteenth century European diplomacy Known as a conservative and an uncompromising practitioner of realpolitik in fact Metternich accommodated new ideas of liberalism and nationalism insofar as they served the goal of peace And he promoted reform at home

Protestants, Catholics and Jews in Germany, 1800-1914 Helmut Walser Smith, 2001-10 In the course of the 19th century the boundaries that divided Protestants Catholics and Jews in Germany were redrawn Contrary to popular belief these groups co existed in common space and interacted in complex ways This book lays the foundation for a new kind of religious history

Christendom and European Identity Mary Anne Perkins, 2015-02-06 This book critically explores the idea of Europe since the French Revolution from the perspective of intellectual history It traces the dominant and recurring theme of Europe as Christendom in discourse concerning the relationship of religion politics and society in historiography and hermeneutics and in theories and constructions of identity and otherness It examines the evolution of a grand narrative by which European elites have sought to define European and national identity This narrative the author argues maintains the existence of common historical and intellectual roots common values culture and religion The book explores its powerful legacy in the positive creation of a sense of European unity the ways in which it has been exploited for ideological purposes and its impact on non Christian communities within Europe

Die Reform des Schulwesens im Kurfürstentum Mainz unter Emmerich Joseph August Messer, 1897

Right here, we have countless books **Niklas Vogt 1756 1836** and collections to check out. We additionally come up with the money for variant types and with type of the books to browse.
