Pale Criminal Psychoanalytic Perspectives:

The Pale Criminal Stephen J. Costello, 2018-05-08 It was Freud borrowing Nietzsche's phrase from Thus Spake Zarathustra who described as pale criminals those who committed criminal acts out of deep lying unconscious guilt The focus of this challenging and penetrating study is on this type of criminality The book brings a unifying vision and theoretical integration to the array of perspectives and theories in this field He draws together for the first time the thoughts on the subject of Sigmund Freud Carl Jung Melanie Klein Donald Winnicott and Jacques Lacan examines the contributions of both orthodox and evolutionary psychiatry and explores the role of family experience in shaping the pale criminal The result is an ambitious theory of criminality a depth psychological psychoanalytic model of the human being In the early chapters the author provides a judicious and even handed exposition of his chosen thinkers views before proceeding to an impressive and well argued dialectical synthesis in which each theoretical perspective is used to correct qualify or supplement the others In a diffuse and divided field this volume should provide an indispensable source of clarification and a stimulus to open creative debate

PALE CRIMINAL STEPHEN. J. COSTELLO, 2019 **Prologue to Violence** Abby Stein, 2013-09-05 Despite mounting references to the transgenerational transmission of violence we still lack a compelling understanding of the linkage between the interpersonal violence of early life and the criminal violence of adulthood In *Prologue to Violence* Abby Stein draws on the gripping narratives of 65 incarcerated subjects and extensive material from law enforcement files to remedy this lacuna in both the forensic and psychodynamic literature In the process she calls into question prevailing beliefs about criminal character and motivation For Stein the early trauma to which adult criminals are subjected remains unformulated and as such unavailable for reflection Contrary to common belief these criminals especially sex murderers do not commit their crimes in a rational or fully conscious way They are not driven by deviant fantasy their psychopathy is not inborn and they rarely commit acts of violence without conscience Stein's interdisciplinary analysis of her data infuses contemporary relational psychoanalysis with the insights of neuroscience traumatology criminology and cognitive and narrative psychology A powerful challenge to offender treatment programs to address the shaping impact of childhood trauma rather than merely to correct the cognitions of violent offenders *Prologue to Violence* will be equally compelling to researchers and academics investigating child abuse and adult violence Its mental health readership will be broad and deep ranging beyond clinicians who work with offender populations to all therapists who wrestle with experiences of dissociation and aggressive enactment in everyday life

Hermeneutics and the Psychoanalysis of Religion Stephen J. Costello, 2010 This book is a philosophical study of the Freudian psychoanalysis of religion from a hermeneutical perspective Drawing on the work of Paul Ricoeur the twentieth century French phenomenologist the author offers a sustained and rigorous reflection on Freud's critique of Christian religion and raises the pertinent question of whether psychoanalysis should be conceived of as a form of hermeneutics To this end the author details the often acrimonious debates and discussions that took place between Ricoeur

and Jacques Lacan as well as drawing on the work of Slavoj Žižek on this intriguing subject with Lacan and Žižek resisting any attempt to interpret psychoanalysis along the lines of hermeneutics Having brought Ricoeur's reflections to bear on both Freud and Lacan the author next engages with the Thomist metaphysical tradition He deals especially with Aquinas' famous five arguments for the existence of God the relevance of which becomes apparent in the last chapter when the author sheds a Lacanian light on Thomas' mystical experience The author argues that the real God the God of Thomas' experience pertains to the Lacanian order of the Real The book concludes with a précis on the beauty of belief *Generation* Jean White, 2013-12-16

Generation is both an introduction to and a comparative study of contemporary psychoanalytic clinical theory It provides the reader with a comprehensive overview of how new ways of thinking about the psychoanalytic process have evolved and are still in development today Jean White presents a detailed study of contemporary Independent Lacanian and post Kleinian theory set within the wider context of the international expansion of psychoanalysis Contemporary clinical practice is discussed in relation to concepts of psychopathology transference and countertransference and innovations in technique Each school's explicit and implicit models of psychic growth and their view of the aims of the psychoanalytic process are explored Written in clear accessible language and interwoven throughout with clinical vignettes *Generation* provides an invaluable initiation into the work of notoriously difficult authors such as Lacan and Bion This stimulating presentation of contemporary psychoanalytic theory will be of great interest to psychoanalytic psychotherapists psychodynamic counsellors and psychoanalysts of all theoretical orientations *Reading Lacan's Écrits* Calum Neill, Derek Hook, Stijn

The Philosophy Clinic Stephen J. Costello, 2017-01-06 This collection of essays and interviews highlights the modern movement of philosophical practice Taking their cue and call from Socrates summons to know thyself contemporary philosophical counsellors and practitioners have returned to the ancient understanding of philosophy as consolation and contemplation as a life directed to the loving search for wisdom and clarity Socrates and the Stoics continued this tradition seeing philosophy primarily as a practical way of living in alignment with oneself and the logos Thus interpreted philosophy is a path teaches a method more than pronounces a thesis and issues a living praxis devoted to daily spiritual exercises whose aim is nothing less than the transformation of the self a metamorphosis of the personality This conception of philosophy s essence was lost but was later retrieved by certain philosophers such as Viktor Frankl and Ludwig Wittgenstein in the twentieth century who have unleashed and uncovered philosophy s original therapeutic impulse and intent As such this book will prove of inestimable value to philosophers psychologists psychotherapists psychiatrists counsellors clients and students of these disciplines
