Political Economy Of Aids In Africa Global Health:

The Political Economy of AIDS in Africa Nana K. Poku, 2017-07-05 Sub Saharan Africa is a region devastated by HIV AIDS. The extent of the epidemic is only now becoming clear as increasing numbers of people with HIV are becoming ill. In the absence of massively expanded prevention, treatment and care efforts, the AIDS death toll on the continent is set to escalate rapidly. Despite progress being achieved in localized settings, the alarming statistics reflect the continuing failure of advanced countries to mount a response that matches the scale and severity of the African HIV AIDS crisis. Over and above the colossal personal suffering, the dire social and economic consequences for fragile nation states are already being felt, not only in health but in education, industry, agriculture, transport, human resources and economies in general. Countries already crippled by drought, poverty, debt, forced migration and civil war must now contend with massive deterioration in child survival rates and life expectancy, the erosion of the economic family base, massive and insupportable demands on health and public services, chronic labour shortages and volatile national security. Through a critical and detailed exploration of specific case studies, this invaluable volume brings together an unparalleled array of international contributors to redefine the political and economic contours of this calamitous epidemic. It examines the impact of the shortfalls in the Global Fund allocation, the slow pace of administrative processing of aid and the weaknesses of institutional responses to the crisis from African countries and their partners in the global health community. It is essential reading for all concerned with public health, epidemiology, HIV AIDS research, globalization, development in Africa and indeed our shared future. Features include: Unique assessments of HIV AIDS and its impact on democracy and governance in African states; Wide ranging regional and country studies by the foremost thinkers in their fields; Multi disciplinary contributions from areas including Politics, Sociology, Public Health and Development Studies; Compelling and convincing evidence; Thematic in approach; Innovative and culturally specific insights for long term planning, care and support. **The Political Economy of HIV in Africa** Deborah Johnston, Kevin

Deane, Matteo Rizzo, 2018-10-18 Biomedical revolutions seem to have radically altered the environment for HIV transmission: anti-retrovirals (ARVs) and drugs to reduce mother-to-child transmission promise to cut HIV transmission rates as does male medical circumcision. However, the hopeful messages of UNAIDS are tempered with warning about expenditure shortfalls and calls for funding. Contributions to this book remind us that along with the external financial constraints, there have been new fractures in state power and in the organisation of health systems. More than this, the book fundamentally calls into question whether biomedical interventions can change the social roots of this disease. As well as considering new policy approaches, the book reasserts a long-standing political economy approach to HIV and to adapt it to reflect new competing theoretical approaches. The chapters attempt to connect the debates about HIV AIDS to larger discussions about globalisation, class differentiation, inequity and uneven development in African countries. This book was originally published as a special issue of *Review of African Political Economy*. *The Political Economy of AIDS in Africa* Nana Poku, Alan Whiteside, 2004 Sub

Dionne,2017-12-07 Between 2002 and 2013 bilateral donors spent over 64 billion on AIDS intervention in low and middle income countries During the same period nearly 25 million died of AIDS and more than 32 million were newly infected with HIV In this book for students of political economy and public policy in Africa as well as global health Kim Yi Dionne tries to understand why AIDS interventions in Africa often fail The fight against AIDS requires the coordination of multiple actors across borders and levels of governance in highly affected countries and these actors can be the primary sources of the problem Dionne observes misaligned priorities along the global chain of actors and argues this misalignment can create multiple opportunities for failure Analyzing foreign aid flows and public opinion polls Dionne shows that while the international community highly prioritizes AIDS ordinary Africans view AIDS as but one of the many problems they face daily

The Political Economy of Development and Underdevelopment in Africa Toyin Falola,Jessica Achberger,2013-06-07 While Africa is too often regarded as lying on the periphery of the global political arena this is not the case African nations have played an important historical role in world affairs It is with this understanding that the authors in this volume set out upon

researching and writing their chapters making an important collective contribution to our understanding of modern Africa Taken as a whole the chapters represent the range of research in African development and fully tie this development to the global political economy African nations play significant roles in world politics both as nations influenced by the ebbs and flows of the global economy and by the international political system but also as actors directly influencing politics and economics It is only through an understanding of both the history and present place of Africa in global affairs that we can begin to assess the way forward for future development *Global Health Justice and Governance* Dr. Prah

Nana K Poku,2013-03-28 The political impact of HIV AIDS varies greatly and is difficult to map States depend on how governments choose to manage the political implications of HIV and AIDS both those stemming from the erosions of its own capacity as well as those that originate from their changing relationship on a national and international level Across the developing world HIV AIDS is slowly killing adults in their most productive years hollowing out state structures deepening poverty and raising profound questions that touch on the organization of all aspects of social economic and political life With the epidemic showing scant signs of slowing down this innovative volume assesses how HIV AIDS affects governance and conversely how governance affects the course of the epidemic In particular the volume employs a compelling analytical and polemic framework for mapping the multiple dynamic mechanisms of governance and HIV AIDS brings together contributions from renowned international scholars from a variety of disciplines draws on comprehensive and detailed perspectives of the roles of actors institutions and structures provides an incisive study of a global plague which threatens existing social economic and human interrelations **The Routledge Handbook of Security Studies** Myriam Dunn

Virus Alert Stefan Elbe,2009 Bound up with the human cost of HIV AIDS is the critical issue of its impact on national and international security yet attempts to assess the pandemic s complex risk fail to recognize the political dangers of construing the disease as a security threat The securitization of HIV AIDS not only affects the discussion of the disease in international policy debates but also transforms the very nature and function of security within global politics In his analysis of the security implications of HIV AIDS Stefan Elbe addresses three concerns the empirical evidence that justifies framing HIV AIDS as a security issue the meaning of the term security when used in relation to the disease and the political consequences of responding to the AIDS pandemic in the language of security His book exposes the dangers that accompany efforts to manage the global spread of HIV AIDS through the policy frameworks of national security human security and risk management Beyond developing strategies for mitigating these dangers Elbe s research reveals that in construing the AIDS pandemic as a threat policymakers and international institutions also implicitly seek to integrate current security practices within a particular rationalization of political rule Elbe identifies this transformation as the governmentalization of security and by drawing on the recently translated work of Michel Foucault develops a framework for analyzing its key elements and consequences

Neo-liberalism and AIDS Crisis in Sub-Saharan Africa C. O'Manique,2004-05-13 O Manique critically examines the

evolution of the policy response to AIDS in Sub Saharan Africa through a feminist political economy lens focusing on the relationship between neo liberalism the spread of AIDS and the hegemonic policy response It explores the ways in which AIDS has been constructed as a development problem and how AIDS knowledges and institutions have evolved and have shaped interventions in the AIDS sector Central to the analysis is a historical case study of Uganda [Infected Kin](#) Ellen Block,Will McGrath,2019-05-17 AIDS has devastated communities across southern Africa In Lesotho where a quarter of adults are infected the wide ranging implications of the disease have been felt in every family disrupting key aspects of social life In [Infected Kin](#) Ellen Block and Will McGrath argue that AIDS is fundamentally a kinship disease examining the ways it transcends infected individuals and seeps into kin relations and networks of care While much AIDS scholarship has turned away from the difficult daily realities of those affected by the disease [Infected Kin](#) uses both ethnographic scholarship and creative nonfiction to bring to life the joys and struggles of the Basotho people at the heart of the AIDS pandemic The result is a book accessible to wide readership yet built upon scholarship and theoretical contributions that ensure [Infected Kin](#) will remain relevant to anyone interested in anthropology kinship global health and care Supplementary instructor resources <https://www.csbsju.edu/sociology/faculty/anthropology/teaching/resources/infected-kin-teaching-resources>

The Political Economy of HIV/AIDS in Developing Countries Benjamin Coriat,2008-01-01 The issue of universal and free access to treatment is now a fundamental goal of the international community Based on original data and field studies from Brazil Thailand India and Sub Saharan Africa under the aegis of ANRS the French nationalagency for research on Aids and viral hepatitis this timely and significant book both assesses the progress made in achieving this objective and presents a rigorous diagnosis of the obstacles that remain Placing particular emphasis on the constraints imposed by TRIPS as well as the poor state of most public health systems in Southern countries the contributing authors provide a comprehensive analysis of the huge barriers that have yet to be overcome in order to attain free access to care and offer innovative suggestions of how they might be confronted In doing this the book renews our understanding of the political economy of HIV AIDS in these vast regions where the disease continues to spread with devastating social and economic consequences This volume will be a valuable addition to the current literature on HIV AIDS in developing countries and will find widespread appeal amongst students and academics studying economics sociology and public health It will also be of interest to international organizations and professional associations involved in the fight against pandemics [The Difference that Gender Makes to International Peace and Security](#) Sara E. Davies,Nicole George,Jacqui True,2018-10-29 Fifteen years after the adoption of UN Security Council Resolution 1325 which establishes the Women Peace and Security agenda there is now a need to assess the impacts of gender equality efforts and to understand why and how gender equality reforms have advanced to the extent that they have This book examines how international peace and security is re envisioned from a gender perspective by mostly focusing on the nuances presented by the Asia Pacific region It argues that despite the diversity of political socio cultural and

economic systems in the Asia Pacific women and girls in the region continue to experience similar forms of insecurities Several countries in the Asia Pacific have demonstrated relative peace and stability In addition women s leadership and participation in peacebuilding are and continue to be increasingly recognized in the region too However as the chapters in this book demonstrate applying a critical gender analysis allows for the interrogation of veneers of political order which can then mask or normalise everyday gendered insecurities The analysis of country cases such as Myanmar Cambodia and Fiji underscores a rethinking of the political order in the Asia Pacific which leaves existing gender inequalities intact The chapters in this book were originally published in a special issue in the International Feminist Journal of Politics Against Global Capitalism E. Osei Kwadwo Prempeh,2017-03-02 The fundamental challenge of democratizing globalization by opening up spaces for democratic participation beyond the state is addressed in this study The author captures both the democratic activities and voices of opposition to neoliberal globalization and investigates how this reinvention of democracy through resistance to neoliberal globalization has taken shape in the African context In doing so he reasserts the relevance of the de globalization and anti capitalism movements With a careful selection of case studies this volume is ideal for classroom use and library reference **Global Health and International Relations** Colin McInnes,Kelley Lee,2013-05-02 The long separation of health and International Relations as distinct academic fields and policy arenas has now dramatically changed Health concerned with the body mind and spirit has traditionally focused on disease and infirmity whilst International Relations has been dominated by concerns of war peace and security Since the 1990s however the two fields have increasingly overlapped How can we explain this shift and what are the implications for the future development of both fields Colin McInnes and Kelley Lee examine four key intersections between health and International Relations today foreign policy and health diplomacy health and the global political economy global health governance and global health security The explosion of interest in these subjects has in large part been due to real world concerns disease outbreaks antibiotic resistance counterfeit drugs and other risks to human health amid the spread of globalisation Yet the authors contend that it is also important to understand how global health has been socially constructed shaped in theory and practice by particular interests and normative frameworks This groundbreaking book encourages readers to step back from problem solving to ask how global health is being problematized in the first place why certain agendas and issue areas are prioritised and what determines the potential solutions put forth to address them The palpable struggle to better understand the health risks facing a globalized world and to strengthen collective action to deal with them effectively begins they argue with a more reflexive and critical approach to this rapidly emerging subject
