Rapid Force Projection Technologies A Quick Look Analysis Of Advanced Light Indirect Fire Systems:

Rapid Force Projection Technologies: A Quick-Look Analysis of Advanced Light Indirect Fire Systems, 1996 The days of U S military forces defending a known area of terrain with a large prepositioned force appear to be drawing to a close In the future as in the recent past the U S Army will need to deploy to areas of potential or actual conflict Furthermore because time is often critical in overseas operations the United States must have land forces that can deploy quickly both by air and by sea The RFPT project at RAND concentrates on the airliftable portion of these forces in the early entry role RAND DB 168 A OSD Steeb et al 1996 highlights this project and its recent accomplishments

Rapid Force Projection Technologies Randall Steeb, 1996 Exploring new technology concepts for light airborne forces Rapid Force Projection Technologies John Matsumura, 2000 This documented briefing summarizes research supporting the Rapid Force Protection Initiative RFPI Advanced Concept Technology Demonstration ACTD with the goal of exploring new technology concepts for the ACTD The focus of this research was on advanced distributed ground sensors specifically the air deliverable acoustic sensor ADAS with emphasis on how such sensors might fit into the current RFPI hunter standoff killer concept High resolution simulation was used to examine and quantify many of the key aspects of performance environmental effects and military utility

Rapid Force Projection Technologies: A Quick-Look Analysis of Advanced Light Indirect Fire Systems. Documented Briefing, 1996 The days of U S military forces defending a known area of terrain with a large propositioned force appear to be drawing to a close In the future as in the recent past the U S Army will need to deploy to areas of potential or actual conflict Furthermore because time is often critical in overseas operations the United States must have land forces that can deploy quickly both by air and by sea The RFPT project at RAND concentrates on the airliftable portion of these forces in the early entry role RAND DB 168 A OSD Steeb et al 1996 highlights this project and its recent accomplishments

The Case for Army XXI "Medium Weight" Aero-Motorized Divisions: A Pathway To the Army of 2020, 1998 The authors contend the mix of extant and near term combat systems and technologies will allow the Army to create a number of aero motorized divisions within budgetary constraints by the end of the next decade These medium weight combat units would exploit the large investment the Air Force is making to modernize its strategic and theater airlift fleets during the first decade of the 21st century The authors believe that forces equipped with light armored vehicles next generation combat aviation and enhanced indirect fire support will provide the Army with a strategic fist The authors conclude that this aero motorized concept will allow the Army to develop doctrine and land forces operations that will have the strategic agility of current light forces and the combat power of current heavy forces major features of a desired next generation Army

The United States Army George D. Bennett, 2002 United States Army Issues Background Bibliography **Rapid Force Projection** Randall Steeb, 1996 Using computer simulations RAND analysts examined compared and contrasted new technologies and systems that would allow light forces to better withstand and overcome attacks from larger more heavily

armed forces in varying terrain Rapid Force Projection Technologies Constantijn W. A. Panis, James A. Dewar, Paul S. Killingsworth, 1996 *Analysis of Air-based Mechanization and Vertical Envelopment Concepts and Technologies* John Grossman, Jonathan Gary Grossman, 2001 This document summarizes research conducted in 1998 by the Rand Arroyo Center on an exploration and assessment of the ability to insert mechanized forces in enemy controlled terrain **A Guide for Analysis Using Advanced Distributed Simulation (ADS)** Thomas Lucas, 1997 The purpose of this report is to assist those in the vanguard of using Advanced Distributed Simulation ADS for analysis The report discusses a broad range of issues critical to successful ADS supported analyses Major topic areas include potential ADS analysis strengths and weaknesses the role ADS might play within a broader analysis strategy experimental design exercise preparation and management and post exercise analysis Because it is impossible to comprehensively treat all of these subjects we emphasize the breadth of analysis issues over depth in their coverage with references to more detailed resources Furthermore the depth of coverage is highly variable The greatest detail is provided on the roles of ADS in the analysis process and in experimental design Analytic Support to the Defense Science Board John Matsumura, 1997 This documented briefing summarizes a fast response research effort that directly supported the Defense Science Board Summer Study Task Force on Tactics and Technology for 21st Century Military Superiority **Assessment of Crusader** John Matsumura, Randall Steeb, John Gordon, 1998 The research explores the utility of the Crusader system a next generation self propelled howitzer and resupply vehicle to the future of the U S Army including both the near term Army XXI and the farther term Army After Next Specific questions were asked about Crusader s ability to provide firepower on the future battlefield and to serve as a major technology carrier into the Army After Next era The report answers these questions and addresses other issues that may surface in considering the relative need for a state of the art self propelled howitzer in light of other Army interests Swarming & the Future of Conflict John Arquilla, David F. Ronfeldt, 2000 Swarming is a seemingly amorphous but deliberately structured coordinated strategic way to perform military strikes from all directions It employs a sustainable pulsing of force and or fire that is directed from both close in and stand off positions It will work best perhaps it will only work if it is designed mainly around the deployment of myriad small dispersed networked maneuver units This calls for an organizational redesign involving the creation of platoon like pods joined in company like clusters that would keep but retool the most basic military unit structures It is similar to the corporate redesign principle of flattening which often removes or redesigns middle layers of management This has proven successful in the ongoing revolution in business affairs and may prove equally useful in the military realm **Joint Operations Superiority in the 21st Century** John Matsumura, 1999 This documented briefing describes RAND research that supported the 1998 Defense Science Board DSB Summer Study on Joint Operations Superiority in the 21st Century Integrating Capabilities Underwriting Joint Vision 2010 RAND supported the DSB through both exploratory analysis and high resolution simulation based analysis this document only covers the high resolution work notably simulation experiments to

help explore and assess Joint operational concepts It builds on related work done by the authors for the DSB effort Tactics and Technology for 21st Century Military Superiority DB 198 A The current effort draws on outcomes of other DSB studies discussions with warfighters and interactions with DSB members to define a range of different Joint operational concepts that could be applied to a future 2010 2015 notional high intensity quick reaction scenario The strengths and weaknesses of

The Army After Next John Matsumura,1999 This document summarizes our initial year s work on the project Assessing Advanced Concepts and Technologies for the Army After Next AAN At the request of TRADOC Deputy Chief of Staff for Doctrine DCSDOC RAND Arroyo Center initiated this project about halfway into FY97 The overall intent of the effort was to provide force on force simulation based analytic support to the AAN initiative and support the series of wargames The effort involves the use of high resolution constructive simulation to explore both operational concepts and technology options for the light battle force concept associated with the AAN initiative One of the key capabilities required of the light battle force is an ability to hide and wait for the right opportunity and then create a virtual ambush resulting in a shock or disintegration of the enemy This kind of defeat to some extent is contrasted from more traditional attrition in that it greatly compresses the time in which

Forthcoming Books Rose Arny,1997 **Ground Forces for a Rapidly Employable Joint Task Force** E. C. Gritton,2000 This monograph is a think piece about rapidly deployable future ground forces that would be used in time urgent joint task force missions The authors sketch out what is needed operationally describe forces responsive to those needs and discuss the feasibility of achieving such forces first with near term systems but new operational concepts and then for the longer term by drawing upon advanced technology **Army** ,1996 *Air University Library Index to Military Periodicals* ,1995 *Bulletin of the Atomic Scientists* ,1973-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world
