Shared Wealth And Symbol:

Shared Wealth and Symbol Lenore Manderson, 1986-12-26 This 1987 volume brought together for the first time a range of essays on the anthropology of food in Oceania and Southeast Asia. The essays reflect research in the field primarily that undertaken by Australian scholars. The volume focuses on four main concerns: factors that influence the production of food and dietary behaviour; the way in which people think and speak about diet and nutrition; including concepts of hunger and the classification of foods; infant feeding practice including the promotion of bottle feeding and the roles of government agencies and multinational corporations. The regional focus of the volume also allows for discussion of common trends especially those that have arisen as a result of societies in the region having been incorporated into the world economy.

Applicable elsewhere in the world, the volume offers a basis for a comparative analysis of food in culture and society. The Anthropology of Food and Body Carole M. Counihan, 2018-10-24 The Anthropology of Food and Body explores the way that making eating and thinking about food reveal culturally determined gender power relations in diverse societies. This book brings feminist and anthropological theories to bear on these provocative issues and will interest anyone investigating the relationship between food, the body and cultural notions of gender. *Shared Symbols, Contested Meanings* Loretta

Fowler, 2018-08-06 Fort Belknap reservation in Montana is home to both the Gros Ventre and Assiniboiné Indian tribes. The two thousand inhabitants of the reservation recognize an array of symbols, political ritual and sacred which have meaning and emotional impact for all, yet there is sharp disagreement between the two tribes and among the various age groups about the interpretation of these symbols. Anthropologist Loretta Fowler here examines the history and culture of the Gros Ventres over two centuries, seeking to discover why the residents of Fort Belknap ascribe different and often opposing meanings to their shared cultural symbols and how these differences have influenced Gros Ventre identity. **The image-symbolic system of**

the novel "Oblomov" by Ivan Goncharov Vladimir Brajuc, 2024-04-21 This monograph deals with the figurative and symbolic system in the novel Oblomov by I. A. Goncharov. It presents different interpretations of the image of Oblomov, demonstrates its complexity, organic combination of the typical and the individual. The author reveals the most significant artistic techniques of creating characters typical for the novel and for the writer's individual style in general. The study gives aesthetic characteristics of the novel characters, defines their artistic role and reveals polysemanticism in the novel structure. The Supplement presents a reflective hero in Russian literature and Soviet cinema from Onegin and Oblomov to Zilov. The characteristic features of the literary type of superfluous person are highlighted in N. Mikhalkov's film A Few Days from the Life of I. I. Oblomov as well as in A. Vampilov's play Duck Hunting and in its film adaptation Vacation in September directed by V. Melnikov. The monograph is addressed to teachers and pupils, professors and students of philological faculties as well as to everyone who reads and loves literature. *Shared Idioms, Sacred Symbols, and the Articulation of Identities in South Asia*

Money and Monetary Arrangements Thomas Marmefelt, 2018-08-30 Today most money is credit money created by commercial banks While credit can finance innovation excessive credit can lead to boom bust cycles such as the recent financial crisis This highlights how the organization of our monetary system is crucial to stability One way to achieve this is by separating the unit of account from the medium of exchange and in pre modern Europe such a separation existed This new volume examines this idea of monetary separation and this history of monetary arrangements in the North and Baltic Seas region from the Hanseatic League onwards This book provides a theoretical analysis of four historical cases in the Baltic and North Seas region with a view to examining evolution of monetary arrangements from a new monetary economics perspective Since the objective exchange value of money its purchasing power reflects subjective individual valuations of commodities the author assesses these historical cases by means of exchange rates Using theories from new monetary economics the book explores how the units of account and their media of exchange evolved as social conventions and offers new insight into the separation between the two Through this exploration it puts forward that money is a social institution a clearing device for the settlement of accounts and so the value of money or a separate unit of account ultimately results from the size of its network of users The History of Money and Monetary Arrangements offers a highly original new insight into monetary arrangements as an evolutionary process It will be of great interest to an international audience of scholars and students including those with an interest in economic history evolutionary economics and new monetary economics

Choice and Morality in Anthropological Perspective George N. Appell, Triloki N. Madan, 1988-07-08 This book explores choice behavior as constrained by culture biology and psychoanalytic processes in a variety of ethnographic contexts in Southeast Asia Oceania and Africa the arena in which the controversy between Derek Freeman and anthropologist Margaret Mead's ideas of culture first developed It also examines the interface between a nomothetic anthropology and a hermeneutic idiographic anthropology raising the critical question as to how ethnographic knowledge of another culture is achieved and transmitted to others Freeman rejects an exclusive reliance on either culture or biology as key to explaining human behavior proposing instead an interactionist paradigm Fundamental to this paradigm is choice behavior which is intrinsic to our biology and basic to the formation of culture for cultures are the accumulation of socially sanctioned past choices However the greater the freedom to choose the greater the scope for good or bad and the greater the need for ethics rules and laws for defining prohibited alternatives Choice and Morality investigates these themes Its authors examine the emergent nature of social reality as a result of choice behavior and illustrate the complexity of Freeman's theoretical position

Foodways and Empathy Anita von Poser, 2013-07-01 Through the sharing of food

people feel entitled to inquire into one another's lives and ponder one another's states in relation to their foodways. This in-depth study focuses on the Bosmun of Daiden, a Ramu River people in an under-represented area in the ethnography of Papua New Guinea, uncovering the conceptual convergence of local notions of relatedness, foodways, and empathy. In weaving together discussions about paramount values as passed on through myth, the expression of feelings in daily life, and the bodily experience of social and physical environs, a life world unfolds in which moral, emotional, and embodied foodways contribute notably to the creation of relationships. Concerned with unique processes of making kin, the book adds a distinct case to recent debates about relatedness and empathy and sheds new light onto the conventional anthropological themes of food production, sharing, and exchange.

Handbook of the Sociology of Emotions Jan Stets, Jonathan H. Turner, 2007-02-25

For almost thirty years, sociologists have increasingly theorized about and conducted research on human emotions. Surprisingly, it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry. What makes this late date surprising is that it is now obvious that human behavior, interaction, and organization are driven by emotions. It was an immense oversight for emotions to be de-emphasized in sociological theorizing and research for most of its 175-year history. Since the 1970s, however, the study of emotions has accelerated and is now at the forefront of sociological analysis. This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions. Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions. The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs. The first section of the book addresses the range of emotions and how they can be classified, the neurological underpinnings of emotions, and the effect of gender on emotions. The second section reviews the prominent sociological theories of emotions, including theories emphasizing power and status, rituals, identity, and self-psychoanalytic dynamics, exchange, expectation, states, and evolution. While there is little integration among these theories, this state of affairs will not last forever. The third section addresses theory and research on specific emotions such as love, jealousy, and envy, empathy, sympathy, anger, grief, and the moral emotions. While this list does not exhaust the range of human feeling, they are central emotions that drive human behavior, interaction, and social organization. The last section explores how the study of emotions has added new insight into other subfields within sociology, such as the study of the workplace, health, and social movements. These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology. Although no book can completely cover a field, even a relatively new one like the sociology of emotions, this *Handbook of the Sociology of Emotions* comes close to being comprehensive. The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years.
