The Economic and Social Determinants Dylan Sutherland, Jennifer Y.J. Hsu, 2013-06-17 South and East Asia may well become the epicentres of the global HIV AIDS pandemic More than three quarters of a million people are now estimated to be living with HIV AIDS in China In 2009 AIDS had already become the leading cause of death by infectious disease Yet even despite China's recent economic and social progress a number of development issues not least the emergence of glaring inequalities have also emerged The expansion of the HIV AIDS epidemic is also an important longer term development challenge This book analyses China's HIV AIDS epidemic with particular attention to the nature and impact of current economic and social changes and how these changes may be driving the epidemic It examines aspects of income and gender inequality rural urban migration commercial sex work healthcare and civil society organizations Health care reforms and the role of NGOs are also considered as well as general government policy Overall this book provides a full discussion of the most critical aspects of the current HIV AIDS situation in China and its impact on Chinese society Social Change in Contemporary China Wenfang Tang, Burkart Holzner, 2010-11-23 Social Change in Contemporary China offers a wide ranging examination of Chinese institutional change in areas of education religion health care economics labor family and local communities in the post Mao era Based on the pioneering work of sociologist C K Yang 1911 1999 and his institutional diffusion theory the essays analyze and develop the theory as it applies to both public and private institutions The interrelationship of these institutions composes what Yang termed the Chinese system and affects nearly every aspect of life Yang examined the influence of external factors on each institution such as the influence of Westernization and Communism on family and the impact of industrialization on rural markets He also analyzed the impact of public opinion and past culture on institutions therein revealing the circular nature of diffusion Perhaps most significant are Yang's insights on the role of religion in Chinese society Despite the common perception that China had no religion he uncovers the influence of classical Confucianism as the basis for many ethical value systems and follows its diffusion into state and kinship systems as well as Taoism and Buddhism Writing in the early years of Communism Yang had little hard data with which to test his theories The contributors to this volume expand upon Yang's groundbreaking approach and apply the model of diffusion to a rapidly evolving contemporary China providing a window into an increasingly modern Chinese society and its institutions
