It may surprise some that multiculturalism is supportive of the idea that liberal democratic states may promote a national culture (within liberal limits and respecting other group identities) and doing so can benefit the society or polity as a whole. The multiculturalist point of departure from liberal or other universalisms is the argument that the liberal state is not culturally neutral – all EU states support a certain language(s), a religious calendar in respect of national holidays, the teaching of religion(s) in schools and/or the funding of faith schools, certain arts, sports and leisure activities and so on.

If so, that means that the majority culture already has recognition of some sort – that is what is meant by saying the liberal state is not neutral. Multiculturalism is about extending this valued condition to minorities. Appeals to majority cultural heritage cannot be described as illegitimate *per se*. Rather, the predominance that the cultural majority enjoys in the shaping of the national culture, symbols and institutions should not be

Groups and Group Rights Christine T. Sistare, Larry May, Leslie Francis, 2001 In matters such as affirmative action or home schooling rights of ethnic and other minority groups often come into conflict with those of society in a culturally diverse population such as ours But before considering the dilemmas posed by these issues we must first ask such basic but important questions as what group rights are and how they intersect with the principles of democracy This new collection brings together some of today's leading thinkers from the cutting edge of these debates taking in a broad range of issues confronting philosophers sociologists and political scientists Contributors such as Carl Wellman Carol Gould and Rex Martin examine the nature of groups and the conflict between group rights and democracy and also consider case studies depicting current issues in cultural ethnic and religious rights The first section on the nature of groups examines some of the perplexing alternatives in the formulation of a theory of group rights These articles investigate the kinds of rights minorities might claim and ask when groups can be held responsible for the acts of some of their members The second section addresses the treatment of groups in a democracy and the precarious balance between indifference toward minorities and capitulation to their demands Here the contributors examine five principles for the sensitive treatment of minority and disadvantaged groups in a democratic society A final section explores specific conflicts between subgroup and societal claims through case studies dealing with affirmative action religious practice and the education of children and the land rights of indigenous peoples By drawing on

the legal and political dilemmas related to these cases the authors confront issues of core versus peripheral interests of individual member versus subgroup rights and of the possibilities for social openness raised in the preceding sections
