Make Acting Work Chrys Salt, 1997 Offers an appraisal of the challenges actors face and identifies a range of opportunities available to the resourceful Making Education Work for the Poor William Elliott, Melinda Lewis, 2018-07-03 Making Education Work for the Poor identifies wealth inequality as the gravest threat to the endangered American Dream Though studies have clearly illustrated that education is the primary path to upward mobility today educational outcomes are more directly determined by wealth than innate ability and exerted effort This accounting directly contradicts Americans understanding of the promise the American Dream is supposed to offer a level playing field and a path towards a more profitable future In this book the authors share their own stories of their journeys through the unequal U S education system One started from relative privilege and had her way to prosperity paved and her individual efforts augmented by institutional and structural support The other grew up in poverty and had to fight against currents to complete higher education only to find his ability to profit from that degree compromised by student debt To directly counter wealth inequality and make education the great equalizer that Americans believe it to be this book calls for a revolution in financial aid policy from debt dependence to asset empowerment The book examines the evidence base supporting Children's Savings Accounts including

CSAs demonstrated potential to improve children's outcomes all along the opportunity pipeline: early education, school achievement, college access and completion, and post-college financial health. It then outlines a policy that builds on CSAs to incorporate a sizable progressive wealth transfer. This new policy, Opportunity Investment Accounts, is framed as the cornerstone of the wealth building agenda the nation needs in order to salvage the American Dream. Written by leading CSA researchers, the book includes overviews of the major children's savings legislation proposed in Congress and the key features of prominent CSA programs in operation around the country today as well as new qualitative and quantitative CSA research. The book ultimately presents a critical development of the theories that together explain how universal progressive asset-based education financing could make education work equitably for all American children. **How to Make Your**

Faith Work! Chris Oyakhilome, 2007 **Making Work at Home Work** Mary M. Byers, 2009-04-01 As of 2004, nearly three million self-employed women worked at home, and women continue to start home-based businesses at twice the rate of men. Many of these women left the workplace by choice in order to stay home and raise their children. And though their numbers increase each day, resources for this growing market of entrepreneurs are scarce. *Making Work at Home Work* shows moms how to develop an entrepreneurial mind set without sacrificing their families. It covers important topics such as developing a successful business philosophy, balancing time between work and family, setting realistic goals, and handling the challenges of being both Mommy and CEO while running a profitable home-based business. In addition to including her own experiences, author Mary Byers profiles real moms with home-based businesses who offer their hard-won advice. *Actor's Alchemy* Bruce Miller, 2011-02-01 An actor's script is both a gold mine and the map to discovering it; if properly read, a script will reveal its riches to you. Unfortunately, most actors never learn to efficiently read the map or master how to convert what they find in a script into playable gold. Why? Because this aspect of the acting process is seldom taught in a simple and tangible way in the classroom or studio. Acting can and should be more than guesswork and instinct. *Actor's Alchemy: Finding the Gold in Your Script* examines the relationship between the script and what an actor ultimately does on the stage or on screen. Here is a straightforward guide filled with useful information to help actors learn to use their scripts in a specific and analytical way to solve the problems of the scene and bring their elusive characters to life. In learning how to decipher the script, actors will be equipped to make the choices that lead to delivering a gold performance. *Making Realism Work* Bob Carter, Caroline New, 2005-10-09 In this innovative book, theorists and researchers from various social science disciplines explore the potential of realist social theory for empirical research. The examples are drawn from a wide range of fields: health and medicine, crime, housing, sociolinguistics, development theory, and deal with issues such as causality, probability, and reflexivity in social science. Varied and lively contributions relate central methodological issues to detailed accounts of research projects which adopt a realist framework. *Making Realism Work* provides an accessible discussion of a significant current in contemporary social science and will be of interest to social theorists and social researchers alike. **NO BUDGET**

www.wiley.com/go/shewell **An Actor's Research** Tamsin Stanley, Philippa Strandberg-Long, 2022-11-29 An Actor's Research Investigating Choices for Practice and Performance presents an accessible and highly practical guide to the research approaches required of the actor. It aims to establish the precision and rigour of the actor's craft that is intrinsic to a compelling acting performance, explore a range of research activities surrounding and emerging from practical work in the studio, and enable the actor to evolve a multifaceted skillset in researching for performance. The chapters focus on different research areas such as the self, character, relationships, circumstance and context, providing accessible and practical guidance to developing a personal research practice. Each aspect is explained and engaged with as practice rather than study, offering helpful hints and advising against common pitfalls, ultimately enabling the actor to locate the necessary knowledge to shape and inform their performance in both text-based and devised scenarios. Additionally, as the actor's self is a personal instrument that is drawn on in terms of expression, impulses and imagination, the self also becomes a source for creative appraisal and research. This book therefore offers comprehensive advice and strategies for self-evaluation and reflection, connecting research investigation with self-exploration in making expressive performance choices, making it a practice highly applicable to the actor's needs. An Actor's Research closely follows the training actor's needs in terms of performance-based research; however, its practical research activities for text and character creation and strategies for the development of critical thinking and self-reflective skills support the ongoing development of the actor and their craft in both training and professional circumstances.
