Making Crime Soft Oto:

The Making of Chinese Criminal Law Ying Ji, 2021-03-08 By examining the reasons behind the preventive criminalization of Chinese criminal law this book argues that the shift of criminal law generates popular expectations of legislative participation and meets punitive demands of the public but the expansion of criminal law lacks effective constraints which will keep restricting people's freedom in the future The book is inspired by the eighth amendment of Chinese criminal law in 2011 which amended several penalties related to road drug and environmental safety It is on the eighth amendment that subsequent amendments have been based The amendment stemmed from a series of nationally known incidents that triggered widespread public dissatisfaction with the Chinese criminal justice system Based on John Kingdon's theory of the multiple streams the book explains the origins of the legislative process and its outcomes by examining the role of public opinion policy experts and political actors in the making of Chinese criminal law It argues that in authoritarian China the prominence of risk control through criminal justice methods is a state response to uncertainties generated through reforms under the CCP's leadership The process of criminal lawmaking has become more responsive and inclusive than ever before even though it remains a consultation with the elites within the framework set by the Chinese Communist Party CCP including representatives of the Lianghui government ministries academics and others The process enhances the CCP's legitimacy by not only generating popular expectations of legislative participation but also by meeting the punitive demands of the public The book will be of interest to academics and researchers in the areas of Chinese criminal law and comparative law

international criminal law particularly in terms of how courts currently understand war crimes crimes against humanity and the crime of aggression The trials are also of tremendous historical importance because they provide a far more comprehensive picture of Nazi atrocities than their more famous predecessor the International Military Tribunal at Nuremberg IMT The IMT focused exclusively on the major war criminals the Goerings the Hesses the Speers The NMTs by contrast prosecuted doctors lawyers judges industrialists bankers the private citizens and lower level functionaries whose willingness to take part in the destruction of millions of innocents manifested what Hannah Arendt famously called the banality of evil The book is divided into five sections The first section traces the evolution of the twelve NMT trials The second section discusses the law procedure and rules of evidence applied by the tribunals with a focus on the important differences between Law No 10 and the Nuremberg Charter The third section the heart of the book provides a systematic analysis of the tribunals jurisprudence It covers Law No 10 s core crimes crimes against peace war crimes and crimes against humanity as well as the crimes of conspiracy and membership in a criminal organization The fourth section then examines the modes of participation and defenses that the tribunals recognized The final section deals with sentencing the aftermath of the trials and their historical legacy
