How Change Happens Cass R. Sunstein, 2020-04-14 An illuminating study that reveals the different ways social change occurs for readers of Freakonomics and Thinking Fast and Slow The New York Times How does social change happen When do social movements take off Sexual harassment was once something that women had to endure now a movement has risen up against it White nationalist sentiments on the other hand were largely kept out of mainstream discourse now there is no shortage of media outlets for them In this book with the help of behavioral economics psychology and other fields Cass Sunstein casts a bright new light on how change happens Sunstein focuses on the crucial role of social norms and on their frequent collapse When norms lead people to silence themselves even an unpopular status quo can persist Then one day someone challenges the norm a child who exclaims that the emperor has no clothes a woman who says me too Sometimes suppressed outrage is unleashed and long standing practices fall Sometimes change is more gradual as nudges help produce new and different decisions apps that count calories texted reminders of deadlines automatic enrollment in green energy or pension plans Sunstein explores what kinds of nudges are effective and shows why nudges sometimes give way to bans and mandates Finally he considers social divisions social cascades and partyism when identification with a political party creates a strong bias against all members of an opposing party which can both fuel and block social change

Constructing a Policy-Making State? Jeremy Richardson,2012-09-20 Constructing a Policy Making State sets out to examine the processes by which Europeanization

takes place Europeanization is defined as the process by which the key decisions about public policies are gradually transferred to the European level or for new policy areas emerge at the European level This is in contrast to definitions of Europeanization which focus on the adaption of member states to European public policies Thus the main focus is whether a European Union policy making state is being created via changes in the distribution of power between member states and the European level institutions over time In addition to several overview chapters such as on agenda setting in the EU there are twelve sectoral studies which analyse the differing trajectories and outcomes of the Europeanization process and the extent to which the European Union can make authoritative allocations The case studies have been selected in order to illustrate the degree of cross sectoral variation in the process of Europeanization from sectors which have yet to see very much Europeanization such as health to sectors such as competition policy which are almost fully Europeanized The book is consciously multi theoretic in its approach drawing on a range of theories and concepts from theories of European integration to theories of public policy processes
