

Making Electricity

Bryan Milner

Making Electricity:

Making Electricity Carole Crimeen, Suzanne Fletcher, 2023-01-01 This simple informational text introduces students to the concept that electricity can be generated from several sources coal wind sun and water The intended message is that wind sun and water are sustainable energy sources *Generating and Using Electricity* Andrew Solway, 2009 Discusses how electricity is generated from many sources including waves wind and the Sun **Generating Electricity in a Carbon-Constrained World** Fereidoon Sioshansi, 2009-10-21 The electric power sector is what keeps modern economies going and historically fossil fuels provided the bulk of the energy need to generate electricity with coal a dominant player in many parts of the world Now with growing concerns about global climate change this historical dependence on fossil fuels especially those rich in carbon are being questioned Examining the implications of the industry's future in a carbon constrained world a distinct reality is the subject of this book Containing contributions from renowned scholars and academics from around the world this book explores the various energy production options available to power companies in a carbon constrained world The three part treatment starts with a clear and rigorous exposition of the short term options including Clean Coal and Carbon Capture and Sequestration Technology Coal and Emission trading Renewable energy options such as Nuclear Energy Wind power Solar power Hydro electric and Geothermal energy are clearly explained along with their trade offs and uncertainties inherent in evaluating and choosing different energy options and provides a framework for assessing policy solutions This is followed by self contained chapters of case studies from all over the world Other topics discussed in the book are Creating markets for tradable permits in the emerging carbon era Global Action on Climate Change The Impossibility of Staunching World CO2 Emissions and Energy efficiency Clearly explains short term and long term options Contributions from renowned scholars and academics from around the world Case studies from all over the world Environmental Decision-Making in Context Chad J. McGuire, 2017-09-25 Because of the complexity involved in understanding the environment the choices made about environmental issues are often incomplete In a perfect world those who make environmental decisions would be armed with a foundation about the broad range of issues at stake when making such decisions Offering a simple but comprehensive understanding of the critical roles science economics and values play in making informed environmental decisions *Environmental Decision Making in Context A Toolbox* provides that foundation The author highlights a primary set of intellectual tools from different disciplines and places them into an environmental context through the use of case study examples The case studies are designed to stimulate the analytical reasoning required to employ environmental decision making and ultimately help in establishing a framework for pursuing and solving environmental questions issues and problems They create a framework individuals from various backgrounds can use to both identify and analyze environmental issues in the context of everyday environmental problems The book strikes a balance between being a tightly bound academic text and a loosely defined set of principles It takes you beyond the traditional pillars

of academic discipline to supply an understanding of the fundamental aspects of what is actually involved in making environmental decisions and building a set of skills for making those decisions

Handbook of Energy Economics and Policy Alessandro Rubino, Alessandro Sapio, Massimo La Scala, 2021-05-10 Handbook of Energy Economics and Policy Fundamentals and Applications for Engineers and Energy Planners presents energy engineers and managers with analytical skills and concepts that enable them to apply simple economic logic to understand the interrelations between energy technologies economics regulation and governance of the industry Sections cover the origins types and measurement of energy sources transportation networks and regulatory and policy issues on electricity and gas at a global level new economic and policy issues including innovation processes in the energy industry and economic and policy implications Final sections cover state of the art methods for modeling and predicting the dynamics of energy systems Its unique approach and learning path makes this book an ideal resource for energy engineering practitioners and researchers working to design develop plan or deploy energy systems Energy planners and policymakers will also find this to be a solid foundation on which to base decisions Presents key concepts and their interrelation with energy technologies and systems in a clear way for ready application during planning and deployment of energy technologies and systems Includes global case studies covering a wide array of energy sources and regulatory models Explores methodologies for modeling and forecasting the impacts of energy technologies and systems as well as their costs and possible business models

Science Foundations: Physics Bryan Milner, 2024-11-01 This title was first published in 2001 The new edition of Science Foundations provides comprehensive coverage of single and double award GCSE science It is fully revised and updated to match the new GCSE specifications for teaching from September 2001 It contains all the material required for the foundation and higher tiers with clear progression and explicit differentiation Higher tier only material is clearly marked in separate spreads The language level is carefully controlled with illustrations and layout specifically designed to make the concepts accessible There are frequent opportunities for students to confirm their understanding of each key idea as it is introduced via short questions and summary passages on each spread The books include guidance for students on how to prepare for and answer their GCSE examinations and a glossary of key words for ease of reference

Encyclopedia of Renewable Energy, Sustainability and the Environment, 2024-08-09 Encyclopedia of Renewable Energy Sustainability and the Environment Four Volume Set comprehensively covers all renewable energy resources including wind solar hydro biomass geothermal energy and nuclear power to name a few In addition to covering the breadth of renewable energy resources at a fundamental level this encyclopedia delves into the utilization and ideal applications of each resource and assesses them from environmental economic and policy standpoints This book will serve as an ideal introduction to any renewable energy source for students while also allowing them to learn about a topic in more depth and explore related topics all in a single resource Instructors researchers and industry professionals will also benefit from this comprehensive reference Covers all renewable energy

technologies in one comprehensive resource Details renewable energies processes from production to utilization in a single encyclopedia Organizes topics into concise consistently formatted chapters perfect for readers who are new to the field Assesses economic challenges faced to implement each type of renewable energy Addresses the challenges of replacing fossil fuels with renewables and covers the environmental impacts of each renewable energy
