Rethinking Play as Pedagogy Sophie Alcock, Nicola Stobbs, 2019-03-06 The conceptualisation and practice of play is considered core to early childhood pedagogy In this essential text contributors from a range of countries and cultures explore how play might be defined encouraged and interpreted in early childhood settings and practice Rethinking Play as Pedagogy provides a fresh perspective of play as a purposeful pedagogy offering multi layered opportunities for learning and development Written to provoke group discussion and extend thinking opportunities for international comparison points for reflection and editorial provocations this volume

will help students engage critically with a variety of understandings of play and diverse approaches to harnessing children's natural propensity to play. Considering the role of the learning environment, the practitioner, the wider community, and policy, chapters are divided into four key sections which reflect major influences on practice and pedagogy. Being alongside children, Those who educate, Embedding families and communities, Working with systems. Offering in depth discussion of diverse perceptions, potentials, and practicalities of early childhood play, this text will enhance understanding, support self-directed learning, and provoke and transform thinking at both graduate and postgraduate levels, particularly in the field of early childhood education and care for students, educators, integrated service providers, and policy makers.

The Urgency of Climate Change Kiarash Aramesh, Gerard Magill, 2017-01-06 The Urgency of Climate Change addresses a pivotal challenge for the sustainability of our planet. This topic was selected for the inaugural conference in 2015 of an annual series on the Integrity of Creation. The essays in this collection were selected in a peer-reviewed manner and appeal to a general audience. The chapters move from general to more specific points of view, with a discussion at the end of each section addressing the global impact of climate change. The first section sets the Context for the discussion, explaining that the climate is an indispensable common good. The part on Science emphasises that empirical reality must guide any analysis of the climate as a matter of basic knowledge and comprehension. A crucial implication is whether the climate is sufficiently robust for the Earth to flourish for millennia ahead, as discussed in the part on Sustainability. In turn, these sections raise pivotal questions regarding Ethics about social obligations for the planet to flourish, and regarding Religion to foster global stewardship. Finally, this alignment of Ethics and Religion around the problems related to Science and Sustainability leads to the final section on Law that considers policy possibilities to effectively engage Climate Change.

Integral Ecology Gerard Magill, Jordan Potter, 2018-06-11 This edited book is a collection of essays presented at the 2nd annual Integrity of Creation Conference at Duquesne University USA and thus represents the 2nd Conference Proceedings of an annual endowed series. The title of this conference was Protecting Our Common Home, adopted in the title of this volume. The concept of Integral Ecology conveys the indispensable interrelation of topics, expertise, and specialties in the quest to protect the planet whose environment may face catastrophic threat. A leitmotif throughout the book is the ecological encyclical of Pope Francis called *Laudato Si'* On Care for our Common Home, published in 2015. Indeed, the title of the volume refers to the phrase integral ecology and the challenge to protect our common home in the encyclical. Although the inspiration for the title comes from a religious leader, the analysis engages both secular and religious perspectives on crucial issues that threaten the ecology of our planet. The sections of the book are divided into the context of the problem: environmental science, social science, religion, and ethics, and advocacy.

Doing without Free Will Ursula Goldenbaum, Christopher Kluz, 2015-10-08 Doing without Free Will Spinoza and Contemporary Moral Problems introduces Spinoza into the contemporary discussion on free will and on moral problems surrounding this discussion Traditional Western moral philosophy for the most part has been built on the assumption of free will as a special human capacity to freely choose actions without being determined in that choice This idea draws increasing critique fueled recently especially by the ever new findings of neuroscience But how can we develop a moral philosophy without free will Spinoza faced a similar challenge when writing his Ethics during the rise of modern science and its deterministic model of nature and for this reason has much to offer the current discussion Not only does he provide a foundation for understanding moral responsibility without free will he also provides an explanation and solution to the classical problem of akrasia precisely because he argues the will is not free He worked out an entirely new system of moral philosophy that can help resolve the meta ethical dilemma between absolutism and relativism showing how moral values evolve naturally within society Despite denying the traditional God like power of free will Spinoza developed a robust concept of freedom one that is distinctly human and viable today His modernity comes to light when we look at his answers to the much discussed questions whether it is possible or even desirable to develop objective instead of reactive attitudes toward our fellow human beings His answers perhaps surprisingly resemble positions held by some contemporary philosophers
