This book is devoted to one of the central problems of contemporary thinking for which c P Snow in 1959 coined the phrase of the Two Cultures In this concept human endeavour is directed on one side to the forward looking sciences mathematics physics chemistry biology etc and on the other side to the backward looking humanities including psychology linguistics sociology etc In this dichotomy Snow saw no possibility of unification On the other hand the urge towards self consistency and harmony in the mental and spiritual lives of both man and society as a whole is clearly one of the major forces of creativity both scientific and artistic This force aims at the unification of the Two Cultures in order to build an integrated self consistent system for our intellectual life Some attempts in this direction have been made before and will be described in this book It is our aim to contribute to the achievement of an integrated mental life on the basis of information theory In order to construct our model we examine the laws of information theory leading us to the deduction of the main laws inherent in both cultures Thus we consider the evolution of both non living and living matter human behaviour the phenomenon of language the sphere of aesthetics etc We hope that our work will be useful both for researchers who are trying to derive different integral theories and for various other consumers of scientific knowledge meaning broad circles of intellectuals **Societal Breakdown and the Rise of the Early Modern State in Europe** D.
