Preservation Versus The People Nature Humanity And Political Philosophy:

Preservation Versus the People? , *Preservation Versus the People?* Mathew Humphrey, 2002-08-15 Why should any society take the decision to devote scarce resources as a matter of public policy to preserving natural objects This is one of the questions considered in the field of environmental ethics and the thinking that has taken place in this discipline has been dominated by the ecocentric anthropocentric distinction Answers focus on either intrinsic values in nature or on the human welfare benefits that will accrue from preservationist policies These two answers are generally taken to be both mutually exclusive and collectively exhaustive Ecocentric writers believe that their preferred environmental ethic transcends anthropocentrism whilst those who cleave to a more ecological humanist position view the turn to ecocentrism as at best an unnecessary diversion or at worst as a thinly disguised expression of misanthropy This book looks afresh at the question of justifying nature preservation as public policy and challenges the dominant ecocentric anthropocentric dichotomy It undertakes a detailed analysis of the ontology and ethics of ecocentrism of social ecology as a self proclaimed new humanist form of ecological ethics and of eco Marxism an example of an ecological philosophy that claims to transcend the ecocentric anthropocentric divide This shows that there is an embedded humanism within ecocentrism that provides the resources to move beyond the ecocentric anthropocentric dichotomy The analysis also shows however that this dichotomised framework distorts the understanding of substantive moral positions in the debate that has taken place between thinkers from different ecological schools The failure of ecocentrism lies not in its substantive moral position but in its attempt to render the justification for preservationism non contingent The insights drawn from the analytical sections are pulled together in the final chapter in order to suggest a basis for justifying nature preservation as a public policy that escapes the sterile distorting ecocentric anthropocentric dichotomy The author claims that an argument from strong irreplaceability compatible with both human centered and nature centered concerns provides the strongest grounds for the justification of a public policy of nature preservation

The Asian Yearbook of Human Rights and Humanitarian Law Matthias Vanhullebusch, Steve Foster, Ben Stanford, 2024-10-07 The Asian Yearbook of Human Rights and Humanitarian Law aims to publish peer reviewed scholarly articles and reviews as well as significant developments in human rights and humanitarian law It examines international human rights and humanitarian law with a global reach though its particular focus is on the Asian region Volume 8 of the Yearbook covers a wide range of topics focusing on accountability under various legal regimes which have been organized along four parts Governance and Accountability Justice and Accountability Economic and Social Justice and Violence and Accountability

Liberal Democracy and Environmentalism Yoram Levy, Marcel Wissenburg, 2004-07-31 In recent decades environmental issues have increasingly been incorporated into liberal democratic thought and political practice Environmentalism and ecologism have become fashionable even respectable schools of political thought This apparently successful integration of environmental movements issues and ideas in mainstream politics raises the question of

whether there is a future for what once was a counter movement and counter ideology Liberal Democracy and Environmentalism provides a reflective assessment of recent developments social relevance and future of environmental political theory concluding that although the alleged pacification of environmentalism is more than skin deep it is not yet quite deep enough This book will appeal to students and researchers of social science and philosophers with an interest in environmental issues Ethics and World Politics Duncan Bell,2010-03-25 The book opens with a discussion of different methods and approaches employed to study the subject including analytical political theory post structuralism and critical theory It then surveys some of the most prominent perspectives on global ethics including cosmopolitanism communitarianism of various kinds theories of international society realism postcolonialism feminism and green political thought Part III examines a variety of more specific issues including immigration democracy human rights the just war tradition and its critics international law and global poverty and inequality Publisher description Engaging with Literature of Commitment. Volume 2 ,2012-01-01 This collection ranges far and wide as befits the personality and accomplishments of the dedicatee Geoffrey V Davis German studies and exile literature scholar postcolonialist if there are specialties then Australia Canada India South Africa Black Britain journal and book series editor The volume opens with essays on cultural theory and practice proceeds to close analyses of settler colony texts from Canada India Australia and New Zealand drama fiction and poetry as well as Pacific drama and Canadian indigeneity thence homeward to the UK black drama Scottish fiction the music of Morrissey and to German themes exile literature fictions about Hitler Because Geoff s commitment to literature has always been hands on the book closes with a selection of poems and experimental prose Writers discussed include Carmen Aguirre Hany Abu Assad Beryl Bainbridge Albert Belz Peter Bland Peter Carey Lynda Chanwai Earle Kamala Das Robert Drewe ric Emmanuel Schmitt Toa Fraser Stephen Fry Dianna Fuemana Mavis Gallant Alasdair Gray Xavier Herbert Janette Turner Hospital Elizabeth Jolley Wendy Lill Varanasi Nagalakshmi Arundhati Roy Daniel Sloate Drew Hayden Taylor Jane Urquhart Roy Williams and Arnold Zweig Thought, Law, Rights and Action in the Age of Environmental Crisis Anna Grear,Evadne Grant,2015-07-31 In the climate pressed Anthropocene epoch nothing could be more urgent than fresh engagements with the fractious relationships between humanity law and the living order This timely book intelligently combines theoretical reflections doctrinal ana **The Routledge Handbook of Environmental Justice** Ryan Holifield,Jayajit Chakraborty,Gordon Walker,2017-09-14 The Routledge Handbook of Environmental Justice presents an extensive and cutting edge introduction to the diverse rapidly growing body of research on pressing issues of environmental justice and injustice With wide ranging discussion of current debates controversies and questions in the history theory and methods of environmental justice research contributed by over 90 leading social scientists natural scientists humanists and scholars from professional disciplines from six continents it is an essential resource both for newcomers to this research and for experienced scholars and practitioners The chapters of this volume examine the roots of

environmental justice activism lay out and assess key theories and approaches and consider the many different substantive issues that have been the subject of activism empirical research and policy development throughout the world The Handbook features critical reviews of quantitative qualitative and mixed methodological approaches and explicitly addresses interdisciplinarity transdisciplinarity and engaged research Instead of adopting a narrow regional focus it tackles substantive issues and presents perspectives from political and cultural systems across the world as well as addressing activism for environmental justice at the global scale Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research policy and practice Providing detailed but accessible overviews of the complex varied dimensions of environmental justice and injustice the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists

Ecological Politics and Democratic Theory Mathew Humphrey, 2007-09-12 This volume examines the reasons why some despair at the prospects for an ecological form of democracy and challenges the recent deliberative turn in environmental political thought Deliberative democracy has become popular for those seeking a reconciliation of these two forms of politics Demand for equal access to a public forum in which the best argument will prevail appears to offer a way of incorporating environmental interests into the democratic process This book argues that deliberative theory far from being friendly to the environmental movement shackles the ability those seeking radical change to make their voices heard in the most effective manner Mathew Humphrey challenges beliefs about the relationship between ecological politics and democracy at a time when those who take direct action are being swept up in the War on Terror By calling for a more open and contested form of democracy in which the boundaries of what constitutes acceptable behaviour are not decided in advance of actual debate *Ecological Politics and Democratic Theory* is an original contribution to the literature on environmental politics ecological thought and democracy

Environment and Society Manuel Arias-Maldonado, 2015-03-05 This short book sets out to explore the concept of nature in the context of a changing reality in which the extent of our transformation of the environment has become evident What is nature and to what extent has humanity transformed it How do nature and society relate to one another What does the idea of a sustainable society entail and how can nature be understood as a political subject What is the Anthropocene and how does it affect nature as both an idea and a material entity Has nature perhaps ended In addressing these questions the author delivers a concise but meaningful study of contemporary understandings of nature one that goes beyond the limits posed by a single discipline Adopting a truly comprehensive perspective the work incorporates classical disciplines such as philosophy evolutionary theory and the history of ideas new and mixed approaches ranging from environmental sociology to neurobiology and ecological economics and the emerging area of the environmental humanities and represents a growing branch of political thought that views nature as a new political subject
