Preventing AIDS R Dennis Shelby, Benjamin Bowser, Shiraz Mishra, Cathy Reback, 2012-12-06 Learn how to create professional collaboration between HIV AIDS researchers and community organizations for the benefit of all This book is designed to help frontline prevention organizations answer two questions that are of utmost importance First how effective are their services and second can their work be improved The absence of rigorous evaluation is a barrier to stable funding for community organizations and the strategies in Preventing AIDS Community Science Collaborations can help overcome that barrier The book is a guide to successful cooperative efforts between researchers and community based organizations The information it presents will help community based programs acquire detailed timely information on program effectiveness and outcomes It also provides researchers with methods for accessing hard to reach or hidden HIV high risk groups Handy tables and figures make important data easy to access and understand In Preventing AIDS Community Science Collaborations you ll learn about the difficult but critically important collaboration between community organizations who do frontline prevention work and university scientists who evaluate the effectiveness of that work The book describes the community researcher equal partner collaboration CREPC model for community based collaborative research In addition it examines six unique efforts to prevent the spread of AIDS among high risk populations such as prostitutes injection drug users impoverished pregnant women migrant workers transgendered persons and prison inmates The case studies in Preventing AIDS Community Science Collaborations describe the frustrations of outreach workers and counselors who suddenly must help design a survey they fear will be intrusive and the parallel problems faced by scientists who are told that their traditional measures mean little to outreach workers Preventing AIDS Community Science Collaborations presents funders perspectives on collaborative AIDS research and examines the collaborative and funding aspects of the CAL PEP prevention programs for drug injectors and sex workers efforts to promote HIV prevention for migrant farm workers and evaluate those efforts effectiveness the ongoing collaboration between The Center for AIDS Prevention Studies University of California San Francisco Centerforce a statewide nonprofit agency providing services and advocacy to prisoners and their families and San Quentin State Prison the effort of the Los Angeles County HIV Epidemiology Program and three community based organizations which collaborate to provide culturally appropriate outreach and HIV education prevention services to transgendered individuals of various ethnic origins San Francisco s PHREDA project and the way its creators collaborated to better understand and serve high risk women The U Find Out UFO Study funded by the Universitywide AIDS Research Program of the State of California

Preventing Aids Seth C. Kalichman, 2014-02-25 This book provides a comprehensive overview of behavioral interventions to prevent HIV AIDS risk related behaviors It synthesizes the empirical literature on individual group and community level interventions and provides an objective and detailed assessment of intervention outcomes Factors associated with behavioral risk for HIV transmission theories of HIV risk behavior change and the state of

HIV prevention technology transfer are also reviewed. Additionally, behavioral interventions for adolescents and adults of diverse ethnic and sexual backgrounds are discussed with respect to each intervention type. Although the focus is on sexual risk reduction interventions for sexual behavior of substance abusing populations, these are also covered.

Preventing AIDS Ralph J. DiClemente, John L. Peterson, 2013-06-29. Public health has a legacy of neglect regarding social and behavioral research. Too often prompted by technical and scientific progress, we have ignored even marginalized the vital human element in health thinking and practice. Thus, for example, while family planning programs focused on providing a choice among safe and effective contraceptive methods, a supremely worthy goal, the central issue of sexuality and sexual behavior was generally neglected. Similarly, the enormous and important efforts to develop rapid and reliable diagnostic and treatment methods for sexually transmitted diseases helped divert attention away from the crucial issues of sexual practice. In short, we seem to have difficulty addressing the fundamental behaviors including sex drug taking and other intoxications and violence that are central to the major causes of preventable morbidity, disability, and premature mortality in the world today. Our collective reluctance to examine and understand ourselves is also expressed in the oft-repeated pipedream that scientific progress will take care of the HIV/AIDS pandemic by delivering a preventive vaccine, an effective cure, or both. Yet even a cursory glance at the relationship between scientific technical progress and health shows that meeting the scientific challenges is only one step toward effective application of the vaccine or drug. It is typical, not atypical, that hepatitis B vaccine is only now becoming relatively freely available to large populations in the developing world, more than a decade after the vaccine's licensure.

Progress in Preventing AIDS? David Ross Buchanan, George Peter Cernada, 2019-03-19. Originally published in the *International Quarterly of Community Health Education*, this work presents twenty-one chapters about the state of HIV/AIDS prevention programs in a global context.

Handbook of HIV Prevention John L. Peterson, Ralph J. DiClemente, 2000-02-29. The *Handbook of HIV Prevention* is intended to provide a comprehensive overview of the theories, methods, and approaches for reducing HIV-associated risk behaviors. It represents the first single source of information about HIV prevention research in developed and developing countries. The *Handbook* addresses the subject of HIV prevention from two interrelated perspectives. First, it presents the seminal theories currently used to guide the development and implementation of HIV prevention interventions. Second, it describes prevention approaches for diverse populations at risk of HIV infection. This *Handbook* provides a compilation of knowledge on HIV prevention by the leading authorities in the field and will be an important resource for students, researchers, and clinicians in the field.

Preventing HIV in Developing Countries Laura Gibney, Ralph J. DiClemente, Sten H. Vermund, 2006-04-11. Globally, action to prevent HIV spread is inadequate. Over 16,000 new infections occur every day. Yet we are not helpless in the face of disaster, as shown by the rich prevention experience analyzed in this valuable new compendium. Best practice exists: a set of tried and tested ways of slowing the spread of HIV, of persuading and enabling people to protect themselves and others from the virus. Individually,

features of best practice can be found almost everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some places is altogether out of control

Preventing HIV/AIDS in Adolescents United States. National Commission on Acquired Immune Deficiency Syndrome,1993 **Preventing HIV Infection Among Youth** ,1991 **Preventing HIV Transmission** Panel on Needle Exchange and Bleach Distribution Programs,Institute of Medicine,National Research Council and Institute of Medicine,1995-09-28 This volume addresses the interface of two major national problems the epidemic of HIV AIDS and the widespread use of illegal injection drugs Should communities have the option of giving drug users sterile needles or bleach for cleaning needs in order to reduce the spread of HIV Does needle distribution worsen the drug problem as opponents of such programs argue Do they reduce the spread of other serious diseases such as hepatitis Do they result in more used needles being carelessly discarded in the community The panel takes a critical look at the available data on needle exchange and bleach distribution programs reaches conclusions about their efficacy and offers concrete recommendations for public policy to reduce the spread of HIV AIDS The book includes current knowledge about the epidemiologies of HIV AIDS and injection drug use characteristics of needle exchange and bleach distribution programs and views on those programs from diverse community groups and a discussion of laws designed to control possession of needles their impact on needle sharing among injection drug users and their implications for needle exchange programs **Preventing HIV Among Young People in Southern and Eastern Africa** Kaymarlin Govender,Nana K Poku,2020-12-30 This book provides an overview of the current epidemiology of the HIV epidemic among young people in Eastern and Southern Africa ESA and examines the efforts to confront and reduce the high level of new HIV infections amongst young people Taking a multi dimensional approach to prevention the contributors discuss the many challenges facing these efforts in view of the slow progress in curbing the incidence of HIV amongst young people focusing particularly on the structural and social drivers of HIV Through an examination of these issues chapters in this book provide valuable insights on how to mitigate HIV risk among young people and what can be regarded as the catalysts to mounting credible policy and programmatic responses required to achieve epidemic control in the region The contributors draw on examples from a range of primary and secondary data sources to illustrate promising practices and challenges in HIV prevention demonstrating links between conceptual approaches to prevention and lessons learnt from implementation projects in the region Bringing together social scientists

and public health experts who are actively engaged in finding effective solutions the book discusses which interventions works why they work and the limitations and gaps in our knowledge to curb the pandemic amongst young people As such it is an important read for researchers focusing on HIV AIDS and public health The Open Access version of this book available at <https://www.taylorfrancis.com/books/e/10.4324/9780429462818> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Preventing HIV through safe voluntary medical male circumcision for adolescent boys and men in generalized HIV epidemics World Health Organization, 2020-08-31 Since 2007 the World Health Organization WHO and the Joint United Nations Programme on HIV AIDS UNAIDS have recommended voluntary medical male circumcision VMMC as an important strategy for the prevention of heterosexually acquired HIV in men in settings where the prevalence of heterosexually transmitted HIV is high Over 25 million men and adolescent boys in East and Southern Africa have been reached with VMMC services These new guidelines update earlier WHO recommendations to maximize the HIV prevention impact of safe VMMC services and aim to guide the transition to the sustained provision of interventions with a focus on the health and well being of both adolescent boys and men

Encyclopedia of Primary Prevention and Health Promotion Thomas P. Gullotta, Martin Bloom, 2003-01-31 Foundational topics such as history ethics and principles of primary prevention as well as specific issues such as consultation political issues and financing The second section addresses such topics as abuse depression eating disorders HIV AIDS injuries and religion and spirituality often dividing such topics into separate entries addressing childhood adolescence and adulthood

Handbook of Economic Evaluation of HIV Prevention Programs David R. Holtgrave, 1998-10-31 If resources for HIV prevention efforts were truly unlimited then this book would be entirely unnecessary In a world with limitless support for HIV prevention activities one would simply implement all effective or potentially effective programs without regard to expense We would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the United States and millions of lives worldwide Unfortunately funding for HIV prevention programs is limited Even though the amount of available funding may seem quite large especially in the United States it is still fixed and not sufficient to meet all needs for such programs This was very well illustrated in the summer of 1997 when over 500 community based organizations applied for a combined total of 18 million of HIV prevention funding from the U S Centers for Disease Control and Prevention CDC Less than one fifth of these organizations received support via this funding mechanism Hence although 18 million may seem like a large amount of money at first blush it is not enough to meet all of the prevention needs that could be addressed by these community based organizations

Interventions to Prevent HIV Risk Behaviors Peggie S. Tillman, 1996

The New Public Health and STD/HIV Prevention Sevgi O. Aral, Kevin A. Fenton, Judith A. Lipshutz, 2012-12-09 Despite effective approaches to prevention STD and HIV infection rates remain fairly constant Targeting implementation and monitoring of interventions have posed widespread problems and the recent spate of cuts to

prevention budgets has made these roadblocks even more challenging. It is clear that working in sexual health requires both a deeper understanding of STI/HIV epidemiology and an ongoing quest for up-to-date realistic prevention strategies. *The New Public Health and STD/HIV Prevention* offers readers leading edge access to both. Focusing on social determinants of sexual health at risk populations, critical factors in approaches to prevention and reviews of new research, this authoritative volume explores areas as varied as HPV prevention, technology based interventions, migration as a factor in disease transmission and competencies key to effective leadership in the field. Dispatches from the frontlines of theory, research and practice in the U.S. and abroad include: Personal risk, public impact, balancing individual rights and STD/HIV prevention; Distribution of prevention resources and its impact on sexual health; Prevention measures in diverse populations of women; Toward a better approach to preventive interventions with men who have sex with men; Adolescent sexual health and STIs; Reducing disparities in sexual health; Lessons from the campaign to eliminate infectious syphilis. Public health professionals of all backgrounds interested in or working in improving sexual health will find *The New Public Health and STD/HIV Prevention* an indispensable guide to conceptualizing the problems and clarifying possible solutions.

Evaluating HIV Prevention Interventions Joanne E. Mantell, Anthony T. DiVittis, Marilyn I. Auerbach, 2013-06-29 This user friendly comprehensive guide places evaluation in the context of HIV to give all health care professionals the necessary tools for developing and implementing successful HIV interventions. Every aspect of evaluation is discussed including the social and political context of evaluation, coding and inter-rater reliability procedures, barriers to evaluation and solution, the dissemination of results, the application of theory to HIV interventions. Case studies and examples from both the US and abroad to illustrate practical issues and numerous tables and figures complement the text.

Handbook of Health Promotion and Disease Prevention James M. Raczynski, Ralph J. DiClemente, 2013-11-11 The idea for this volume developed when we were co-teaching our introductory master's level course in the Department of Health Behavior at the UAB School of Public Health, a core course for all masters of public health students in the school regardless of the department in which they enrolled or the focus of their studies. Hence in the course we sought to provide both students in our department as well as those who might not ever again take a health behavior course with an overview that would both truly represent the field and substantially provide educational research and public health practice benefits. This was and continues to be a challenge with the diversity of students specializing in fields that include not only health behavior but also bio-statistics, environmental health sciences, epidemiology, health care organization and policy, international health and maternal and child health. The course that we taught attempted to provide the students with an overview of some of the important health promotion and disease prevention theories, methods and policy issues while reviewing applications of these theories and methods to promoting health and preventing disease through a variety of channels for a variety of disease outcomes and among a variety of populations. Since no one text provided this variety of readings we depended on readings and guest lectures.
