Structural, Syntactic, and Statistical Pattern Recognition Terry Caelli, Adnan Amin, Robert P.W. Duin, Mohamed Kamel, Dick de Ridder, 2003-08-02 This volume contains all papers presented at SSPR 2002 and SPR 2002 hosted by the University of Windsor Windsor Ontario Canada August 6 9 2002 This was the third time these two workshops were held back

to back SSPR was the ninth International Workshop on Structural and Syntactic Pattern Recognition and the SPR was the fourth International Workshop on Statistical Techniques in Pattern Recognition. These workshops have traditionally been held in conjunction with ICPR International Conference on Pattern Recognition and are the major events for technical committees TC2 and TC1 respectively of the International Association of Pattern Recognition IAPR. The workshops were held in parallel and closely coordinated. This was an attempt to resolve the dilemma of how to deal in the light of the progressive specialization of pattern recognition with the need for narrow focus workshops without further fragmenting the field and introducing yet another conference that would compete for the time and resources of potential participants. A total of 116 papers were received from many countries with the submission and reviewing processes being carried out separately for each workshop. A total of 45 papers were accepted for oral presentation and 35 for posters. In addition four invited speakers presented informative talks and overviews of their research. They were Tom Dietterich (Oregon State University USA), Sven Dickinson (the University of Toronto Canada), Edwin Hancock (University of York UK), Anil Jain (Michigan State University USA). SSPR 2002 and SPR 2002 were sponsored by the IAPR and the University of Windsor.

The Fitness of Information Chaomei Chen, 2014-07-30. Theories and practices to assess critical information in a complex adaptive system. Organized for readers to follow along easily. The Fitness of Information: Quantitative Assessments of Critical Evidence provides a structured outline of the key challenges in assessing crucial information in a complex adaptive system. Illustrating a variety of computational and explanatory challenges, the book demonstrates principles and practical implications of exploring and assessing the fitness of information in an extensible framework of adaptive landscapes. The book's first three chapters introduce fundamental principles and practical examples in connection to the nature of aesthetics, mental models, and the subjectivity of evidence. In particular, the underlying question is how these issues can be addressed quantitatively, not only computationally but also explanatorily. The next chapter illustrates how one can reduce the level of complexity in understanding the structure and dynamics of scientific knowledge through the design and use of the CiteSpace system for visualizing and analyzing emerging trends in scientific literature. The following two chapters explain the concepts of structural variation and the fitness of information in a framework that builds on the idea of fitness landscape originally introduced to study population evolution.

The final chapter presents a dual map overlay technique and demonstrates how it supports a variety of analytic tasks for a new type of portfolio analysis The Fitness of Information Quantitative Assessments of Critical Evidence also features In depth case studies and examples that characterize far reaching concepts illustrate underlying principles and demonstrate profound challenges and complexities at various levels of analytic reasoning Wide ranging topics that underline the common theme from the subjectivity of evidence in criminal trials to detecting early signs of critical transitions and mechanisms behind radical patents An extensible and unifying framework for visual analytics by transforming analytic reasoning tasks to the assessment of critical evidence The Fitness of Information Quantitative Assessments of Critical Evidence is a suitable reference for researchers analysts and practitioners who are interested in analyzing evidence and making decisions with incomplete uncertain and even conflicting information The book is also an excellent textbook for upper undergraduate and graduate level courses on visual analytics information visualization and business analytics and decision support systems
