Paynter, 1995 *Ecology and Conservation of Tropical Ungulates in Latin America* Sonia Gallina-Tessaro, 2019-11-20 This book brings together the latest information on tropical ungulates in different Latin American countries. These animals are not only important from the point of view of their role in different ecosystems but also have cultural value for people. The book also discusses topics such as habitat transformation and hunting as these species are an important source of food in many places. Addressing ungulate natural communities in diverse ecosystems and countries, the book provides information on specific aspects of each of the most representative species and highlights topics to help readers better understand these species and develop effective management and conservation strategies. The information presented also reveals the need for more knowledge and will hopefully provide the incentive for continued studies on this important group of animals. This publication serves as a reference for academic research on ungulate ecology, behavior, and dynamics as well as the basis for conservation strategies. *Natural Areas Journal*, 2009 **Temas de la Biodiversidad Del Litoral Fluvial Argentino** Florencio Gilberto Aceñolaza, 2004 *The Atlantic Forest of South America* Carlos Galindo Leal, Ibsen de Gusmão Câmara, 2003 This is a detailed assessment of the state of biodiversity in the Atlantic Forest. Increases in the reach of field research and the variety of field survey methods, the introduction of bioinformatics, and the explosion of molecular-based genetic methodologies have all contributed to the revision of many phylogenetic relationships and to a doubling of the recognized diversity of South American rodents. The largest and most diverse mammalian order on Earth and an increasingly threatened one, Rodentia, is also of great ecological importance. *Rodents* is both a timely and exhaustive reference on these ubiquitous creatures. From spiny mice and guinea pigs to the oversized capybara, this book covers all native rodents of South
