Lost In Familiar Places Creating New Connections Between The Individual Society:

Lost in Familiar Places Edward R. Shapiro, A. Wesley Carr, 1993-07-01 We live in a world of accelerating change marked by the decline of traditional forms of family community and professional life Both within families and in work places individuals feel increasingly lost unsure of the roles required of them In this book a psychoanalyst and an Anglican priest using a combination of psychoanalysis and social systems theory offer tools that allow people to create meaningful connections with one another and with the institutions within which they work and live The authors begin by discussing how life in a family prefigures and prepares the individual to participate in groups offering detailed case studies of families in therapy as illustrations They then turn to organizations describing how their consultations with an academic conference a mental hospital a law firm and a church parish helped members of these institutions to relate to one another by becoming aware of wider contexts for their experiences All the people within a group have their own subjectively felt perceptions of the environment According to Shapiro and Carr when individuals can negotiate a shared interpretation of the experience and of the purposes for which the group exists they can further their own development and that of their organizations The authors suggest how this can be accomplished They conclude with some broad speculations about the continuing importance of institutions for connecting the individual and society

Finding a Place to Stand Edward R Shapiro, 2020-04-29 What stands between us and authoritarianism seems increasingly fragile Democratic practices are under attack by foreign intrusion into elections voter suppression restricts citizen participation Nations are turning to autocratic leaders in the face of rapid social change Democratic values and open society can only be preserved if citizens can discover and claim their voices We access society through our organisations yet the collective voices and irrationalities of these organisations do not currently offer clear pathways for individuals to locate themselves How can we move through the mounting chaos of our social systems through our multiple roles in groups and institutions to find a voice that matters What kind of perspective will allow institutional leaders to facilitate the discovery of active citizenship and support engagement This book draws on psychodynamic systems thinking to offer a new understanding of the journey from being an individual to joining society as a citizen With detailed stories the steps and the conscious and unconscious linkages from being a family member to entering outside groups to taking up and making sense of institutional roles illuminate the process of claiming the citizen role With the help of leaders who recognise and utilise the dynamics of social systems there may be hope for us as citizens to use our institutional experiences to discover a place to stand

The Capacity for Ethical Conduct David Levine, 2013-03-05 What is the root cause of ethical failure Why is preoccupation with ethics more a part of the problem than a part of the solution What makes ethical conduct a natural expression of who we are What enables us to be ourselves in our relations with others Ethical failure has become a significant concern in public life in organizations and in educational institutions The Capacity for Ethical Conduct explores how qualities of character and personality either make ethical conduct possible for the individual or

foster ethical failure David Levine discusses how ethical conduct is a special way of relating to others one that secures respect for their integrity by assuring that what they do can express who they are He argues that this special way of relating to others results not from knowledge of or a stated commitment to rules norms and values but from the way we experience ourselves especially from our ability to make a positive emotional investment in being and having a self Traditionally emphasis on the importance of values and ethics in shaping conduct tends to be connected to the need to find fault in self and others fostering an atmosphere where the self is put at risk in its relations to others This means that an excessive emphasis on ethics rather than assuring ethical conduct tends instead to create interpersonal settings marked by emotional assault Because of this talk about ethics often expresses ambivalence about ethical conduct which makes the familiar combination of preoccupation with ethics and ethical failure unsurprising The Capacity for Ethical Conduct explores the ways in which the interpersonal world of work either fosters a feeling of safety or encourages various forms of emotional assault Presenting case studies and applying psychoanalytic object relation theory and self psychology this book explores the factors underlying ethical failure and the capacity for ethical conduct It will be of interest to scholars and practitioners in the fields of psychoanalysis psychology philosophy sociology organizational dynamics management and public administration *I Love a Cop, Third Edition* Ellen Kirschman, 2018-05-03 Police officers today face unprecedented challenges anti police sentiment increased danger massive public scrutiny and the ever present threat of terrorism Now thoroughly updated this trusted resource has already helped over 125 000 police families manage the stress of the job and create a supportive home environment where everyone can thrive The third edition includes new stories from police families new chapters on relationships and living through troubled times and fully updated resources Discussions of trauma and resilience domestic abuse and addictions have been expanded with the latest information and practical advice Whether they read the book cover to cover or refer to it when problems arise families will find no nonsense guidance they can depend on Mental health professionals see also *Counseling Cops What Clinicians Need to Know* by Ellen Kirschman Mark Kamena and Joel Fay

The Parables of Jesus Richard Q. Ford, In this startling new way to read the parables Ford unlocks seven of the longer parables attributed to Jesus He focuses on the two major characters in each parable who are separated by social inequality and he entirely bypasses the common approach that assumes that the superior character represents God and the subordinate character the Christian believer Drawing on his own therapeutic training Ford offers unique insight into the psychodynamics at work in the parables He proposes that the two characters are equally balanced in their multiple misperceptions of each other and shows how Jesus stories invite listeners to advert to issues of conflict and power and to struggle toward reconciliation
