Encyclopedia of Dubious Archaeology Kenneth L. Feder,2010-10-11 This book provides a fascinating encyclopedic antidote for the mysticism and pseudoscience surrounding well known or highly publicized archaeological and anthropological discoveries Archaeology attempts to answer the question where do we come from in the broadest sense possible as a result it is a highly interesting topic for all mankind When did human beings first walk the earth How did civilization develop What compelled our human ancestors to build things like the pyramids the Great Sphinx or Monk s Mound This book presents the widely unknown scientific facts behind the most popular and enthralling mysteries of our world from an expert archaeological perspective and lays out the information and research in a manner that is approachable engaging and entertaining for any reader Encyclopedia of Dubious Archaeology From Atlantis to the Walam Olum contains detailed and highly descriptive definitions for and explanations of terms related to extraordinary claims about human antiquity and its study Some of the terms in this extensive list of topics relate to archaeological hoaxes Many of the entries relate to dubious interpretations of the human past some of the terms relate to far fetched arguments that actually have produced evidence in support of their veracity **Shadowing the White Man's Burden** Gretchen Murphy,2010-05-01 During the height of 19th century imperialism Rudyard Kipling published his famous poem The White Man s Burden While some of his American readers argued that the poem served as justification for imperialist practices others saw Kipling s satirical talents at work and read it as condemnation Gretchen Murphy explores this tension embedded in the notion of the white man s burden to create a new historical frame for understanding race and literature in America Shadowing the White Man s Burden maintains that literature symptomized and channeled anxiety about the racial components of the U S world mission while also providing a potentially powerful medium for multiethnic authors interested in redrawing global color lines Through a range of archival materials from literary reviews to diplomatic records to ethnological treatises Murphy identifies a common theme in the writings of African Asian and Native American authors who exploited anxiety about race and national identity through narratives about a multiracial U S empire Shadowing the White Man s Burden situates American literature in the context of broader race relations and provides a compelling analysis of the way in which literature came to define and

shape racial attitudes for the next century **The Sea-Craft of Prehistory** Paul Johnstone,2013-11-12 The nautical dimension of prehistory has not so far received the attention it deserves It is also too often assumed that early man was land bound yet this is demonstrably not the case Recent research has shown that man travelled and tracked over greater distances and at a much earlier date than has previously been thought possible Some of these facts can be explained only by man s mastery of water transport from earliest times This book by an acknowledged expert on prehistoric sea craft examines these problems looking at the new archaeological information in the light of the author s nautical knowledge The result is a detailed account of man s use of inland and ocean going craft from earliest times until the dawn of recorded history All forms of evidence are critically assessed from the vessels of Ancient Egypt to the Chinese junk to present of comprehensive picture of the vessels men have built through the ages and of the variety of ways in which they have been used *An Introduction to Native North America* Mark Q.
