Mathematical Modelling with Chernobyl Registry Data Wolfgang Morgenstern, Victor K. Ivanov, Anatoli I. Michalski, Anatoli F. Tsyb, Gotthard Schettler, 2012-12-06 In 1993 three institutes belonging respectively to the Heidelberg Academy for Humanities and Sciences to the Russian Academy of Sciences and to the Russian Academy of Medical Sciences launched a cooperative research project The main aim of the project is to develop mathematical methodologies needed for better information support in health policy decision making in the area of primary health care provision for the Russian populations affected by radiation due to the Chernobyl accident At present the major data basis of the project is the Russian National medical and Dosimetric Chernobyl Registry administered at the Medical Radiological Research Centre Obninsk The book describes the general mathematical approaches to the project and the given conditions of the registry

Nonparametric Analysis of Univariate Heavy-Tailed Data Natalia Markovich, 2008-03-11 Heavy tailed distributions are typical for phenomena in complex multi component systems such as biometry economics ecological systems sociology web access statistics internet traffic biblio metrics finance and business The analysis of such distributions requires special methods of estimation due to their specific features These are not only the slow decay to zero of the tail but also the violation of Cramer s condition possible non existence of some moments and sparse observations in the tail of the distribution The book focuses on the methods of statistical analysis of heavy tailed independent identically distributed random variables by empirical samples of moderate sizes It provides a detailed survey of classical results and recent developments in the theory of nonparametric estimation of the probability density function the tail index the hazard rate and the renewal function Both asymptotical results for example convergence rates of the estimates and results for the samples of moderate sizes supported by Monte Carlo investigation are considered The text is illustrated by the application of the considered methodologies to real data of web traffic measurements
