Writing Mathematical Papers in English Jerzy Trzeciak, 1995 *The Collected Mathematical Papers* Arthur Cayley (mathématicien), 1897 *Mathematical Papers* George Green, 2013-04-09 An almost entirely self taught mathematical genius George Green 1793 1841 is best known for Green's theorem which is used in almost all computer codes that solve partial differential equations He also published influential essays or papers in the fields of hydrodynamics electricity and magnetism This collection comprises his most significant works The first paper An Essay on the Application of Mathematical Analysis to the Theories of Electricity and Magnetism which is also the longest and perhaps the most Important appeared In 1828 It introduced the term potential as designating the result obtained by adding together the masses of all the particles of a system each divided by its distance from a given point Its three part treatment first considers the properties of this function and then applies them in the second and third parts to the theories of magnetism and electricity The following paper Mathematical Investigations concerning the Laws of the Equilibrium of Fluids analogous to the Electric Fluid exhibits great analytical power as does the next On the Determination of the Exterior and Interior Attractions of Ellipsoids of Variable Densities Other highlights include the brief but absorbing paper On the Motion of Waves in a variable canal of small depth and width and two of his most valuable memoirs On the Laws of Reflexion and Refraction of Sound and On the Reflexion and Refraction of Light at the common surface of two non crystallized Media which should be studied together Mathematical Papers William Kingdon Clifford, 1882 Collected Mathematical Papers A. Ostrowski, 1984-01-01 This publication was made possible through a bequest from my beloved late wife United together in this present collection are those works by the author which have not previously appeared in book form The following are excepted Vorlesungen über Differential und Integralrechnung Lectures on Differential and Integral Calculus Vols 1 3 Birkhäuser Verlag Basel 1965 1968 Aufgabensammlung zur Infinitesimalrechnung Exercises in Infinitesimal Calculus Vols 1 2a 2b and 3 Birkhäuser Verlag Basel 1967 1977 two issues from Memorial des Sciences on Conformal Mapping written together with C Gattegno Gauthier Villars Paris 1949 Solution of Equations in Euclidean and Banach Spaces Academic Press New York 1973 and Studien über den Schottkyschen Satz Studies on Schottky's Theorem Wepf Co Basel 1931 Where corrections have had to be implemented in the text of certain papers references to these are made at the conclusion of each paper In the few instances where this system does not for technical reasons seem appropriate an asterisk in the page margin indicates wherever a correction is necessary and is then given at the end of the paper There is one exception the corrections to the paper on page 561 are presented on page 722 The works are published in 6 volumes and are arranged under 16 topic headings Within each heading the papers are ordered chronologically according to the date of original publication *The Collected Mathematical Papers of James Joseph Sylvester ...* James Joseph Sylvester, 1912 **The Collected Mathematical Papers of Arthur Cayley** Arthur Cayley, 1898 **The Collected Mathematical Papers of Henry John Stephen Smith** Henry John Stephen

statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free [Business Mathematics - 2Nd Edn](#) Ajay Singh,2009-11-01 The Book Has Been Designed For The Students Of Commerce And Economics It Covers A Vast Selection Of Topics Including Sets Logic Number System Algebra Both Classical And Modern Geometry Trigonometry Matrices Determinants Linear Programming Vectors Calculus Both Differential And Integral Along With Applications To Commerce And Economics It Is A Self Contained Book That Requires Only School Level Knowledge Of Mathematics [Subject Index of Modern Books Acquired](#) British Library,1903 [Mathematics and Its History](#) John Stillwell,2013-06-29 One of the disappointments experienced by most mathematics students is that they never get a course in mathematics They get courses in calculus algebra topology and so on but the division of labor in teaching seems to prevent these different topics from being combined into a whole In fact some of the most important and natural questions are stifled because they fall on the wrong side of topic boundary lines Algebraists do not discuss the fundamental theorem of algebra because that s analysis and analysts do not discuss Riemann surfaces because that s topology for example Thus if students are to feel they really know mathematics by the time they graduate there is a need to unify the subject This book aims to give a unified view of undergraduate mathematics by approaching the subject through its history Since readers should have had some mathematical experience certain basics are assumed and the mathematics is not developed as formally as in a standard text On the other hand the mathematics is pursued more thoroughly than in most general histories of mathematics as mathematics is our main goal and history only the means of approaching it Readers are assumed to know basic calculus algebra and geometry to understand the language of set theory and to have met some more advanced topics such as group theory topology and differential equations **A Mathematical and Philosophical Dictionary** Charles Hutton,1795 [Statutes and Ordinances of the University of Cambridge 2008](#) University of Cambridge,2008-09-25 This is the latest updated edition of the University of Cambridge s official statutes and Ordinances [Bulletin of the Calcutta Mathematical Society](#) Calcutta Mathematical Society,1913
