John D. Wilcock

Non-statistical applications of the computer in archaeology

This paper describes an overall computer-aided system for the use of archaeologists employing plain-language keywords to control information retrieval, graphics, and ancillary techniques such as routine reduction of instrument survey readings, objective classification of profiles, and statistical studies of the data.

The majority of papers at this conference have dealt with statistical applications in archaeology, where mathematical techniques are employed in the empirical study of archaeological data as phenomena with observable regularities. Inevitably, the computer has been pressed into the service of mathematicians and statisticians with an interest in archaeology. But it is a fact that the majority of present-day computer applications in business and industry are essentially non-statistical, and many are even non-numerical. It would therefore seem profitable to explore archaeology for non-statistical and non-numerical problems to which computer science may be applied. This seems likely to be an expanding field.

This paper describes applications of the computer in information retrieval, instrument surveys, graphics and the objective classification of artifacts by pattern recognition techniques.

INFORMATION RETRIEVAL

It is becoming very common in these days of the high-speed digital computer for large files of information to be stored on computer media for subsequent analysis. A file of data covering a well-defined topic is called a *data base*, which may then be used as input for an *Information Retrieval exercise*; information relevant to a particular query or set of queries is located and retrieved. The results are usually printed by computer and are then directly available for reference or reproduction by offset-litho printing.

Ideally, records should be made in plain language with as little contraction, stylization, or coding as possible. To have to refer to a code book every time a request is codified or results have to be interpreted is annoying and time-consuming. A request may be formulated from a set of plain-language descriptive terms (called *descriptors*) and it is usual to combine these descriptors by logical operators, for example, logical AND (\cdot), OR ($+$), NOT ($-$), ANY n OF ($n/(t+t+t, \text{ and so on})$), where n is an integer less than the number of terms t combined by logical operators OR ($+$).

In order to set up a system using information retrieval, cataloguing terms must be chosen and a thesaurus of words compiled so that the terms and the words embrace all facets of the information to be stored. The terms and the words may be expanded and amended once the system is in operation, but a determined attempt must be made to compile a comprehensive list of

Mathematics And Computers In Archaeology

Linda Ellis

Mathematics And Computers In Archaeology:

Mathematics and Computers in Archaeology J. E. Doran, F. R. Hodson, 1975 This book is for students and practitioners of archaeology. It offers an introductory survey of all the applications of mathematical and statistical techniques to their work. These applications are increasingly concerned with computerized data classification and quantification and their effect is to reduce the level of uncertainty in the interpretation of the evidence that time and chance have left. Any archaeologist wanting to find out what these new methods have to offer has hitherto been forced to search for information in the specialist handbooks, conference proceedings and review articles of his own and very often of other disciplines. This book brings the information conveniently together so far as it pertains to archaeology and permits an assessment of its relevance and quality. Those who have been daunted by the specialist knowledge apparently demanded will now be able to acquire a thorough grasp of principles and practices. Only an elementary knowledge of mathematics is presumed throughout. Part 1 provides a brief introduction to basic concepts in archaeology and mathematics. Part 2 relates the standard archaeological techniques and procedures to mathematics; it concentrates on numerical approaches best suited to archaeological practices. Part 3 examines various automatic seriation techniques and discusses further work that is coming to play an essential part in the development of archaeology.

Mathematics and Computers in Archeology J. E. Doran, 1975 **A Dictionary of Archaeology** Ian Shaw, Robert Jameson, 2008-04-15 This dictionary provides those studying or working in archaeology with a complete reference to the field.

Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications. It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research. Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials. Thus the reader will find entries on subject matter covering disciplinary theory, legislation affecting the work of archaeologists, pre-excavation surveying, excavation methodology, on-site conservation techniques, post-excavation analysis. The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources. Here the latest refinements in techniques such as radiometric dating, stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively. The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences. Cultural property legislation, regardless of its country of origin, has affected how archaeologists conduct their work. This encyclopedia covers all major U.S. legislation developed for the protection of cultural property, including the recent Native American Graves Protection and Repatriation Act, and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology. Without some sort of conservation program at the point of

excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology *The Oxford Handbook of Archaeological Ceramic Analysis* Alice M. W. Hunt, 2017 This volume draws together topics and methodologies essential for the socio cultural mineralogical and geochemical analysis of archaeological ceramic one of the most complex and ubiquitous archaeomaterials in the archaeological record It provides an invaluable resource for archaeologists anthropologists and archaeological materials scientists *Pottery in Archaeology* Clive Orton, Michael Hughes, 2013-05-13 This revised edition provides an up to date account of the many different kinds of information that can be obtained through the archaeological study of pottery It describes the scientific and quantitative techniques that are now available to the archaeologist and assesses their value for answering a range of archaeological questions It provides a manual for the basic handling and archiving of excavated pottery so that it can be used as a basis for further studies The whole is set in the historical context of the ways in which archaeologists have sought to gain evidence from pottery and continue to do so There are case studies of several approaches and techniques backed up by an extensive bibliography **Near Eastern Archaeology** Suzanne Richard, 2003-06-30 Filling a gap in classroom texts more than 60 essays by major scholars in the field have been gathered to create the most up to date and complete book available on Levantine and Near Eastern archaeology **Archeologia e Calcolatori, 30, 2019** Marco Arizza, Valeria Boi, Alessandra Caravale, Augusto Palombini, Alessandra Piergrossi, 2019-11-28 Il volume 30 di Archeologia e Calcolatori si apre con un inserto speciale dedicato al trentennale della rivista Alle introduzioni di F Djindjian e di P Moscati che delineano un quadro dell'informatica archeologica nel suo divenire seguono gli articoli dei membri del Comitato di Redazione a testimoniare l'attività di ricerca e di sperimentazione che ha caratterizzato il cammino editoriale della rivista e il contributo di una giovane laureata dell'Università Bocconi che ha lavorato a stretto contatto con il team di Archeologia e Calcolatori Nella parte centrale sono pubblicati gli articoli proposti annualmente dagli autori Ne emerge un quadro che rappresenta gli aspetti applicativi più qualificanti dell'informatica archeologica le banche dati i GIS le analisi statistiche i sistemi multimediali ma che guarda oggi con sempre maggiore interesse agli strumenti di visualizzazione scientifica e di comunicazione delle conoscenze Il volume si chiude con gli Atti del XII Workshop ArcheoFOSS Free Libre and Open Source Software e Open Format nei processi di ricerca archeologica un'iniziativa lodevole nata nel 2006 cui si dà più volte spazio nelle pagine della rivista **Advances in Archaeological Method and Theory** Michael B. Schiffer, 2014-05-19 Selections for Students from Volumes 1-4 **Discourse and Argumentation in Archaeology: Conceptual and Computational Approaches** Cesar Gonzalez-Perez, Patricia Martin-Rodilla, Martín Pereira-Fariña, 2023-11-03 This book

covers the topic of discourse and argumentation in archaeology with an aim to serve the archaeology community The book presents discourse and argument analysis approaches and techniques in an affordable manner and applied to archaeological situations It focuses on techniques and approaches that can be applicable to multiple situations periods and cultures The book begins with an introduction to discourse and argumentation analysis as a general field and also as an auxiliary technique to archaeology The work includes conceptual applications ranging from causality ontological connections vagueness social production of discourse and public debates The work also devotes a section to computational approaches and describes the specifics of some well known families of algorithms such as lexical processing information extraction or sentiment analysis The conclusion comments on the future and which reflects on the previous chapters and discusses how the presented techniques and approaches should be adapted or improved for easier and more powerful application to archaeology Contributing authors bring perspectives from archaeology linguistics and computer science

Archeologia e Calcolatori, 31.2, 2020 Giovanna Bagnasco Gianni, Susanna Bortolotto, Andrea Garzulino, Matilde Marzullo, Alessandra Caravale, Paola Moscati, 2020-10-22 Nel volume 31 2 sono pubblicati gli Atti di due Convegni internazionali Il primo Milano internazionale la fragilit territoriale dei contesti archeologici Milano 13 marzo 2019 promosso dal Dipartimento di Beni Culturali e Ambientali dell'Universit degli Studi di Milano e dal Dipartimento di Architettura e Studi Urbani del Politecnico di Milano a cura di G Bagnasco Gianni S Bortolotto A Garzulino e M Marzullo Il secondo Logic and computing The underlying basis of digital archaeology una sessione speciale dell'IMEKO TC 4 International Conference on Metrology for Archaeology and Cultural Heritage MetroArchaeo Firenze 4-6 dicembre 2019 a cura di A Caravale e P Moscati Gli Atti raccolgono rispettivamente 9 e 15 contributi introdotti dai curatori che illustrano scopi e risultati delle ricerche presentate in cui l'uso delle tecnologie informatiche determinante per l'analisi l'interpretazione e la diffusione e valorizzazione dei dati La prospettiva diacronica della sessione dedicata al calcolo e alla logica nella storia dell'informatica archeologica consente di collegare attraverso un ponte teorico metodologico le prime esperienze di informatizzazione dei dati archeologici con le tendenze pi recenti dell'archeologia digitale

PROCEEDINGS 4th International Congress on "Science and Technology for the Safeguard of Cultural Heritage in the Mediterranean Basin" VOL. I, **Studia Meroitica 1984** Sergio Donadoni, Steffen Wenig, 1989-12-31 No detailed description available for Studia Meroitica 1984

Mathematics And Computers In Archaeology Introduction

In the digital age, access to information has become easier than ever before. The ability to download Mathematics And Computers In Archaeology has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Mathematics And Computers In Archaeology has opened up a world of possibilities. Downloading Mathematics And Computers In Archaeology provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Mathematics And Computers In Archaeology has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Mathematics And Computers In Archaeology. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Mathematics And Computers In Archaeology. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Mathematics And Computers In Archaeology, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Mathematics And Computers In Archaeology has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Mathematics And Computers In Archaeology Books

1. Where can I buy Mathematics And Computers In Archaeology books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Mathematics And Computers In Archaeology book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Mathematics And Computers In Archaeology books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Mathematics And Computers In Archaeology audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Mathematics And Computers In Archaeology books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
