Fostering Children's Mathematical Power Arthur Baroody, Arthur J. Baroody, Jesse L.M. Wilkins, Ronald T. Coslick, 1998-09-01 Teachers have the responsibility of helping all of their students construct the disposition and knowledge needed to live successfully in a complex and rapidly changing world To meet the challenges of the 21st century students will especially need mathematical power a positive disposition toward mathematics curiosity and self confidence facility with the processes of mathematical inquiry problem solving reasoning and communicating and well connected mathematical knowledge an understanding of mathematical concepts procedures and formulas This guide seeks to help teachers achieve the capability to foster children s mathematical power the ability to excite them about mathematics help them see that it makes sense and enable them to harness its might for solving everyday and extraordinary problems The investigative approach attempts to foster mathematical power by making mathematics instruction process based understandable or relevant to the everyday life of students Past efforts to reform mathematics instruction have focused on only one or two of these aims whereas the investigative approach accomplishes all three By teaching content in a purposeful context an inquiry based fashion and a meaningful manner this approach promotes children s mathematical learning in an interesting thought provoking and comprehensible way This teaching guide is designed to help teachers appreciate the need for the investigative approach and to provide practical advice on how to make this approach happen in the classroom It not only dispenses information but also serves as a catalyst for exploring conjecturing about discussing and contemplating the teaching and learning of mathematics

Becoming the Math Teacher You Wish You'd Had Tracy Johnston Zager, 2023-10-10 Ask mathematicians to describe

mathematics and they'll use words like playful beautiful and creative. Pose the same question to students and many will use words like boring useless and even humiliating. *Becoming the Math Teacher You Wish You'd Had* author Tracy Zager helps teachers close this gap by making math class more like mathematics. Zager has spent years working with highly skilled math teachers in a diverse range of settings and grades and has compiled those ideas from these vibrant classrooms into this game-changing book. Inside you'll find *How to Teach Student-Centered Mathematics*. Zager outlines a problem-solving approach to mathematics for elementary and middle school educators looking for new ways to inspire student learning. *Big Ideas Practical Application*. This math book contains dozens of practical and accessible teaching techniques that focus on fundamental math concepts including strategies that simulate connection of big ideas, rich tasks that encourage students to wonder, generalize, hypothesize and persevere, and routines to teach students how to collaborate. *Becoming the Math Teacher You Wish You'd Had* offers fresh perspectives on common challenges from formative assessment to classroom management for elementary and middle school teachers. No matter what level of math class you teach, Zager will coach you along chapter by chapter. All teachers can move towards increasingly authentic and delightful mathematics teaching and learning. This important book helps develop instructional techniques that will make the math classes we teach so much better than the math classes we took.

Notes Canadian Mathematical Society, 1990. *The Science Teaching Efficacy Belief Instruments (STEBI A and B)* James Deehan, 2016-07-28. The purpose of this Springer Brief is to provide a comprehensive review of both the STEBI methods and findings through the use of a clearly defined analytic framework. A systematic review of literature yielded 107 STEBI A research items and 140 STEBI B research items. The STEBI instruments have been used in a wide range of qualitative, cross-sectional, longitudinal and experimental designs. Analysis of the findings of the papers reveals that in-service and pre-service programs that use innovative practices such as cooperative learning, inquiry-based investigation and nature of science instruction can produce positive growth in participants' science teaching efficacy beliefs. The personal science teaching efficacy beliefs of pre-service and in-service teachers showed greater mean scores and higher growth than their outcome expectancies. Implications are discussed.
