## **Mathematics For The Modern Mind:**

Mathematics for the Modern Mind Walter Robert Fuchs, 1967      The Making of the Modern Mind John Herman Randall, 1926      *The New Math* Christopher J. Phillips, 2014-12-04 An era of sweeping cultural change in America the postwar years saw the rise of beatniks and hippies the birth of feminism and the release of the first video game It was also the era of new math Introduced to US schools in the late 1950s and 1960s the new math was a curricular answer to Cold War fears of American intellectual inadequacy In the age of Sputnik and increasingly sophisticated technological systems and machines math class came to be viewed as a crucial component of the education of intelligent virtuous citizens who would be able to compete on a global scale In this history Christopher J Phillips examines the rise and fall of the new math as a marker of the period s political and social ferment Neither the new math curriculum designers nor its diverse legions of supporters concentrated on whether the new math would improve students calculation ability Rather they felt the new math would train children to think in the right way instilling in students a set of mental habits that might better prepare them to be citizens of modern society a world of complex challenges rapid technological change and unforeseeable futures While Phillips grounds his argument in shifting perceptions of intellectual discipline and the underlying nature of mathematical knowledge he also touches on long standing debates over the place and relevance of mathematics in liberal education And in so doing he explores the essence of what it means to be an intelligent American by the numbers      *Gaither's Dictionary of Scientific Quotations* Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics      **The Emperor's New Mind** Roger Penrose, 1999-03-04 Winner of the Wolf Prize for his contribution to our understanding of the universe Penrose takes on the question of whether artificial intelligence will ever approach the intricacy of the human mind 144 illustrations      Outlines of Social Psychology John Stuart Mackenzie, 1918      **Outlines of Social Philosophy** John Stuart Mackenzie, 1918
