Mathematics of the Decision Sciences George B. Dantzig, Arthur F. Veinott, 1968 **Large-Scale Computations in Fluid Mechanics** Stanley Osher, 1985-12-31 Linear Programming Saul I. Gass, 2003-01-01 Comprehensive well organized volume suitable for undergraduates covers theoretical computational and applied areas in linear programming Expanded updated edition useful both as a text and as a reference book 1995 edition The New Palgrave Dictionary of Economics, 2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product *Applications of Group Theory in Physics and Mathematical Physics* Moshé Flato, Paul Sally, Gregg Zuckerman, 1985-12-31 The past decade has seen a renewal in the close ties between mathematics and physics The Chicago Summer Seminar on Applications of Group Theory in Physics and Mathematical Physics held in July 1982 was organized to bring together a broad spectrum of scientists from theoretical physics mathematical physics and various branches of pure and applied mathematics in order to promote interaction and an exchange of ideas and results in areas of common interest This volume contains the papers submitted by speakers at the Seminar The reader will find several groups of articles varying from the most abstract aspects of mathematics to a concrete phenomenological description of some models applicable to particle physics The papers have been divided into four categories corresponding to the principal topics covered at the Seminar This is only a rough division and some papers overlap two or more of these categories Stochastic Economics Gerhard Tintner, Jati K. Sengupta, 2014-05-10 Stochastic Economics Stochastic Processes Control and Programming presents some aspects of economics from a stochastic or probabilistic point of view The application of stochastic processes to the theory of economic development stochastic control theory and various aspects of stochastic programming is discussed Comprised of four chapters this book begins with a short survey of the stochastic view in economics followed by a discussion on discrete and continuous stochastic models of economic development The next chapter focuses on methods of stochastic control and their application to dynamic economic models with emphasis on those aspects connected especially with the theory of quantitative economic policy Some basic operational problems of applying stochastic control particularly in economic systems and organizations for problems such as dynamic resource allocation growth planning and economic coordination are considered The last chapter is devoted to stochastic programming paying particular attention to the decision rule theory of operations research under the chance constrained model and a method of incorporating reliability measures into a systems reliability model This book will be of interest to economists statisticians applied mathematicians operations researchers and systems engineers *Collected Papers. More on Intuitionistic Neutrosophic Soft Sets Said Broumi, Florentin Smarandache, 2013-08-10 Intuitionistic Neutrosophic soft set theory proposed by S Broumi and F Smarandache has been regarded as an effective mathematical tool to deal with uncertainties In this paper new operations on intuitionistic neutrosophic soft sets have been introduced Some results relating to the properties of these operations have been established Moreover we illustrate their interconnections between each other

Neutrosophic Sets and Systems, vol. 53/2023 Florentin Smarandache, Mohamed Abdel-Basset, Said Broumi, 2023-01-15 Neutrosophic Sets and Systems has been created for publications on advanced studies in neutrosophy neutrosophic set neutrosophic logic neutrosophic probability neutrosophic statistics that started in 1995 and their applications in any field such as the neutrosophic structures developed in algebra geometry topology etc Neutrosophy is a new branch of philosophy that studies the origin nature and scope of neutralities as well as their interactions with different ideational spectra This theory considers every notion or idea together with its opposite or negation and with their spectrum of neutralities in between them i e notions or ideas supporting neither nor The and ideas together are referred to as Neutrosophy is a generalization of Hegel's dialectics the last one is based on and only According to this theory every idea tends to be neutralized and balanced by and ideas as a state of equilibrium In a classical way are disjoint two by two But since in many cases the borders between notions are vague imprecise Sorites it is possible that and of course have common parts two by two or even all three of them as well Neutrosophic Set and Neutrosophic Logic are generalizations of the fuzzy set and respectively fuzzy logic especially of intuitionistic fuzzy set and respectively intuitionistic fuzzy logic In neutrosophic logic a proposition has a degree of truth T a degree of indeterminacy I and a degree of falsity F where T, I, F are standard or non standard subsets of $[0, 1]$ Neutrosophic Probability is a generalization of the classical probability and imprecise probability Neutrosophic Statistics is a generalization of the classical statistics What distinguishes the neutrosophics from other fields is the which means neither nor which of course depends on can be indeterminacy neutrality tie game unknown contradiction ignorance imprecision etc
