Includes Practice Tutorial CD for use on screen or IWB *Modern Mathematics* Dirk De Bock,2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends

There Is No One Way to Teach Math Henri Picciotto,Robin Pemantle,2024-09-10 A collaboration between a seasoned math teacher and a research mathematician this resource offers balanced instructional ideas based on student intellectual engagement and skilled teacher leadership It is solidly grounded in many areas of classroom practice but rather than serving as a prescriptive how to manual the authors invite reflection and discussion across classrooms and math departments much in the way you would share ideas in the teachers lounge or across the table at a conference Chapters offer practical suggestions and concrete examples to teachers of grades 6 12 on just about every aspect of the job manipulatives technology lesson planning group work classroom discussion and more In opposition to the idea of a one size fits all curriculum the authors explain how to integrate teaching techniques formal and informal student centered and teacher led experiential and rigorous Chapters also include vignettes as well as many links to curricular materials Ideal for math educators of grades 6 12 this book is both comprehensive in its strategies and sensitive to the complexities of teaching For these reasons math departments coaches teacher leaders and faculty at other levels can also easily reference its content where relevant This book offers multiple entry points for teachers and departments to discuss and enhance their practice making it essential reading for any math educator or professional development opportunity
