Management Science Featuring Micro-Macro Economics and Management of Information Technology W.Y. Dornyo, 2020-10-09 This book is one of a series of various doctoral research project papers and has been further refined and converted into a book The book has been deemed one of further versions of management science that are to come These further versions focus more on information technology and its effects as agile tools for management including software engineering algorithms and data structures computer architecture and electronics systems science artificial intelligence and robotics quantum science statistics and web internet and multimedia design and building Managers are usually multifaceted with multiple disciplines even though they have one or two areas as majors specialties or experience It is in the light of this that Management Science Featuring Micro Macro Economics and Management of Information Technology was designed in this context to contain economics with IT as a course of study In the future further versions will be pure courses instead of combinations The world has changed gear for the better due to the advanced mysteries of information technology innovations so that we could even conduct scientific laboratory experiments medical diagnoses and rule of law adjudications online That means we could not forget information technology as one major tool in hand that should be a pivot on and around which all other areas in management should dwell and revolve and this was one of the sole reasons of this book It is therefore worthy of note for readers aspiring as systems analysts managers and professionals to accustom themselves to the subject areas in the book to instill understanding of numerous important terms and points in economics and IT This will help to build further courage and understanding toward advancement in these fields All topics indicated in the table of contents have been made reader friendly and treated to focus easy understanding We highly acknowledge all the intellectual materials used

Enabling Collaboration on Semiformal Mathematical Knowledge by

Semantic Web Integration C. Lange, 2011-10-14 Mathematics is becoming increasingly collaborative but software does not sufficiently support that Social Web applications do not currently make mathematical knowledge accessible to automated agents that have a deeper understanding of mathematical structures Such agents exist but focus on individual research tasks such as authoring publishing peer review or verification instead of complex collaboration workflows This work effectively enables their integration by bridging the document oriented perspective of mathematical authoring and publishing and the network perspective of threaded discussions and Web information retrieval This is achieved by giving existing representations of mathematical and relevant related knowledge about applications projects and people a common Semantic Web foundation Service integration is addressed from the two perspectives of enriching published documents by embedding assistive services and translating between different knowledge representations inside knowledge bases A usability evaluation of a semantic wiki that coherently integrates knowledge production and consumption services points out the remaining challenges in making such heterogeneously integrated environments support realistic workflows The results of this thesis will soon also enable collaborative acquisition of new mathematical knowledge as well as the contributions of existing knowledge collections of the Web of Data [Handbook for Online Learning Contexts: Digital, Mobile and Open](#) Ann Marcus-Quinn, Triona Hourigan, 2021-05-29 This book addresses the gap in the literature concerned with global case studies of successful Digital Mobile and Open Education The book shares experiences from international teaching and learning projects at all levels of Education and provides advice for future policy and investment in digital teaching and learning and Open Education projects It also provides an expectation on the future capacity and sustainability of Open Education
