Dyslexia in Practice Janet Townend, Martin Turner, 2012-12-06 Dyslexia is a specific learning difficulty that hinders the learning of literacy skills This problem with managing verbal codes in memory is neurologically based and tends to run in families Other symbolic systems such as mathematics and musical notation can also be affected Dyslexia can occur at any level of intellectual ability It can accompany but is not a result of lack of motivation emotional disturbance sensory impairment or meagre opportunities The effects of dyslexia can be alleviated by skilled specialist teaching and committed learning Moreover many dyslexic people have visual and spatial abilities which enable them to be successful in a wide range of careers The appearance of this book is to be welcomed It represents a full statement of the best practice to be found in the many kinds of intervention that are conducted with dyslexic students It addresses some fundamental questions that are seldom asked and much of what the skilled teacher knows and does is set down here in print for the first time From the Preface Collectively the chapters provide a synthesis of current practice focusing on how to assess and treat the symptoms of dyslexia guided by a proper understanding of the cognitive and linguistic weaknesses that underpin the condition The book makes clear that the backbone of intervention for dyslexia is a highly structured

multisensory approach that teaches reading and spelling skills at the appropriate rate. However, it is also explicit in pointing out that such a programme must be delivered with due attention to individual differences in the other cognitive skills that contribute to literacy development and take account of the learner's style, interests, and not least their confidence and self-esteem. This book provides an important resource for teachers who wish to become competent in the skills required for the assessment, teaching, supporting, and counselling of dyslexic people in a variety of settings. It promises to reach many teachers and in turn their students and families. Margaret J. Snowling, University of York, UK.
