Matlab For Macintosh Computers:

Accelerating MATLAB with GPU Computing Jung W. Suh, Youngmin Kim, 2013-11-18 Beyond simulation and algorithm development many developers increasingly use MATLAB even for product deployment in computationally heavy fields This often demands that MATLAB codes run faster by leveraging the distributed parallelism of Graphics Processing Units GPUs While MATLAB successfully provides high level functions as a simulation tool for rapid prototyping the underlying details and knowledge needed for utilizing GPUs make MATLAB users hesitate to step into it Accelerating MATLAB with GPUs offers a primer on bridging this gap Starting with the basics setting up MATLAB for CUDA in Windows Linux and Mac OS X and profiling it then guides users through advanced topics such as CUDA libraries The authors share their experience developing algorithms using MATLAB C and GPUs for huge datasets modifying MATLAB codes to better utilize the computational power of GPUs and integrating them into commercial software products Throughout the book they demonstrate many example codes that can be used as templates of C MEX and CUDA codes for readers projects Download example codes from the publisher s website <http://booksite.elsevier.com/9780124080805> Shows how to accelerate MATLAB codes through the GPU for parallel processing with minimal hardware knowledge Explains the related background on hardware architecture and programming for ease of use Provides simple worked examples of MATLAB and CUDA C codes as well as templates that can be reused in real world projects

Wavelets and Statistics Anestis Antoniadis, Georges Oppenheim, 2012-12-06 Despite its short history wavelet theory has found applications in a remarkable diversity of disciplines mathematics physics numerical analysis signal processing probability theory and statistics The abundance of intriguing and useful features enjoyed by wavelet and wavelet packed transforms has led to their application to a wide range of statistical and signal processing problems On November 16 18 1994 a conference on Wavelets and Statistics was held at Villard de Lans France organized by the Institute IMAG LMC Grenoble France The meeting was the 15th in the series of the Rencontres Franco Belges des 8statisticiens and was attended by 74 mathematicians from 12 different countries Following tradition both theoretical statistical results and practical contributions of this active field of statistical research were presented The editors and the local organizers hope that this volume reflects the broad spectrum of the conference as it includes 21 articles

contributed by specialists in various areas in this field The material compiled is fairly wide in scope and ranges from the development of new tools for non parametric curve estimation to applied problems such as detection of transients in signal processing and image segmentation The articles are arranged in alphabetical order by author rather than subject matter However to help the reader a subjective classification of the articles is provided at the end of the book Several articles of this volume are directly or indirectly concerned with several aspects of wavelet based function estimation and signal denoising
