Patrons And Adversaries:

Patrons and Adversaries Caroline Castiglione, 2005 Four generations of the aristocratic Barberini family and its vassals clashed over how the early modern Roman countryside should be governed Villagers sometimes cultivated noble interference but they frequently resisted it through the strategies of adversarial literacy political ways of reading and writing that challenged noble hegemony in the village

The Trauma of Monastic Reform Alison I. Beach, 2017-11-02 This book opens a window on the lived experience of monastic reform in the twelfth century Drawing on a variety of textual and material sources from the south German monastery of Petershausen it begins with the local process of reform and moves out into intertwined regional social political and ecclesiastical landscapes Beach reveals how the shock of reform initiated decades of anxiety at Petershausen and raised doubts about the community's communal identity its shifting internal contours and boundaries and its place within the broader spiritual and social landscapes of Constance and Swabia The Trauma of Monastic Reform goes beyond reading monastic narratives of reform as retrospective expressions of support for the deeds and ideals of a past generation of reformers to explore the real human impact that the process could have both on the individuals who comprised the target community and on those who lived for generations in its aftermath

Empowering Interactions Wim Blockmans, Daniel Schläppi, 2017-03-02 The emergence of the state in Europe is a topic that has engaged historians since the establishment of the discipline of history Yet the primary focus of has nearly always been to take a top down approach whereby the formation and consolidation of public institutions is viewed as the outcome of activities by princes and other social elites Yet as the essays in this collection show such an approach does not provide a complete picture By investigating the importance of local and individual initiatives that contributed to state building from the late middle ages through to the nineteenth century this volume shows how popular pressure could influence those in power to develop new institutional structures By not privileging the role of warfare and of elite coercion for state building it is possible to question the traditional top down model and explore the degree to which central agencies might have been more important for state representation than for state practice The studies included in this collection treat many parts of Europe and deal with different phases in the period between the late middle ages and the nineteenth century Beginning with a critical review of state historiography the introduction then sets out the concept of empowering interactions which is then explored in the subsequent case studies and a number of historiographical methodological and theoretical essays Taken as a whole this collection provides a fascinating platform to reconsider the relationships between top down and bottom up processes in the history of the European state

[Wars of Revelation](#) Rebecca Lissner, 2021-10-26 As American foreign policy experts anticipate a new Cold War with China there is no better time to reflect on the evolution of the United States grand strategy during its decades long contest with Russia Lissner shows that military interventions in Korea Vietnam and Iraq were crucibles for American foreign policy in the latter half of the 20th

century testing strategic axioms on the battlefield and compelling adjustments to Washington's conception of its global role. In each case these wars of revelation provided searing insights into the capabilities and intentions of America's most dangerous international adversaries as well as the potential and limits of its own national power. By centering her narrative of post World War II American foreign relations on these pivotal episodes Lissner provides an historically rich and theoretically compelling narrative that will interest readers keen to understand the past present and future of US grand strategy.

The Burden-Sharing Dilemma Brian D. Blankenship, 2023-11-15 *The Burden Sharing Dilemma* examines the conditions under which the United States is willing and able to pressure its allies to assume more responsibility for their own defense. The United States has a mixed track record of encouraging allied burden sharing while it has succeeded or failed in some cases it has declined to do so at all in others. This variation Brian D Blankenship argues is because the United States tailors its burden sharing pressure in accordance with two competing priorities conserving its own resources and preserving influence in its alliances. Although burden sharing enables great power patrons like the United States to lower alliance costs it also empowers allies to resist patron influence. Blankenship identifies three factors that determine the severity of this burden sharing dilemma and how it is managed: the latent military power of allies, the shared external threat environment and the level of a patron's resource constraints. Through case studies of US alliances formed during the Cold War he shows that a patron can mitigate the dilemma by combining assurances of protection with threats of abandonment and by exercising discretion in its burden sharing pressure. Blankenship's findings dismantle assumptions that burden sharing is always desirable but difficult to obtain. Patrons as the book reveals can in fact be reluctant to seek burden sharing and attempts to pass defense costs to allies can often be successful. At a time when skepticism of alliance benefits remains high and global power shifts threaten longstanding pacts *The Burden Sharing Dilemma* recalls and reconceives the value of burden sharing and alliances.

Ministering in Patronage Cultures Jayson Georges, 2019-11-12 Patronage is a central part of global cultures and the biblical story of God's mission yet many Westerners misunderstand or ignore this concept. In this resource for ministry practitioners and lay Christians alike Jayson Georges brings his crosscultural experience and biblical insights to bear on the topic of patronage with sections on cultural issues, biblical models, theological concepts and missional implications.

Patronage and Poetry in the Islamic World Jocelyn Sharlet, 2011-06-13 Panegyric poetry in both Arabic and Persian was one of the most important genres of literature in the medieval Middle East and Central Asia. Jocelyn Sharlet argues that panegyric poetry is important not only because it provides a commentary on society and culture in the medieval Middle East but also because panegyric writing was one of the key means for individuals to gain social mobility and standing during this period. This is particularly so within the context of patronage, a central feature of social order during these times. Sharlet places the medieval Arabic and Persian panegyric firmly within its cultural context and identifies it as a crucial way of gaining entry to and movement within this patronage network. This is an important contribution to the fields of pre-modern

Middle Eastern and Central Asian literature and culture *Emerging Technologies and International Stability* Todd S. Sechser, Neil Narang, Caitlin Talmadge, 2021-11-28 Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the Journal of Strategic Studies Protecting Patron Privacy Bobbi Newman, Bonnie Tijerina, 2017-05-19 Although privacy is one of the core tenets of librarianship technology changes have made it increasingly difficult for libraries to ensure the privacy of their patrons in the 21st century library This authoritative LITA Guide offers readers guidance on a wide range of topics including Foundations of privacy in libraries Data collection retention use and protection Laws and regulations Privacy instruction for patrons and staff Contracts with third parties Use of in house and internet tools including social network sites surveillance video and RFID
