ranging and richly illustrated book the authors begin by tracing the ways ornament has been used over the last five centuries the rules of decorum and etiquette associated with it and the social moral and spiritual values it has represented They examine how architecture set the agenda for ornament in the Renaissance and how printed images carried a common vocabulary of ornament throughout the Western world They survey the personal side of ornament both in dress and in the domestic interior a private expression of the self and a public statement of social and cultural status They look at ornament in the public domain from the lavish decoration and symbolism of a town pageant to the logos of today s corporate industry and show how the ever evolving role of ornament is to invent and embody the collective spirit of communities at work and at leisure They conclude by discussing how the Western tradition of ornament has responded to and absorbed exotic African and Asian motifs Moresque motifs of the Near East and such familiar designs as the Paisley and Willow patterns

Art as a Social System Niklas Luhmann, 2000 This is the definitive analysis of art as a social and perceptual system by Germany s leading social theorist of the late 20th century It combines three decades of research in the social sciences phenomenology evolutionary biology cybernetics and information theory with an intimate knowledge of art history literature aesthetics and contemporary literary theory

The Microscope in the Dutch Republic Edward G. Ruestow, 1996 Focusing on the two seventeenth century pioneers of microscopic discovery the Dutchmen Jan Swammerdam and Antoni van Leewenhoek Ruestow demonstrates that their uneasiness with their social circumstances spurred their discoveries Though arguing that aspects of Dutch culture impeded serious research with the microscope Ruestow also shows however that the culture of the period shaped how Swammerdam and Leewenhoek responded to what they saw through the lens He concludes by emphasising how their early microscopic efforts differed from the institutionalised microscopic research that began in the nineteenth century
