Pattern Of Animal Communities:

The Pattern of Animal Communities C. S. Elton, 2012-12-06 THE ECOLOGICAL SURVEY on which this book is based began to be planned in 1942 and since 1945 has been mainly centred upon Oxford University's estate at Wytham Woods where a rich series of habitats from open ground and limestone to woodland with many springs and marshes interspersed occupies a hill set in riverine surroundings Here biological research workers from the University have accumulated a considerable body of knowledge some of which I have arranged in a general setting that allows one to comprehend some of the inter related parts of the whole system It is also intended to provide a framework for understanding animal communities elsewhere The ecological inquirer is more than most scientific people apt to find himself lost in a large labyrinth of interrelations and variables The dictionary defines a labyrinth as an intricate structure of inter communicating passages through which it is difficult to find one's way without a clue This could equally be a figurative description of plant and animal communities The present book seeks to provide a plan of construction of the labyrinth and a few new clues that may help the inquirer to know where he is on the general ecological map In presenting this blue print of animal communities I have avoided giving long lists of species such as the botanist with his smaller kingdom can handle fairly well The Pattern of

Animal Communities Charles Sutherland Elton, D. A. Kempson, 1966 *The Pattern of Animal Communities* C. S. Elton, 1979-05-31 **The Pattern of animal communities, etc. [With plates and maps.]** Charles Sutherland Elton, 1966
