Patterns Of Human Variation The Demography Genetics And Phenetics Of Bougainville Islanders:

Patterns of Human Variation Jonathan Scott Friedlaender, 1975 **Genes, Language, & Culture History in the Southwest Pacific** Jonathan S. Friedlaender, 2007-04-19 The broad arc of islands north of Australia that extends from Indonesia east towards the central Pacific is home to a set of human populations whose concentration of diversity is unequalled elsewhere Approximately 20% of the world's languages are spoken here and the biological and genetic heterogeneity among the groups is extraordinary Anthropologist W W Howells once declared diversity in the region so Protean as to defy analysis However this book can now claim considerable success in describing and understanding the origins of the genetic and linguistic variation there In order to cut through this biological knot the authors have applied a comprehensive battery of genetic analyses to an intensively sampled set of populations and have subjected these and complementary linguistic data to a variety of phylogenetic analyses This has revealed a number of heretofore unknown ancient Pleistocene genetic variants that are only found in these island populations and has also identified the genetic footprints of more recent migrants from Southeast Asia who were the ancestors of the Polynesians The book lays out the very complex structure of the variation within and among the islands in this relatively small region and a number of explanatory models are tested to see which best account for the observed pattern of genetic variation here The results suggest that a number of commonly used models of evolutionary divergence are overly simple in their assumptions and that often human diversity has accumulated in very complex ways **A Companion to Biological Anthropology** Clark Spencer Larsen, 2023-03-10 A Companion to Biological Anthropology The discipline of biological anthropology the study of the variation and evolution of human beings and their evolutionary relationships with past and living hominin and primate relatives has undergone enormous growth in recent years Advances in DNA research behavioral anthropology nutrition science and other fields are transforming our understanding of what makes us human A Companion to Biological Anthropology provides a timely and comprehensive account of the foundational concepts historical development current trends and future directions of the discipline Authoritative yet accessible this field defining reference work brings together 37 chapters by established and younger scholars on the biological and evolutionary components of the study of human development The authors discuss all facets of contemporary biological anthropology including systematics and taxonomy population and molecular genetics human biology and functional adaptation early primate evolution paleoanthropology paleopathology bioarchaeology forensic anthropology and paleogenetics Updated and expanded throughout this second edition explores new topics revisits key issues and examines recent innovations and discoveries in biological anthropology such as race and human variation epidemiology and catastrophic disease outbreaks global inequalities migration and health resource access and population growth recent primate behavior research the fossil record of primates and humans and much more A Companion to Biological Anthropology Second Edition is an indispensable guide for researchers and advanced

Current Developments in Anthropological Genetics Michael Crawford, 2012-12-06 While the previous two volumes in this series were based upon methodology theory and the relationship between ecology and population structure this book can be viewed as an in depth case study The population genetics of a multitude of diverse groups geographically distributed throughout the world was examined in the first two volumes In contrast this volume focuses upon a single ethnic group the Black Caribs Garifuna of Central America and St Vincent Island and explores the interrelationships among the ethnohistory sociocultural characteristics demography morphology and genetic structure of the group This volume offers a broad and intensive treatment of the Black Caribs and their interactions with surrounding populations My interest in the genetics of the Black Caribs was sparked by an accidental meeting in Amsterdam Holland in March 1975 A conversation with Nancie Gonzalez at the Applied Anthropology Meetings revealed the truth is stranger than fiction history of the Black Carib peoples of the Caribbean This was a population with a small sized founding group and a unique biological success story Nancie Gonzalez was particularly interested in estimating the Carib Indian admixture in the contemporary Garifuna population Given my previous experience in estimating Spanish and African admixture in the Tlaxcaltecan population whose gene pool consisted predominantly of Indian alleles a group that appeared to be primarily African with some Indian admixture was of great interest Aside from the ethnohistorical interest I believe that such a population may add considerably to our understanding of the inheritance of complex morphological traits

Bougainville before the conflict Anthony J Regan, Helga M Griffin, 2015-08-03 One of the most beautiful island groups of the Pacific Bougainville has a remarkable history Tragically it is as the site of devastating civil conflict that Bougainville is perhaps best known In exploring the rich environmental cultural and social heritage of Bougainville before the conflict this collection provides an insight into the long term causes of the crisis In doing so it surveys such topics as Bougainville's prehistory and traditional cultures the impact of German and Australian colonialism the attempts by disparate local cultures to find a common identity the assertion of political autonomy in the face of coercion to integrate with Papua New Guinea and contemporary efforts to resolve conflict and plan a viable future A landmark collaboration between expert commentators on Bougainville and Bougainvilleans themselves this volume provides a comprehensive picture for those seeking to understand Bougainville's history and future directions Bougainville before the conflict was published in association with the State Society and Governance in Melanesia Project which is supported by The Australian National University and the Commonwealth of Australia

Human Biologists in the Archives D. Ann Herring, Alan C. Swedlund, 2002-12-05 Many physical anthropologists study populations using data that come primarily from the historical record For this volume's authors the classic anthropological field is not the glamour of an exotic locale but the sometimes tedium of the dusty back rooms of libraries archives and museum collections This book tells

of the way in which archival data inform anthropological questions about human biology and health The authors present a diverse array of human biological evidence from a variety of sources including the archaeological record medical collections church records contemporary health and growth data and genetic information from the descendants of historical populations The papers demonstrate how the analysis of historical documents expands the horizons of research in human biology extends the longitudinal analysis of microevolutionary and social processes into the present and enhances our understanding of the human condition *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70

Biogeography and Ecology of New Guinea J.L. Gressitt,2012-12-06 J L Gressitt New Guinea is a fantastic island unique and fascinating It is an area of incredible variety of geomorphology biota peoples languages history traditions and cultures Diversity is its prime characteristic whatever the subject of interest To a biogeographer it is tantalizing as well as confusing or frustrating when trying to determine the history of its biota To an ecologist and to all biologists it is a happy hunting ground of endless surprises and unanswered questions To a conservationist it is like a dream come true a flash back of a few centuries as well as a challenge for the future New Guinea is so special that it is hard to compare it with other islands or tropical areas It is something apart with its very complicated history chapters I 2 4 II 1 4 III I VI I 2 It is partly old but to a great extent very young yet extremely rich and complex It has biota of different sources to such a degree that it is still disputed in this volume as to what Realm it belongs to the Paleotropical or Notogaeian Australian or what Region Oriental Oceanic Papuan or Australian The terms Papuanian Indo Australian and Australasian also have been applied to the area
