Quartieri, 2016-04-22 This state of the art collection of papers on the theory of Cournotian competition focuses on two main subjects oligopolistic Cournot competition and contests The contributors present various applications of the Cournotian Equilibrium Theory addressing topics such as equilibrium existence and uniqueness equilibrium structure dynamic processes coalitional behavior and welfare Special emphasis is placed on the aggregative nature of the games that are relevant to such theory This contributed volume was written to celebrate the 80th birthday of Prof Koji Okuguchi a pioneer in oligopoly theory

Founder of Modern Economics: Paul A. Samuelson Roger E. Backhouse, 2017-04-11 Founder of Modern Economics offers stimulating insight into a towering figure's influence on economics a discipline and way of thinking that influences business policy making and everyday life Guide to Reprints, 2009 **Jean-Baptiste Say** John Cunningham Wood, Steven Kates, 2000 Jean Baptiste Say 1767-1832 is remembered primarily for Say's Law one of the cornerstones of classical economics The success of his *Traité d'économie Politique* made Say the best known expositor of Adam Smith in Europe and America and he became France's first professor of political economy The set covers the following themes Say in the history of economics classical statements on Say's Law later statements on Say's Law the prelude to the General Theory the Keynesian Revolution and the attack on Say's Law Lange Say's Law and the demand for money modern reconstructions of Say's Law commentaries on classical views relating to Say's Law Retrieving the classical understanding of Say's Law *Rethinking Economic Theories* Tiago Cardão-Pito, 2025-09-29 In recent times economic theories have provided the dominant explanations of how to understand and organize human societies This book argues that the study of economic theories must not be restricted to the disciplines of economics political economy or economic sociology and must encompass our

relationship to the biosphere In this new volume Tiago Cardoso Pito further develops his innovative system to organize the major economic theories into two major theoretical groups one is termed hedonist economic theory primarily mainstream economics which generally defends moneyed persons politically and the other is work based economic theory the most well known version of which is Marxism which defends workers politically It is shown that economics can only be understood through the political disputes between these two major theories but it is also argued that both major economic theories are fundamentally unprepared for addressing human societies and the biosphere They both attribute metaphysical status to money describing monetary flows as the constitutive being of economic social and ecological phenomena Furthermore both theories follow the overinclusive and tautological post Adam Smith concept of capital which confuses monetary and non monetary flows Although human work remains highly relevant in our technologically enhanced times this book demonstrates that returning to work based economic theory is no longer a viable option to contest the dominance of hedonist economic theory A new bio social theory is required to explain the integration of human societies into the biosphere This book is a vital reading for students and scholars of economic and social theory political economy economic sociology organization sustainability and ecological issues Joan Robinson Prue Kerr, Geoffrey Colin Harcourt, 2002
