Paviland Cave And The Red Lady A Definitive Report:

Paviland Cave and the 'Red Lady' Stephen Aldhouse-Green, 2000 The Red Lady of Paviland has been the enigmatic heroine of Early Man in Britain since the discovery of human remains impregnated with ochre were found within the Paviland Cave in the Gower Peninsular in 1823 But was she a lady and what were the circumstances of her burial This book examines the evidence again with the benefit of modern techniques and it provides a definitive report on more recent investigations at the site carried out in 1997 The twelve chapters include a description of the site and its deposits dating techniques faunal remains human remains DNA geology lithics ivory bone and shell and analysis of the ochre Contributors S Aldhouse Green S Swainston A Brookes D J Lowe A Turner D Q Bowen R Mournie E Trinkhaus T Holliday T Young and other **The British Palaeolithic** Paul Pettitt, Mark White, 2012-11-27 The British Palaeolithic provides the first academic synthesis of the entire British Palaeolithic from the earliest occupation currently understood to be around 980 000 years ago to the end of the Ice Age Landscape and ecology form the canvas for an explicitly interpretative approach aimed at understanding the how different hominin societies addressed the issues of life at the edge of the Pleistocene world Commencing with a consideration of the earliest hominin settlement of Europe the book goes on to examine the behavioural cultural and adaptive repertoires of the first human occupants of Britain from an ecological perspective These themes flow throughout the book as it explores subsequent occupational pulses across more than half a million years of Pleistocene prehistory which saw Homo heidelbergensis the Neanderthals and ultimately Homo sapiens walk these shores The British Palaeolithic fills a major gap in teaching resources as well as in research by providing a current synthesis of the latest research on the period This book represents the culmination of 40 years combined research in this area by two well known experts in the field and is an important new text for students of British archaeology as well as for students and researchers of the continental Palaeolithic period **Bones and Ochre** Marianne Sommer, 2007 When ochre stained bones were unearthed by William Buckland in a Welsh cave in 1823 they raised many unsettling questions regarding their origin and inspired the casting and recasting of the character who became known as the Red Lady Her biography reflects the personal professional and national ambitions of those who studied her **The Palaeolithic Origins of Human Burial** Paul Pettitt, 2010-12-20 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age The Palaeolithic Origins of Human Burial takes a novel approach to the long term development of human mortuary activity the various ways we deal with the dead and with dead bodies It is the first comprehensive survey of Palaeolithic mortuary activity in the English language Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify core areas of behaviour towards the dead that probably have very deep evolutionary antiquity From that point the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed The core chapters of the book survey the mortuary activities of early hominins archaic members of

the genus Homo early Homo sapiens the Neanderthals the Early and Mid Upper Palaeolithic and the Late Upper Palaeolithic world Burial is a striking component of Palaeolithic mortuary activity although existing examples are odd and this probably does not reflect what modern societies believe burial to be and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene When did symbolic aspects of mortuary ritual evolve When did the dead themselves become symbols In discussing such questions The Palaeolithic Origins of Human Burial offers an engaging contribution to the debate on modern human origins It is illustrated throughout includes up to date examples from the Lower to Late Upper Palaeolithic including information hitherto unpublished A Mind Set on Flint M. J. L. Th Niekus, Nicholas Barton, Martin Street, Thomas Terberger, 2012 This volume comprises papers presented to Dick Stapert on the occasion of his retirement from the Groningen Institute of Archaeology University of Groningen in 2011 and celebrates his scientific career The contributions cover nearly 300 000 years of Human History and were written by colleagues former students and friends Topics include the making and use of fire children in the Stone Age spatial analysis and other themes related to the study of the Palaeolithic Mesolithic and beyond Ireland's First Settlers Peter Woodman, 2015-12-31 Ireland's First Settlers tells the story of the archaeology and history of the first continuous phase of Ireland's human settlement It combines centuries of search and speculation about human antiquity in Ireland with a review of what is known today about the Irish Mesolithic This is in part provided in the context of the author's 50 years of personal experience searching to make sense of what initially appeared to be little more than a collection of beach rolled and battered flint tools The story is embedded in how the island of Ireland its position distinct landscape and ecology impacted on when and how Ireland was colonized It also explores how these first settlers evolved their technologies and lifeways to suit the narrow range of abundant resources that were available The volume concludes with discussions on how the landscape should be searched for the often ephemeral traces of these early settlers and how sites should be excavated It asks what we really know about the thoughts and life of the people themselves and what happened to them as farming began to be introduced **The Social Archaeology of Funerary Remains** Rebecca Gowland, Christopher Knusel, 2009-04-06 Human bones form the most direct link to understanding how people lived in the past who they were and where they came from The interpretative value of human skeletal remains within their burial context in terms of past social identity and organisation is awesome but was for many years underexploited by archaeologists The nineteen papers in this edited volume are an attempt to redress this by marrying the cultural aspects of burial with the anthropology of the deceased *Lithic Technological Organization and Paleoenvironmental Change* Erick Robinson, Frédéric Sellet, 2017-11-06 The objective of this edited volume is to bring together a diverse set of analyses to document how small scale societies responded to paleoenvironmental change based on the evidence of their lithic technologies The contributions bring together an international forum for interpreting changes in technological organization embracing a wide range of time periods geographic regions and methodological approaches As technology brings more refined information on ancient

climates the research on spatial and temporal variability of paleoenvironmental changes In turn this has also broadened considerations of the many ways that prehistoric hunter gatherers may have responded to fluctuations in resource bases From an archaeological perspective stone tools and their associated debitage provide clues to understanding these past choices and decisions and help to further the investigation into how variable human responses may have been Despite significant advances in the theory and methodology of lithic technological analysis there have been few attempts to link these developments to paleoenvironmental research on a global scale

Archaeology Experiences Spirituality? Dragos Gheorghiu, 2011-09-22 This book's aim is to go beyond the limits of the contemporary scientific paradigm of material culture by presenting some of the issues confronting archaeology as it attempts to approach the spirituality of the past It brings together archaeologists from Western and Eastern Europe and the USA who more or less obviously have used their experientiality to approach the world view and mystic experience of ancient peoples The book intends to present several arguments in support of an archaeology of spirituality through a series of seven case studies What method should we use to approach spirituality Are we still dependent on quantitative methods Is phenomenology an appropriate instrument Can experientiality approach a spiritual experience Is the emic approach efficient enough to approach the spiritual side of a studied phenomenon Are the analogous ethnographic models suitable instruments for this task How much of the spirituality of the past is still accessible today Could we build artificial contexts that would allow the recreation of the phenomenological condition analogous to the originals *Archaeology Experiences Spirituality* goes beyond the archaeological study of material culture offering a fascinating lecture for the reader of the twenty first century

The Mesolithic in Britain Chantal Conneller, 2021-11-29 The Mesolithic in Britain proposes a new division of the Mesolithic period into four parts each with its distinct character The Mesolithic has previously been seen as timeless where little changed over thousands of years This new synthesis draws on advances in scientific dating to understand the Mesolithic inhabitation of Britain as a historical process The period was in fact a time of profound change houses monuments middens long term use of sites and regions manipulation of the environment and the symbolic deposition of human and animal remains all emerged as significant practices in Britain for the first time The book describes the lives of the first pioneers in the Early Mesolithic the emergence of new modes of inhabitation in the Middle Mesolithic the regionally diverse settlement of the Late Mesolithic and the radical changes of the final millennium of the period The first synthesis of Mesolithic Britain since 1932 it takes both a chronological and a regional approach This book will serve as an essential text for anyone studying the period undergraduate and graduate students specialists in the field and community archaeology groups
